

Dremel 9904

Dremel 9904 Tungsten Carbide Cutter User Manual

Model: 9904 - Round End Cylinder 3/32"

1. PRODUCT OVERVIEW

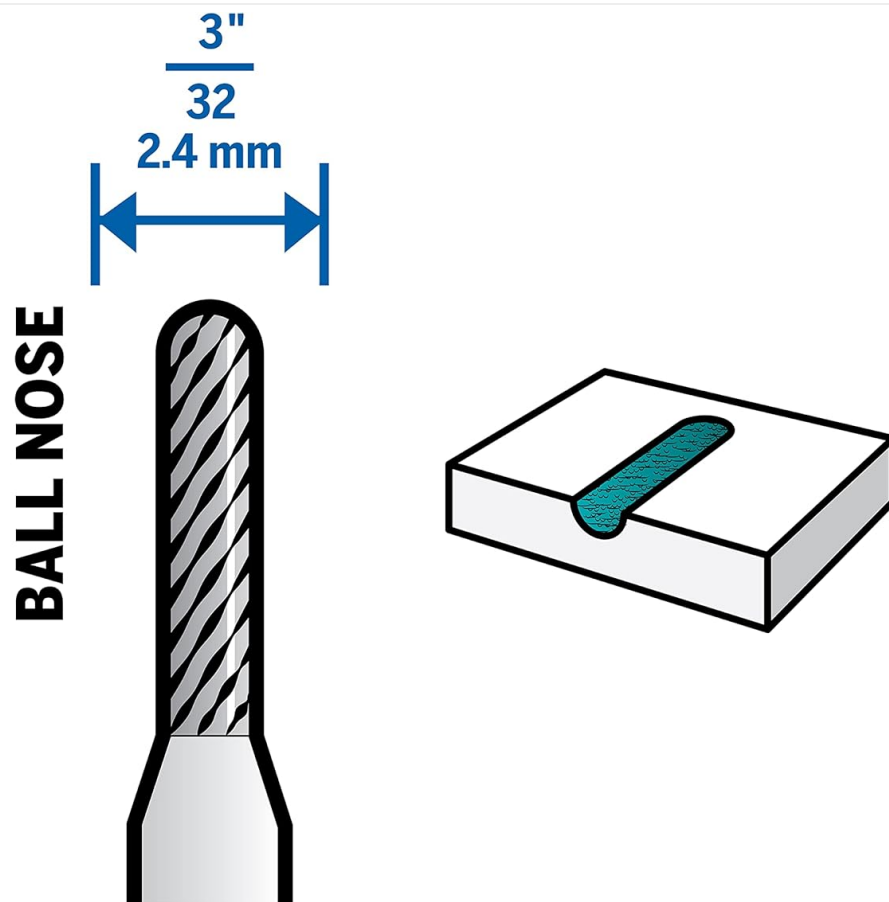

The Dremel 9904 Tungsten Carbide Cutter is a highly durable accessory designed for aggressive material removal, shaping, smoothing, and grinding. Its robust tungsten carbide construction makes it suitable for a wide range of hard materials.

This cutter is ideal for precision tasks such as metal engraving, glass engraving, stone carving, and efficiently removing flash from castings. It is engineered to provide consistent performance across various demanding applications.

Figure 1: The Dremel 9904 Tungsten Carbide Cutter, featuring its distinctive spiral cutting head.

9904 TUNGSTEN CARBIDE CARVING BIT

Figure 2: Detailed diagram illustrating the 3/32 inch (2.4 mm) diameter and round end cylinder (ball nose) shape of the 9904 bit.

2. SETUP

Before installing the Dremel 9904 Tungsten Carbide Cutter, ensure your rotary tool is powered off and unplugged to prevent accidental activation. Safety is paramount during setup.

1. **Prepare the Rotary Tool:** Ensure the collet nut on your rotary tool is loosened.
2. **Insert the Cutter:** Carefully insert the 1/8-inch shank of the Dremel 9904 cutter into the collet. Ensure it is seated as deeply as possible without the flutes touching the collet.
3. **Tighten Securely:** Hand-tighten the collet nut, then use the collet wrench to fully tighten it. The cutter must be held firmly to prevent slippage during operation.
4. **Verify Installation:** Gently tug on the cutter to confirm it is securely fastened and will not come loose during use.

Always refer to your specific rotary tool's instruction manual for detailed collet and accessory installation procedures.

3. OPERATING INSTRUCTIONS

The Dremel 9904 Tungsten Carbide Cutter is designed for precision work on hard materials. Proper

technique and speed settings are crucial for optimal results and tool longevity.

