

APC RBC23

APC RBC23 Replacement Battery Cartridge User Manual

For Smart-UPS Model SUA1000RM2U and Select Others

1. INTRODUCTION AND OVERVIEW

The APC Replacement Battery Cartridge (RBC23) is specifically engineered to ensure complete compatibility and optimal performance with your APC Uninterruptible Power Supply (UPS) systems, including the Smart-UPS Model SUA1000RM2U. This cartridge contains genuine APC replacement batteries, rigorously tested and approved to restore your UPS to its original operational specifications. Utilizing a Valve Regulated Lead Acid (VRLA) battery technology, the RBC23 provides reliable power backup and is backed by a 2-year manufacturer warranty.

Using genuine APC replacement batteries is crucial for maintaining the performance and warranty support of your APC UPS. Each RBC is certified for compatibility, ensuring seamless integration and reliable power protection.

2. SAFETY INFORMATION

Please read and understand all safety precautions before handling or installing the battery cartridge. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- The RBC23 contains a **Sealed, Non-Spillable Lead Acid Battery**. While sealed, proper handling is essential.
- **Recycling is Mandatory:** Batteries must be recycled. Refer to your local regulations and APC's recycling program for proper disposal. Do not dispose of batteries in general waste.
- **Do Not Charge in Gas Tight Container:** Ensure adequate ventilation if charging outside of the UPS unit.
- **Do Not Short Battery Terminals:** Avoid contact between the positive and negative terminals with conductive materials. This can cause sparks, fire, or explosion.
- **Do Not Incinerate:** Batteries can explode if disposed of in fire.
- **Flush with Water if Contaminated with Electrolyte (Acid):** In case of skin or eye contact with battery fluid, immediately flush the affected area with plenty of water and seek medical attention.
- Always disconnect the UPS from the AC power source and turn it off before performing any battery replacement or maintenance.
- Wear appropriate personal protective equipment (PPE), such as insulated gloves and eye protection, when handling batteries.

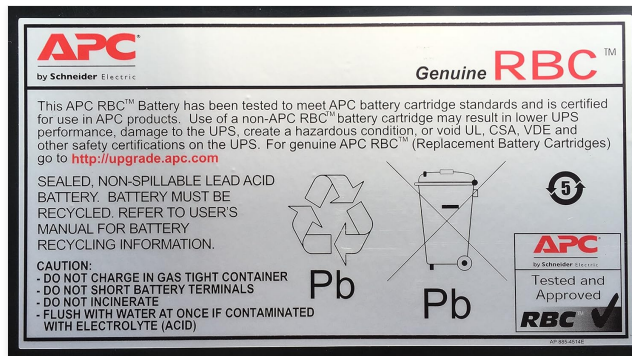

Image: Safety and Recycling Information Label found on APC RBC batteries. This label provides critical warnings regarding handling, disposal, and recycling of the sealed lead-acid battery.

3. PACKAGE CONTENTS

Your APC RBC23 Replacement Battery Cartridge package should contain the following items:

- One (1) Battery Pack with New Batteries Installed
- Reusable Packaging for Recycling Return of your old battery

Image: The APC RBC23 Replacement Battery Cartridge, showing the assembled battery pack ready for installation into a compatible UPS unit.

4. SETUP AND INSTALLATION

This section outlines the general procedure for replacing the battery cartridge in a compatible APC UPS. Always refer to your specific UPS model's user manual for detailed, model-specific instructions and safety warnings.

1. Prepare the UPS:

- Ensure the UPS is turned OFF and disconnected from the AC power outlet.
- Disconnect all connected equipment from the UPS.
- Allow the UPS to cool down if it has been operating under load.

2. Locate the Battery Compartment:

- Identify the battery access panel on your UPS unit. This is typically located on the front or side.

- Remove any screws or latches securing the panel.

3. Remove the Old Battery Cartridge:

- Carefully slide the old battery cartridge out of the compartment. It may be heavy.
- Disconnect the battery connector(s) from the UPS. Note the orientation of the connector for re-installation.

4. Install the New Battery Cartridge:

- Connect the new RBC23 battery cartridge to the UPS battery connector(s), ensuring a secure fit and correct polarity.
- Carefully slide the new RBC23 into the battery compartment until it is fully seated.
- Secure the battery access panel.

