## Marantz PMD101

# Marantz PMD101 Mono-Pitch Control Portable Cassette Recorder User Manual

Model: PMD101 | Brand: Marantz

## INTRODUCTION

This manual provides comprehensive instructions for the operation, maintenance, and troubleshooting of your Marantz PMD101 Mono-Pitch Control Portable Cassette Recorder. The PMD101 is a versatile portable cassette recorder featuring mono recording, two heads, two speeds, and a convenient pitch control function, designed for reliable audio capture and playback.

## SETUP

### 1. Powering the Unit

The PMD101 can be powered by either batteries or an AC adapter (not included, sold separately). Ensure the unit is turned off before connecting or disconnecting power sources.

- **Battery Installation:** Open the battery compartment cover located on the bottom of the unit. Insert the required number of C-size batteries (refer to the battery compartment for polarity markings). Close the cover securely.
- **AC Adapter Connection:** Connect a compatible DC 6V AC adapter (center positive) to the DC IN jack on the side of the unit. Plug the adapter into a standard wall outlet. Using an incorrect adapter may damage the unit.

### 2. Loading a Cassette Tape

1. Press the **STOP/EJECT** button to open the cassette compartment door.
2. Insert a standard compact cassette tape with the open edge facing towards the tape heads and the side to be played or recorded facing up.
3. Gently close the cassette compartment door until it clicks shut.

### 3. Connecting External Devices (Optional)

- **Headphones:** For private listening, connect 3.5mm stereo headphones to the **HEADPHONES** jack.

- **External Microphone:** To use an external microphone, connect it to the **MIC IN** jack. The built-in microphone will be automatically disabled when an external microphone is connected.

*Note: No relevant product images were provided for this manual.*

## OPERATING INSTRUCTIONS

### Basic Tape Functions

- **PLAY:** Press the **PLAY** button to begin tape playback.
- **STOP/EJECT:** Press the **STOP/EJECT** button to stop playback or recording. Press again to open the cassette compartment.
- **REWIND (REW):** Press the **REW** button to rewind the tape.
- **FAST FORWARD (FF):** Press the **FF** button to fast forward the tape.
- **PAUSE:** Press the **PAUSE** button during playback or recording to temporarily stop the tape. Press again to resume.

### Recording

1. Ensure a recordable cassette tape is loaded (one without the safety tabs broken off).
2. Set the desired recording speed using the **SPEED** switch (1-7/8 ips or 15/16 ips).
3. Adjust the **VOLUME** control to an appropriate level.
4. Press the **RECORD** button (usually red) simultaneously with the **PLAY** button to begin recording. The built-in microphone will capture audio, or the external microphone if connected.
5. To stop recording, press the **STOP/EJECT** button.

### Pitch Control

The PMD101 features a variable pitch control. During playback, rotate the **PITCH CONTROL** knob to adjust the playback speed and pitch of the audio. Turning the knob clockwise increases the pitch/speed, and counter-clockwise decreases it. This feature is useful for transcription or fine-tuning audio playback.

### Speed Selection

The unit supports two tape speeds: 1-7/8 inches per second (ips) for standard playback/recording, and 15/16 ips for extended recording time at lower fidelity. Use the **SPEED** switch to select the desired speed.

*Note: No relevant product videos were provided for this manual.*

## MAINTENANCE

### Cleaning Tape Heads and Capstan

Regular cleaning of the tape heads, capstan, and pinch roller is essential for optimal sound quality and tape longevity. Clean these components after every 10-20 hours of use, or if sound quality deteriorates.

1. Open the cassette compartment.
2. Using a cotton swab lightly dampened with isopropyl alcohol or a specialized head cleaner, gently wipe the tape heads, capstan (the small metal shaft), and pinch roller (the rubber wheel next to the capstan).

3. Allow the components to dry completely before inserting a tape.

## General Cleaning

Wipe the exterior of the unit with a soft, dry cloth. Do not use abrasive cleaners or solvents, as they may damage the finish.

## Battery Care and Storage

- Remove batteries if the unit will not be used for an extended period to prevent leakage and damage.
- Store the unit in a cool, dry place, away from direct sunlight and extreme temperatures.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Unit does not power on.	Batteries are dead or incorrectly inserted. AC adapter is not connected or faulty.	Replace batteries or check polarity. Ensure AC adapter is securely connected and functional.
No sound during playback.	Volume is too low. Headphones not connected properly. Tape heads are dirty. Tape is blank or damaged.	Increase volume. Check headphone connection. Clean tape heads. Try a different tape.
Poor recording quality.	Tape heads are dirty. Microphone is too far from sound source. Tape is old or low quality. Recording level too low or high.	Clean tape heads. Position microphone closer to source. Try a new, high-quality tape. Adjust volume during recording.
Tape does not move.	Tape is jammed or tangled. Pinch roller or capstan is dirty. Unit is in PAUSE mode.	Open compartment, carefully remove and inspect tape. Clean pinch roller and capstan. Press PAUSE button again to resume.

## SPECIFICATIONS

Model Number	PMD101
Brand	Marantz
Product Dimensions	0.39 x 0.39 x 0.39 inches

<b>Item Weight</b>	6 pounds
<b>Microphone Form Factor</b>	Built-In
<b>Microphone Operation Mode</b>	Mono
<b>Headphones Jack</b>	3.5 millimeters
<b>UPC</b>	699927400163
<b>Date First Available</b>	September 4, 1999
