Energizer E92BP8

Energizer AAA Max Power Seal Batteries

MODEL: E92BP8

Introduction

The Energizer AAA Max Power Seal Batteries, model E92BP8, are designed to provide reliable and long-lasting power for a wide range of electronic devices. This manual outlines the proper procedures for installation, operation, maintenance, and safety to ensure optimal performance and user safety.

Important Safety Instructions

Please read and follow these safety instructions carefully to prevent injury or damage to your devices.

- Do not install batteries backwards. Ensure correct polarity (+ and -) alignment with the device's battery compartment.
- Do not charge these batteries. They are non-rechargeable alkaline batteries. Attempting to charge them may cause leakage or explosion.
- Do not put batteries in fire. Exposure to high heat or fire can cause batteries to explode or leak.
- Do not mix with other battery types (e.g., carbon-zinc, rechargeable) or used batteries. Mixing battery types or old and new batteries can lead to leakage or reduced performance.
- Replace all batteries at the same time to maintain consistent power and prevent issues.
- Keep batteries out of reach of small children. If swallowed, seek medical attention immediately.
- In case of battery leakage, avoid contact with skin and eyes. If contact occurs, rinse thoroughly with water and seek medical advice.

Installation Guide

Follow these steps to correctly install your Energizer AAA batteries into your device:

1. Identify the battery compartment on your electronic device.
2. Open the battery compartment cover.
3. Observe the polarity markings (+ and -) inside the compartment.
4. Insert the Energizer AAA batteries, matching the positive (+) end of the battery to the positive (+) terminal in the compartment, and the negative (-) end to the negative (-) terminal.
5. Ensure all batteries are securely seated.

6. Close the battery compartment cover.

Operating

Once installed, Energizer AAA Max Power Seal Batteries are ready for use. They are suitable for a variety of everyday devices such as remote controls, flashlights, toys, and portable audio players. For optimal performance, ensure your device is compatible with AAA alkaline batteries.

Maintenance

Proper care and storage can extend the life and performance of your batteries:

- Store unused batteries in a cool, dry place at room temperature. Avoid extreme temperatures, both hot and cold, as they can reduce battery life.
- Do not store batteries in direct sunlight or near heat sources.

- Remove batteries from devices that will not be used for extended periods to prevent potential leakage and damage to the device.
- Keep battery terminals clean. If they become dirty, wipe them with a clean, dry cloth.

Troubleshooting

If you encounter issues with your batteries or device, consider the following:

- **Device Not Working:**
 - Check that batteries are inserted with correct polarity (+ and -).
 - Ensure the battery compartment is clean and free of corrosion.
 - Replace all batteries with a fresh set.
- **Battery Leakage:**
 - If a battery leaks, carefully remove it from the device, avoiding direct contact with the leaked material.
 - Clean the battery compartment of the device with a cotton swab lightly moistened with vinegar (for alkaline leaks) or lemon juice, then wipe dry.
 - Dispose of leaked batteries according to local regulations for hazardous waste.
- **Short Battery Life:**
 - Ensure the device is not drawing excessive power.
 - Verify that all batteries were replaced simultaneously with fresh ones.
 - Check the device's power requirements; some high-drain devices may deplete batteries faster.

Product Specifications

Model Number	E92BP8
Battery Type	Alkaline
Battery Size	AAA
Number of Batteries	8 (included)
Product Dimensions	0.87 x 3.69 x 4.25 inches
Manufacturer	Energizer-Eveready
Date First Available	December 4, 2006
