

Master Lock 1500T

Master Lock 1500T Combination Padlock Instruction Manual

Model: 1500T

Brand: Master Lock

PRODUCT OVERVIEW

The Master Lock 1500T Combination Padlock is designed for securing personal belongings in various indoor environments. This 2-pack offers convenience with a single preset 3-digit combination that opens both padlocks. Its robust construction ensures durability and resistance against common tampering methods.

Image: Two Master Lock 1500T combination padlocks, showcasing their design and the preset combination dial.

Key Features:

- **Preset Three-Digit Combination:** Both padlocks in the pack share the same factory-set combination for ease of use.
- **Durable Construction:** Features a metal body, stainless-steel cover, and a hardened steel shackle.
- **Anti-Shim Locking Mechanism:** Provides enhanced security against shimming attacks.
- **Indoor Use:** Ideal for school lockers, gym lockers, cabinets, and employee lockers.

2 Locks 1 Combo

**Hardened steel
shackle for extra
cut resistance**

**Anti-shim
technology for
enhanced security**

**Stainless steel
cover for strength**

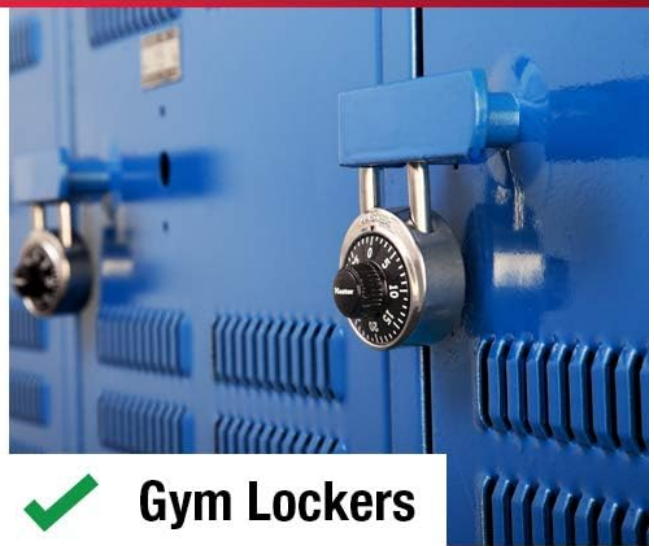

**3-digit
combination
for keyless
convenience**

Not Intended for Outdoor Use

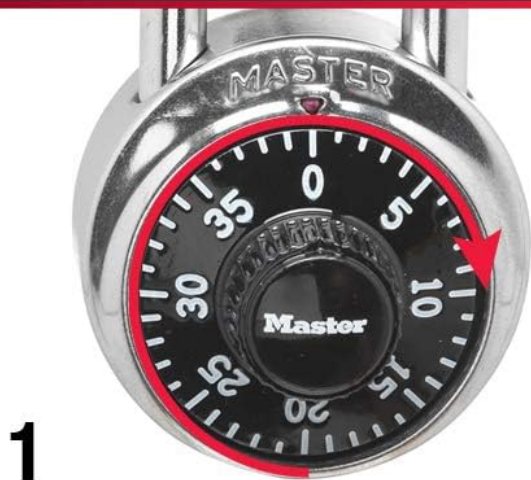

Image: Visual examples of environments where the padlock is not recommended for use, including outdoor gates, fences, sheds, and storage units, due to its indoor-specific design.

SETUP AND OPERATION

The Master Lock 1500T comes with a factory-set, non-changeable 3-digit combination. Both padlocks in a 2-pack share the same combination. To open the padlock, follow these steps precisely:

