Igloo 4101

Igloo 10-Gallon Industrial Water Jug Instruction Manual

Model: 4101 | Brand: Igloo

INTRODUCTION

The Igloo 10-Gallon Industrial Water Jug is designed for durability and performance, keeping beverages cold for extended periods. Constructed from high-impact, lightweight plastic, it features foamed-in-place Ultratherm insulation for superior cold retention. This manual provides essential information for the proper setup, operation, and maintenance of your water jug to ensure optimal performance and longevity.

1. SETUP

- Unpacking:** Carefully remove the water jug and all its components from the packaging. Inspect for any damage.
- Initial Cleaning:** Before first use, wash the interior and exterior of the jug, including the lid and spigot, with mild soap and water. Rinse thoroughly.
- Lid Placement:** Ensure the pressure-fit lid is securely placed on top of the jug to maintain insulation. The lid has a molded-in contour handle and keeper cord to prevent loss.

4. **Spigot Check:** Verify that the white nylon spigot is properly installed and in the closed position before filling.

2. OPERATING INSTRUCTIONS

1. Filling the Jug:

- Remove the lid.
- Fill the jug with your desired beverage (e.g., water, juice). For best cold retention, fill approximately three-quarters with liquid and one-quarter with ice.
- Securely replace the lid, ensuring a tight fit to maximize insulation.

2. Dispensing Beverages:

- Place a cup under the white nylon spigot.
- Press the push-button spigot to dispense the liquid. Release the button to stop the flow. The spigot is designed to be drip-proof.

3. MAINTENANCE

Cleaning Instructions:

- **Interior and Exterior:** Wash with mild soap and warm water. For stubborn stains, a solution of baking soda and water can be used. Rinse thoroughly with clean water.
- **Spigot:** The spigot can be removed for thorough cleaning. Unscrew it from the inside of the jug, clean all parts with soap and water, and rinse well. Ensure it is reassembled tightly to prevent leaks.
- **Lid:** Clean the lid with soap and water, paying attention to the seal.
- **Drying:** Allow all parts to air dry completely before reassembling and storing to prevent mold or mildew.

Note: This product is not dishwasher safe.

4. TROUBLESHOOTING

- **Liquid Not Dispensing:**
 - Check if the spigot is fully open.
 - Ensure there is enough liquid in the jug.
 - Verify that the spigot is not clogged by ice or pulp.
- **Leaking Spigot:**
 - Tighten the spigot assembly from the inside of the jug.
 - Check for any damage to the spigot or its rubber gasket. Replacement parts may be available from the manufacturer.
- **Poor Cold Retention:**
 - Ensure the lid is securely closed and sealed.
 - Pre-chill the jug with ice water before adding your beverage and fresh ice.
 - Avoid opening the lid frequently.

5. SPECIFICATIONS

Feature	Detail
Brand	Igloo
Model Name	4101
Capacity	10 Gallons (approximately 37.85 Liters)
