HAVAHART 1079SR

HAVAHART 1079SR Large 1-Door Humane Catch and Release Live Animal Trap

Model: 1079SR (100061159)

Brand: HAVAHART

INTRODUCTION

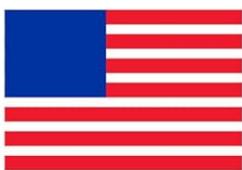

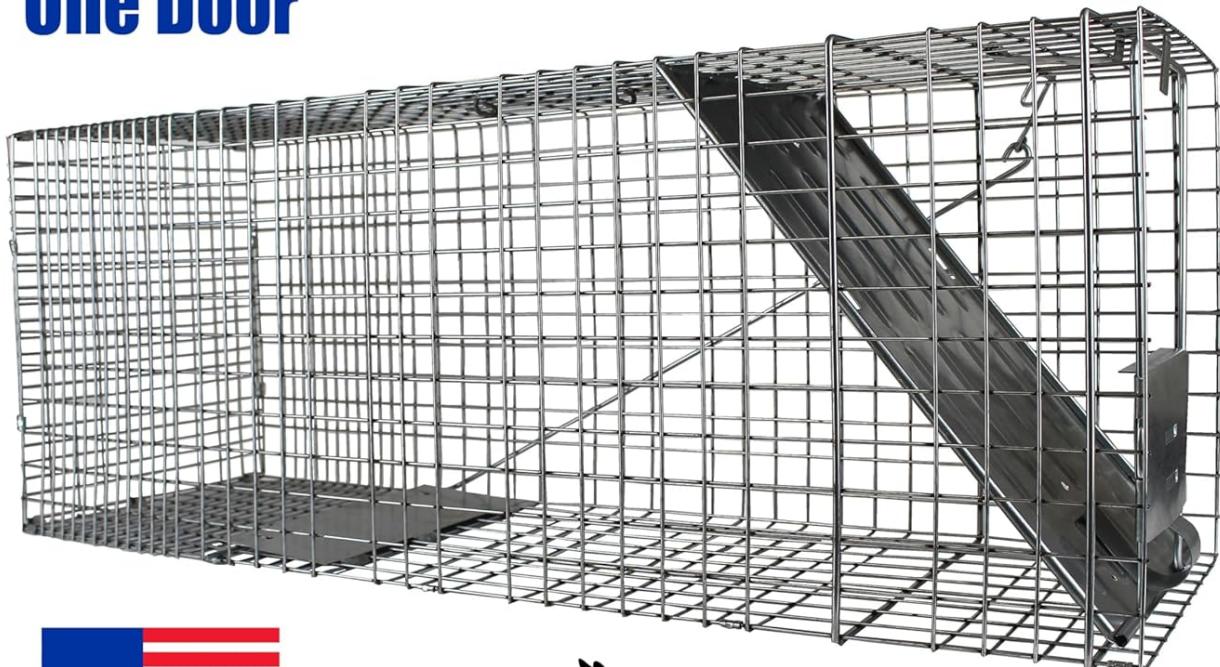

The Havahart 1079SR Live Animal Cage Trap is designed for the humane capture and release of various animals, including raccoons, stray cats, opossums, armadillos, groundhogs, and skunks. This large, single-door trap prioritizes both animal safety and user convenience, featuring smooth internal edges to prevent injury to trapped animals and a handle guard for safe transport. Its robust construction ensures durability and reliable performance for effective animal management.

HAVAHART®

Live Animal Cage Trap

One Door

**Made in U.S.A.
With Global Parts**

SAFETY INFORMATION

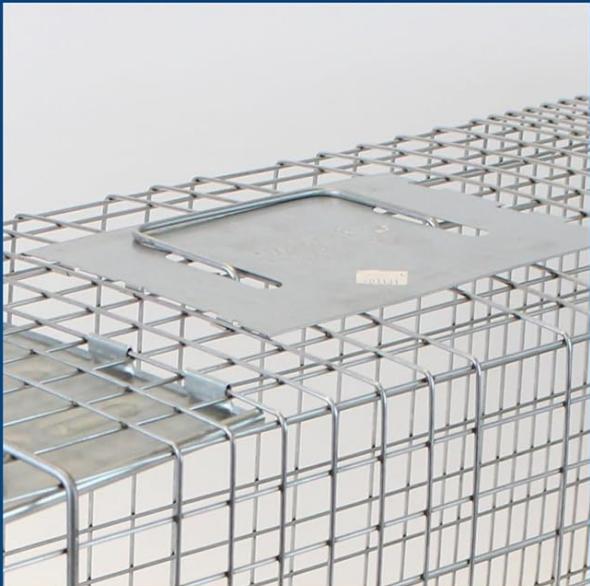

Always exercise caution when handling live animals. Even humanely trapped animals can be unpredictable. Wear protective gloves and avoid direct contact with the animal. Keep the trap out of reach of children and pets when not in use or when set.