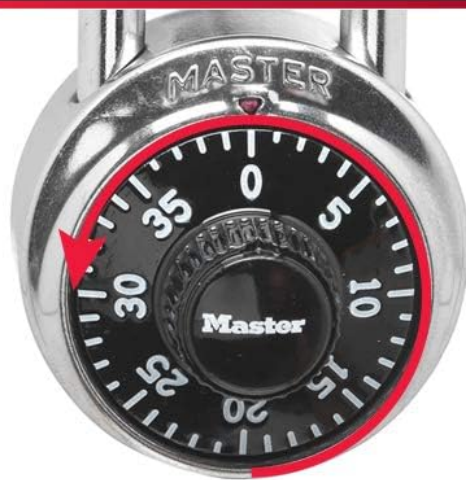

1. **Clear the Lock:** Turn the dial clockwise two or more full turns to clear the previous setting. Stop with the indicator at the top.
2. **First Number:** Turn the dial clockwise to the first number of your preset combination. Stop precisely on this number.
3. **Second Number:** Turn the dial counter-clockwise past zero once, then continue to the second number of your combination. Stop precisely on this number.
4. **Third Number:** Turn the dial clockwise directly to the third number of your combination. Stop precisely on this number.
5. **Open:** Pull up on the shackle to open the padlock.

How To Open

1

Turn the dial 3 times to the right and stop on the first number of the sequence.

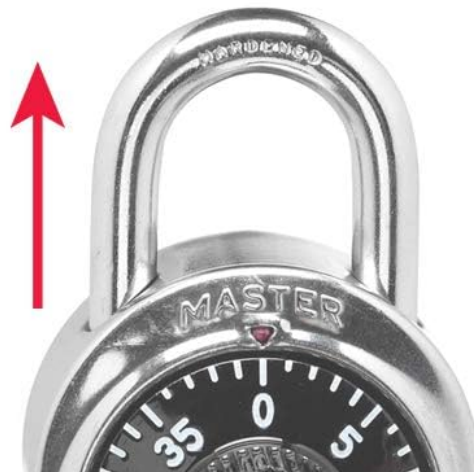

2

Turn the dial to the left, pass the first number of the sequence and stop on the second number.

3

Turn the dial to the right and stop on the third number of the sequence.

4

Pull on the shackle.

Image: A step-by-step visual guide illustrating the correct sequence of dial turns to open the Master Lock 1500T combination padlock.

Note: The combination for your padlock is permanently set at the factory and cannot be changed. It is typically found on a sticker on the back of the packaging or on the lock itself when new. Keep this combination in a safe, memorable place.

MAINTENANCE

To ensure the longevity and smooth operation of your Master Lock 1500T combination padlock, consider the following maintenance tips:

- **Keep Clean:** Periodically wipe the lock body and shackle with a soft, dry cloth to remove dust and grime.
- **Avoid Moisture:** As this padlock is designed for indoor use, protect it from excessive moisture and humidity to prevent rust or corrosion.
- **Lubrication (Optional):** If the dial or shackle mechanism becomes stiff over time, a small amount of graphite lubricant or a silicone-based spray lubricant can be applied to the moving parts. Avoid oil-based lubricants as they can attract dirt.

TROUBLESHOOTING

Lock Does Not Open:

- **Verify Combination:** Double-check that you are using the correct preset 3-digit combination. The combination is fixed and cannot be changed.
- **Precision is Key:** Ensure you are stopping precisely on each number of the combination. Even a slight deviation can prevent the lock from opening.
- **Correct Sequence:** Confirm you are following the exact opening sequence: clockwise to the first number, counter-clockwise past zero once then to the second number, and clockwise directly to the third number.
- **Clear the Lock:** Always perform the initial two or more full clockwise turns to clear the mechanism before entering the combination.
- **Shackle Pull:** After entering the combination, ensure you are pulling the shackle firmly upwards.

Dial is Stiff:

- **Cleanliness:** Dirt or debris might be obstructing the dial's movement. Clean the lock as described in the Maintenance section.
- **Lubrication:** Apply a small amount of graphite or silicone-based lubricant to the dial mechanism if it remains stiff after cleaning.

SPECIFICATIONS

Attribute	Detail
Brand	Master Lock
Model Name	Locker Lock (1500T)
Lock Type	Combination Lock
Material	Metal body, Stainless-steel cover, Hardened steel shackle
Color	Black