3.1 Speed Settings

Adjust the rotary tool's speed according to the material being worked on:

- **Hard Woods:** Use higher speeds for efficient material removal.
- **Metals (Hardened Steel, Stainless Steel, Cast Iron, Nonferrous Metals):** Use slower speeds to prevent overheating and premature wear of the bit.
- **Plastics:** Use very slow speeds to avoid melting the material and to ensure a clean cut.
- **Fired Ceramics, Stone:** Adjust speed based on material density, generally slower to medium speeds.

Experiment with scrap material to find the ideal speed for your specific application and material.

3.2 Usage Techniques

- **Light Pressure:** Apply consistent, light pressure. Excessive force can cause the bit to bind, overheat, or break.
- **Controlled Movement:** Maintain a steady hand and controlled movement. For intricate work, consider using a Dremel workstation or flex shaft for added stability.
- **Cooling:** For prolonged use on metals, allow the bit and workpiece to cool periodically to prevent heat buildup.
- **Direction:** For optimal cutting, move the bit in a direction that allows the flutes to effectively remove material.

3.3 Safety Precautions

- **Eye Protection:** Always wear safety glasses or goggles to protect against flying debris.
- **Respiratory Protection:** Use a dust mask, especially when working with materials that produce fine dust (e.g., wood, stone, ceramics).
- **Hand Protection:** Wear appropriate gloves to protect hands from sharp edges and heat.
- **Workpiece Security:** Secure your workpiece firmly with clamps or a vise to prevent movement during operation.
- **Ventilation:** Work in a well-ventilated area to disperse dust and fumes.

4. MAINTENANCE

Proper maintenance extends the life of your Dremel 9904 Tungsten Carbide Cutter and ensures consistent performance.

- **Cleaning:** After each use, clean the cutter to remove any accumulated debris or material residue. A stiff brush or compressed air can be used. Ensure the tool is disconnected from power before cleaning.
- **Inspection:** Regularly inspect the cutter for signs of wear, damage, or dullness. A dull bit will require more force, generate more heat, and produce poorer results. Replace worn bits promptly.
- **Storage:** Store the cutter in a dry, protected environment to prevent rust and damage to the cutting edges. Keep it in its original packaging or a dedicated accessory case.

5. TROUBLESHOOTING

If you encounter issues while using your Dremel 9904 Tungsten Carbide Cutter, consider the following common problems and solutions:

Problem	Possible Cause	Solution
Bit breaks or chips easily	Excessive pressure; uncontrolled movement (bouncing); incorrect speed for material; bit is brittle by nature.	Apply lighter, consistent pressure. Ensure workpiece is secure. Use appropriate speed. Maintain stable, controlled cuts.
Material melting (plastics)	Speed is too high.	Reduce the rotary tool's speed significantly when working with plastics.
Poor cutting performance / Excessive heat	Bit is dull or worn; incorrect speed; too much pressure.	Replace the bit if dull. Adjust speed according to material. Reduce pressure. Allow bit and workpiece to cool.
Bit slipping in collet	Collet nut not tightened sufficiently; incorrect collet size.	Ensure collet nut is fully tightened with the wrench. Verify you are using the correct 1/8" collet for the bit's shank.

6. SPECIFICATIONS

Key technical specifications for the Dremel 9904 Tungsten Carbide Cutter:

Model Number: 9904

Material: Tungsten Carbide

Grit Type: Extra Coarse

Grit Number: 280

Size: 3/32" (2.4 mm)

Shank Size: 1/8"

Style: Round End Cylinder

Shape: Round

Item Weight: 0.3 Ounces

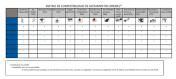

Compatible Materials: Hardened Steel, Stainless Steel, Cast Iron, Nonferrous Metals, Fired Ceramics, Plastics, Hard Woods, Glass, Iron, Metal, Stone.

7. WARRANTY AND SUPPORT

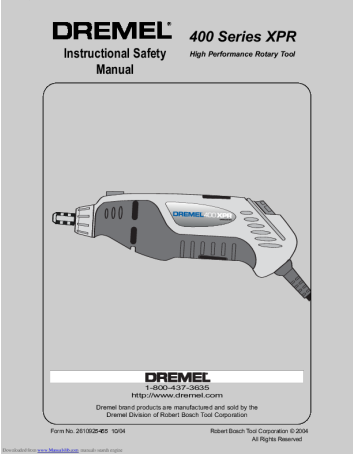

The Dremel 9904 Tungsten Carbide Cutter is covered by a **1 Year Parts and Labor Warranty** from the date of purchase. This warranty covers defects in materials and workmanship under normal use.

For warranty claims, technical assistance, or additional product information, please refer to the official Dremel support channels or visit the Dremel website. Keep your proof of purchase for warranty validation.
