Bushnell 133410C

Bushnell Falcon 7x35 Binoculars (Model 133410C) User Manual

Your guide to optimal viewing experiences.

Introduction

Thank you for choosing the Bushnell Falcon 7x35 Binoculars. These binoculars are designed to provide clear, magnified views for a variety of activities, including bird-watching, sporting events, hunting, and general outdoor observation. This manual will guide you through the setup, operation, and maintenance of your new binoculars to ensure you get the best performance.

What's in the Box

Please check the package contents to ensure all items are present:

- Bushnell Falcon 7x35 Binoculars
- Storage Case with Straps
- Instruction Manual (this document)

Setup

1. Adjusting Interpupillary Distance (IPD)

The interpupillary distance is the distance between the centers of your pupils. To match this to your binoculars:

1. Hold the binoculars up to your eyes.

2. Grasp each barrel firmly.
3. Move the barrels closer together or further apart until you see a single, clear circular field of view.

Image: Illustration showing how to adjust the binocular barrels to match eye spacing.

2. Focusing with the InstaFocus System

Your Bushnell Falcon binoculars feature an InstaFocus system for quick and easy focusing:

1. Look through the binoculars at a distant object.
2. Locate the InstaFocus lever, typically found on the top-center of the binoculars.
3. Move the lever back and forth until the image appears sharp and clear. This system is designed for fast adjustments, especially useful for moving targets.

Your browser does not support the video tag.

Video: A closer look at the Bushnell Falcon 7x35 Binoculars, demonstrating key features like the InstaFocus lever and objective lenses.

3. Eyecup Adjustment (for Eyeglass Wearers)

The binoculars are equipped with fold-down eyecups for comfortable viewing, whether you wear eyeglasses or not:

- **Without Eyeglasses:** Keep the eyecups in their fully extended position.
- **With Eyeglasses:** Fold down the rubber eyecups. This brings your eyes closer to the eyepiece lenses, allowing you to see the full field of view.

Operating Your Binoculars

Once set up, using your binoculars is straightforward:

1. Bring the binoculars to your eyes, ensuring your thumbs are positioned comfortably under the barrels.
2. Locate your desired subject.
3. Use the InstaFocus lever to achieve a sharp image.
4. For extended viewing, consider resting your elbows on a stable surface or using a tripod (tripod adapter not included) for increased stability.

Maintenance and Care

Proper care will ensure the longevity and performance of your Bushnell binoculars:

Cleaning Lenses

- Always use a soft, lint-free cloth (microfiber is ideal) specifically designed for optical lenses.
- Gently brush away any dust or loose debris from the lens surface before wiping.
- For stubborn smudges or fingerprints, apply a small amount of lens cleaning fluid to the cloth (never directly to the lens) and wipe gently in a circular motion.
- Avoid using abrasive cloths, paper towels, or household cleaners, as these can scratch or damage the lens coatings.

Storage

- When not in use, store your binoculars in the provided protective case.
- Keep them in a cool, dry place, away from direct sunlight and extreme temperatures.
- Avoid storing them in areas with high humidity, which can promote mold growth on lenses.

General Care

- Protect your binoculars from impacts and drops. The rubberized finish provides some protection, but severe impacts can misalign the optics.
- Avoid exposing the binoculars to excessive moisture. While they are waterproof, prolonged submersion is not recommended.

Troubleshooting

If you encounter issues with your binoculars, try these common solutions:

Problem	Possible Cause / Solution
Blurry Image	Ensure the InstaFocus lever is adjusted correctly for your viewing distance. Check if lenses are dirty; clean them as per maintenance instructions. Verify interpupillary distance is set correctly for your eyes.
Double Image or Eye Strain	Interpupillary distance (IPD) is likely incorrect. Adjust the barrels until you see a single, merged image. Ensure eyecups are correctly positioned (folded down for eyeglasses, extended otherwise).
Limited Field of View (with eyeglasses)	Ensure eyecups are fully folded down to bring your eyes closer to the eyepieces.

Specifications

Detailed specifications for your Bushnell Falcon 7x35 Binoculars:

Feature	Detail
Magnification	7x
Objective Lens Diameter	35 mm
Prism Type	Porro Prism
Focus System	InstaFocus (Auto Focusing)
