Fiskars 15-Inch PowerGear Loppers Instruction Manual

Model: 79726997J

INTRODUCTION

The Fiskars 15-Inch PowerGear Loppers are designed for efficient and powerful cutting of branches up to 1.25 inches in diameter. Featuring PowerGear technology for enhanced leverage and durable construction, these loppers are suitable for various gardening and yard maintenance tasks. The fully hardened, precision-ground steel blade ensures lasting sharpness, while a low-friction coating prevents gumming and corrosion.

SAFETY INFORMATION

- Always wear appropriate safety gear, including gloves and eye protection, when operating loppers.
- Keep hands and fingers clear of the blades during operation.
- Ensure stable footing when cutting branches, especially overhead.
- Do not attempt to cut branches exceeding the specified 1.25-inch diameter capacity.
- Store loppers in a safe, dry place, out of reach of children.

SETUP

The Fiskars 15-Inch PowerGear Loppers come pre-assembled and ready for immediate use. No complex setup is required.

1. **Unpacking:** Carefully remove the loppers from their packaging.
2. **Initial Inspection:** Inspect the blades for any shipping damage. Ensure the handles operate smoothly.
3. **Safety Check:** Verify that the blades close completely and the PowerGear mechanism moves freely.

OPERATING INSTRUCTIONS

These loppers utilize PowerGear technology to multiply leverage, making cutting easier. They are designed for two-handed operation.

1. **Identify the Cut:** Locate the branch to be trimmed. Ensure it is within the 1.25-inch diameter capacity.
2. **Position the Blades:** Open the lopper handles and position the branch as deep as possible into the jaws of the blade. This maximizes leverage.

PowerGear[®] technology
multiplies cutting power over traditional designs

FISKARS[®]

Image: Close-up of the PowerGear mechanism engaging with a branch, illustrating enhanced cutting power.

3. **Apply Pressure:** Firmly close the handles with both hands, applying steady pressure until the branch is cut. The PowerGear mechanism will assist in reducing effort.

Lightweight
with superior strength

FISKARS®

4. **Repeat as Needed:** Continue trimming branches, ensuring proper positioning and safe operation.

Cutting Capacity

The Fiskars 15-Inch PowerGear Loppers are designed to cut branches up to **1.25 inches (3.17 cm)** in diameter. Attempting to cut thicker branches may damage the tool or result in an incomplete cut.

MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your loppers.

- **Cleaning:** After each use, clean the blades to remove sap, debris, and dirt. A damp cloth is usually sufficient. For stubborn sap, use a specialized blade cleaner or rubbing alcohol.

Non-stick blade coating

cuts with less effort

FISKARS®

Image: Close-up of the lopper blade, highlighting its non-stick coating for easier cleaning and reduced friction.

- **Lubrication:** Periodically apply a light machine oil to the pivot points and blade surfaces to maintain smooth operation and prevent rust.
- **Sharpening:** The fully hardened, precision-ground steel blades are designed to stay sharp. If sharpening becomes necessary, use a fine-grit sharpening tool designed for garden tools. Follow the manufacturer's instructions for sharpening to maintain the blade's edge.

Long-lasting sharpness

Image: The sharp blade of the Fiskars loppers, indicating its durability and long-lasting edge.

- **Storage:** Store loppers in a dry environment to prevent corrosion. Consider using a blade cover for added protection.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Difficulty cutting branches	Dull blades, excessive branch diameter, or sticky sap buildup.	Clean and lubricate blades. Sharpen blades if necessary. Ensure branch diameter is within 1.25 inches.
Blades sticking or stiff operation	Lack of lubrication, rust, or debris in the pivot mechanism.	Clean thoroughly and apply lubricant to all moving parts. Remove any visible debris.
Incomplete cuts	Improper blade positioning or attempting to cut branches too thick.	Ensure the branch is placed deep into the blade jaws. Do not exceed the 1.25-inch cutting capacity.

SPECIFICATIONS

Feature	Detail
Brand	Fiskars
Model Number	79726997J
Style	Super Pruner/Lopper 15"
Cutting Capacity	Up to 1.25 inches (3.17 cm)
Item Weight	0.9 Pounds (approx. 408 grams)
Product Dimensions (L x W)	17.38"L x 6.88"W (approx. 44.15 cm x 17.48 cm)
Blade Material	Alloy Steel (Fully hardened, precision-ground)
Handle Material	Alloy Steel (with DuraFrame construction)
Technology	PowerGear for multiplied leverage
Blade Coating	Low-friction, rust-resistant

WARRANTY

The Fiskars 15-Inch PowerGear Loppers come with a **Full Lifetime Warranty**. Fiskars tools are designed for longevity and guaranteed to maintain exceptional performance season after season. For detailed information and to register your product, please visit the official Fiskars website or refer to the warranty card included with your product.
