SETUP

This product is an audio CD set. No complex setup is required beyond standard handling and storage practices.

Unpacking

Carefully remove the CD box from its shipping packaging. Inspect the box and individual CD cases for any signs of damage that may have occurred during transit.

Storage

Store the CD set in a cool, dry place away from direct sunlight, high humidity, and extreme temperatures. Proper storage helps prevent warping or damage to the discs and their packaging.

OPERATING INSTRUCTIONS

Playing the Audio CDs

1. Select the desired CD from the collection.
2. Gently open the CD case and remove the disc by pressing the center hub. Avoid touching the playing surface of the disc.
3. Insert the CD into a compatible CD player (e.g., home stereo, car CD player, computer CD/DVD drive) with the label side facing up.
4. Close the CD tray or slot.
5. Use your CD player's controls to select tracks and adjust the volume.

Handling Precautions

- Always hold CDs by their edges or the center hole to avoid fingerprints on the playing surface.
- Do not bend or flex the discs, as this can cause irreparable damage.
- Avoid exposing discs to excessive heat or direct sunlight, which can lead to warping.
- Do not write on the playing surface or apply stickers, as this can affect playback.

MAINTENANCE AND CARE

Cleaning the Discs

If a CD becomes dirty or smudged, clean it gently with a soft, lint-free cloth. Wipe from the center of the disc outwards in a straight line, not in a circular motion. Do not use abrasive cleaners, solvents, or harsh chemicals, as these can damage the disc surface.

Storing Discs

Always return discs to their original cases after use. This protects them from dust, scratches, and other environmental factors that can degrade their quality.

TROUBLESHOOTING

Disc Not Playing

- Ensure the disc is clean and free of visible scratches or smudges.
- Verify the disc is inserted correctly into the CD player, with the label side facing up.
- Check if the CD player is functioning correctly by testing it with other known-good discs.
- If the issue persists, consider cleaning the CD player's lens, following the instructions in your CD player's manual.

Skiping or Stuttering Audio

- Clean the disc thoroughly as described in the Maintenance section.
- Carefully inspect the disc for deep scratches or other physical damage that might interfere with playback.
- Ensure the CD player is placed on a stable, level surface to prevent vibrations from causing skips.
