## Master Lock 630D

# Master Lock 630D Combination Padlock User Manual

Model: 630D | Brand: Master Lock

## INTRODUCTION

This manual provides instructions for the Master Lock 630D Set Your Own Combination Padlock. Designed for durability and convenience, this padlock is ideal for securing backpacks, cabinets, and zippers. Its solid metal body and nickel-plated steel shackle offer resistance against cutting and sawing, while the 3-dial combination provides keyless security.

## PRODUCT FEATURES

- **Compact Design:** Small lock, best used as a travel lock, backpack lock, or cabinet lock.
- **Customizable Combination:** Set your own three-digit combination for keyless convenience.
- **Durable Construction:** Constructed with an aluminum body and nickel-plated steel shackle.
- **Dimensions:** 1-3/16 in. (30 mm) wide lock body; 3/16 in. (5 mm) diameter shackle with 1 in. (25 mm) length, 9/16 in. (14 mm) width.

## SETUP: SETTING YOUR COMBINATION

The shackle is preset to open on 0-0-0. Follow these steps to set your personal combination:

1. Set the dials to the current code (factory preset is 0-0-0).
2. Pull up the shackle to open the lock.
3. Rotate the shackle 90 degrees (a quarter turn) in either direction.
4. Press the shackle down firmly into the lock body.
5. While holding the shackle down, set your new desired 3-digit combination by turning the dials. Ensure the numbers align with the indicator line.
6. Release the shackle and return it to its normal open position.
7. Rotate the shackle back to the original 0-degree position.
8. Push the shackle down to lock. Scramble the dials to secure the lock.

**Important: Remember your new combination. There is no master key or override for this lock.**

---

## OPERATING THE PADLOCK

To open the padlock, align the three dials to your set combination. The shackle will release, allowing you to open the lock. To close, simply push the shackle back into the lock body and scramble the dials to secure it.

---

## MAINTENANCE

The Master Lock 630D is designed for low maintenance. To ensure smooth operation and prolong the life of your padlock:

- Keep the dials clean and free from dirt or debris.
- Periodically apply a small amount of silicone lubricant to the shackle mechanism if it becomes stiff. Avoid oil-based lubricants as they can attract dirt.
- Store the lock in a dry environment when not in use to prevent corrosion.

## TROUBLESHOOTING

### Lock Will Not Open with Correct Combination

If the lock does not open after entering the correct combination, try the following:

- Ensure each number on the dials is perfectly aligned with the indicator line. Sometimes a slight misalignment can prevent opening.
- Gently jiggle the shackle while entering the combination.
- Double-check that you are using the correct combination. If you recently reset it, ensure you are using the new code.
- If the lock has been exposed to extreme conditions (e.g., dirt, moisture), clean the dials and shackle area thoroughly and apply a lubricant.

### Shackle is Stiff or Difficult to Move

- Apply a silicone-based lubricant to the shackle where it enters the lock body.
- Ensure the combination is correctly set to 0-0-0 (or your current combination) before attempting to open or reset.

## SPECIFICATIONS

Feature	Detail
---------	--------

Brand	Master Lock
Model Name	Set Your Own Combination Lock
