Shark EP033

Shark EP033 HEPA Filter Instruction Manual

Model: EP033

1. PRODUCT OVERVIEW

The Shark EP033 HEPA Filter is designed for use with the Euro-Pro Shark EP033 handheld vacuum cleaner. This filter is engineered to trap 99.97 percent of airborne impurities, including particles as small as 0.3 microns, significantly improving air quality during vacuum operation. It comes fully assembled for immediate use.

Figure 1: Shark EP033 HEPA Filter. This image shows the compact design and filter material of the replacement HEPA filter.

2. SETUP AND INSTALLATION

- 1. Ensure Compatibility:** Verify that your vacuum cleaner is the Shark EP033 handheld model. This filter is specifically designed for this model.
- 2. Remove Old Filter:** Disconnect the vacuum from its power source. Open the dust cup compartment according to your vacuum's specific instructions and carefully remove the existing filter.

- 3. Insert New Filter:** Position the new Shark EP033 HEPA filter into the dust cup. It is designed to snap easily into place, ensuring a secure fit.
- 4. Close Dust Cup:** Securely close the dust cup compartment. Ensure all latches are engaged to prevent dust leakage during operation.

3. OPERATING INSTRUCTIONS

Once installed, the HEPA filter operates automatically as part of your Shark EP033 handheld vacuum's filtration system. It effectively captures fine dust, allergens, and other microscopic particles from the air as it passes through the vacuum, contributing to a cleaner exhaust and improved indoor air quality.

4. MAINTENANCE AND CLEANING

Regular maintenance of your HEPA filter is crucial for maintaining optimal vacuum performance and filtration efficiency. Follow these steps for cleaning:

- 1. Frequency:** Clean the filter regularly, ideally after each significant use or when emptying the dust cup.
- 2. Removal:** Remove the filter from the dust cup as described in the installation section.
- 3. Cleaning Method:** Gently tap the filter against the inside of a trash can to dislodge accumulated dust and debris. For larger particles, the filter screen can be removed for easier cleaning.
- 4. Reinstallation:** Once cleaned, place the filter back into the dust cup, ensuring it snaps securely into place.

Note: While the filter is designed for repeated cleaning by tapping, its overall lifespan is limited. The manufacturer classifies this filter as "Disposable," indicating it should be replaced periodically to maintain peak performance.

5. TROUBLESHOOTING

- Filter Does Not Fit:**

Ensure you have the correct model filter. This filter is specifically for the Shark EP033 handheld vacuum. Double-check your vacuum's model number.

- Reduced Suction or Dust Leakage:**

A dirty or clogged filter can lead to reduced suction. Clean the filter thoroughly as per the maintenance instructions. If the issue persists, the filter may need replacement. Also, ensure the filter is correctly seated and the dust cup is securely closed to prevent dust leakage.

- Difficulty Cleaning Fine Dust:**

Fine dust can sometimes embed deeply into the HEPA material. While tapping is the primary method, a soft brush can be used gently to dislodge stubborn particles. Consider replacing the filter if cleaning becomes ineffective.

6. SPECIFICATIONS

Brand	Shark
Model	EP033
Filter Type	HEPA
Filtration Efficiency	99.97% of particles down to 0.3 microns
Compatible Devices	Shark EP033 Handheld Vacuum

Reusability	Cleanable (by tapping); Disposable (for eventual replacement)
Number of Pieces	1
Item Weight	0.18 Pounds (approx.)
Manufacturer	SharkNinja
UPC	622356513302
ASIN	B000069BFH

7. WARRANTY AND SUPPORT

Specific warranty information for the Shark EP033 HEPA filter is not provided within this manual. For details regarding warranty coverage, product support, or to purchase replacement filters, please refer to the official SharkNinja website or contact their customer service directly. Keep your purchase receipt for warranty claims.