- **Handle Guard:** Utilize the integrated handle guard to protect your hands from potential bites or scratches during transport.
- **Smooth Edges:** The trap is designed with smooth internal edges to minimize injury to the captured animal.
- **Placement:** Place the trap in a stable, level area away from direct sunlight or extreme weather conditions.

Innovative Safety Features

Smooth internal edges
prevent injuries to
trapped animals

Solid handle guard
protects you from
animal contact
during transport

SETUP AND ASSEMBLY

The Havahart 1079SR trap typically comes pre-assembled. Follow these steps to prepare it for use:

- 1. Unfold the Trap:** Carefully unfold the trap from its collapsed state. Ensure all panels are securely locked into place.
- 2. Position the Trip Plate:** Locate the trip plate inside the trap. This is the platform that the animal steps on to trigger the door.
- 3. Set the Door Mechanism:** Lift the trap door and secure it in the open position using the setting rod or hook provided. The setting rod connects the door to the trip plate. Ensure the mechanism is stable and will release smoothly when the trip plate is activated.

OPERATING INSTRUCTIONS

Baiting the Trap

Effective baiting is crucial for successful trapping. Place bait beyond the trip plate to encourage the animal to fully enter the trap.

Recommended Baits by Animal Type

Target Species	Recommended Bait
Armadillos	Meal worms, overripe fruit, spoiled meat
Cats	Cat food, sardines
Groundhogs	Apples, bananas, lettuce
Opossums, Raccoons & Skunks	Bacon, cat food, marshmallows, sardines

Baits for Optimal Performance

Armadillos: Meal worms, overripe fruit, spoiled meat

Cats: Cat food, sardines

Groundhogs: Apples, bananas, lettuce

Opossums, Raccoons & Skunks: Bacon, cat food, marshmallows, sardines

Image: A visual guide showing various animals and their corresponding recommended baits for effective trapping.

Trap Placement

Place the trap in areas where target animals are known to frequent, such as along fences, near burrows, or in areas with signs of activity. Ensure the trap is on a level surface to prevent accidental triggering or tipping.

Prevents False Triggers

Finely-tuned trip mechanism targets heavier animals

Powerful trap door delivers quick, secure captures

Image: A Havahart trap set in a natural outdoor environment, with a raccoon successfully captured inside, demonstrating proper placement.

Monitoring and Release

Check the trap frequently. Once an animal is captured, approach the trap calmly and quietly. Use the handle guard for safe transport. Transport the animal to a suitable release location, ideally several miles away from the capture site, and release it humanely by opening the trap door. Avoid prolonged confinement of the animal.

#1 BRAND Used by Professionals

MAINTENANCE

Proper maintenance ensures the longevity and effectiveness of your Havahart trap.

- **Cleaning:** After each use, especially after capturing an animal, clean the trap thoroughly with water and a mild disinfectant. This removes odors that might deter future captures and maintains hygiene. Rinse well and allow to air dry completely.
- **Inspection:** Regularly inspect the trap for any signs of damage, rust, or wear. Check that the door mechanism and trip plate operate smoothly.
- **Storage:** Store the trap in a dry place to prevent rust and corrosion. The trap can be folded for compact storage.

TROUBLESHOOTING

Common Issues and Solutions

Problem	Possible Cause / Solution
Trap not triggering	Bait Placement: Ensure bait is placed beyond the trip plate, forcing the animal to step on it. Mechanism Obstruction: Check for debris or obstructions preventing the trip plate or door from moving freely. Sensitivity: The trap's trip mechanism is fine-tuned for heavier animals. Ensure the target animal is heavy enough to activate it.
Animal escapes after triggering	Door Latch: Verify the door latch mechanism is fully engaging when triggered. Trap Stability: Ensure the trap is on a level, stable surface to prevent tipping or door jamming. Animal Size: The trap is designed for specific animal sizes. An animal that is too small might not fully enter or trigger the trap effectively.
Animals avoid the trap	Human Scent: Animals can detect human scent. Handle the trap with gloves. Bait Type: Experiment with different baits suitable for the target animal. Trap Location: Relocate the trap to a more secluded or active area. Trap Cleanliness: Ensure the trap is clean and free of previous animal scents.

SPECIFICATIONS

- **Model:** 1079SR (Item model number: 100061159)
- **Brand:** HAVAHART
- **Dimensions:** 32" L x 10" W x 12" H
- **Weight:** 9.92 pounds (4.51 Kilograms)
- **Material:** Alloy Steel (Galvanized, one-piece wire mesh)
- **Door Type:** 1-Door
- **Color:** Silver
- **Target Species:** Armadillo, Cat, Groundhog, Opossum, Raccoon, Skunk
- **UPC:** 036348561019
- **Manufacturer:** Woodstream