5. Reconnect and Power On:

- Reconnect the UPS to the AC power outlet.
- Reconnect your equipment to the UPS.
- Turn on the UPS. The UPS may perform a self-test and indicate battery status. Allow the new battery to charge for at least 24 hours before relying on it for full runtime.

Important: Utilize the reusable packaging from your new RBC23 to return your old battery for recycling. APC offers a free "RBC Recycling Program" on their website, which includes free return shipping to a recycling center.

5. OPERATION (POST-INSTALLATION)

After installing the RBC23, your UPS will automatically detect the new battery. It is recommended to allow the UPS to charge the new battery for a minimum of 24 hours to ensure it reaches its full capacity. During this initial charge period, the UPS will still provide surge protection and limited battery backup, but optimal runtime will only be achieved after a full charge cycle.

The UPS's display or indicator lights will typically show the battery charge status. Refer to your UPS model's manual for specific indicators and battery management features.

6. MAINTENANCE

The APC RBC23 is a sealed, maintenance-free battery. However, proper care of your UPS system will extend the life of the battery and the unit:

- **Environmental Conditions:** Store and operate the UPS in a cool, dry environment, away from direct sunlight and excessive heat. Extreme temperatures can shorten battery life.
- **Regular Self-Tests:** Most APC UPS units perform automatic self-tests. Ensure this feature is enabled to monitor battery health.
- **Battery Replacement:** Replace the battery cartridge when the UPS indicates a battery fault or when the battery no longer provides adequate runtime. The typical lifespan of a UPS battery is 3-5 years, but this can vary based on usage and environmental factors.
- **Recycling:** Always recycle old batteries responsibly through designated recycling programs.

7. TROUBLESHOOTING

If you encounter issues after replacing your RBC23, consider the following common troubleshooting steps:

- **UPS Not Recognizing New Battery:**

- Ensure the battery connector is fully and correctly seated.
- Verify the battery cartridge is fully inserted into the compartment.
- Perform a manual self-test on the UPS (refer to your UPS manual for instructions).
- Allow the battery to charge for several hours; sometimes recognition takes time.

- **Short Runtime After Replacement:**

- The new battery requires a full charge cycle (at least 24 hours) to reach optimal capacity.
- Ensure the UPS is not overloaded.
- Verify the RBC23 is the correct replacement battery for your specific UPS model.

- **Battery Warning Light Still On:**

- After installation and charging, if the warning persists, try resetting the UPS (unplug from wall, hold power button for 5 seconds, plug back in).
- Consult your UPS user manual for specific error codes or indicators.

For more complex issues or if problems persist, refer to your specific UPS model's user manual or contact APC technical support.

8. SPECIFICATIONS

Model Number	RBC23
Product Dimensions	13.5 x 8.5 x 3.26 inches (Cartridge)
Item Weight	26 pounds
Battery Cell Composition	Sealed Lead Acid (VRLA)
Voltage	240 Volts (UPS system voltage, not individual battery cells)
Compatibility	APC Smart-UPS Model SUA1000RM2U and select other APC UPS models.

9. WARRANTY AND SUPPORT

Warranty: Genuine APC Replacement Battery Cartridges (RBCs) are backed by a **2-year Manufacturer Warranty**. This warranty covers defects in materials and workmanship under normal use.

Support: For technical assistance, warranty claims, or information regarding the RBC Recycling Program, please visit the official APC website or contact APC customer support. Ensure you have your UPS model number and the RBC23 serial number available when contacting support.

LITHIUM-ION

Features

Based on the standard LiFePO₄ system, they present the state-of-the-art of a UPS system. Because of our 100% quality control, devices have passed both a 24-hour operation check, as well as having power even during a blackout.

Specifications

Standard type	Regenerative (LiFePO ₄ / 24V/50VA)
Battery type	Maintenance-free, high-purity, distilled Lead Acid battery, Best high-current ability for UPS units
Capacity	300VA/150Ah (min.)
Discharge (L40H)	10-40 Hz
Voltage	13.6-15.5 V
Weight	2 years (3 years optional)
Warranty	3 years
Accessories	Control battery software
Dimensions (mm)	190 x 210 x 140 (mm) (incl. installation bracket)

Best components for high accessible performance

Two 50 VA, class A-weight high quality lead and corrosion resistant sealed lead elements

Performance guarantee, fastest

Best price guarantee with maximum delivery time

Rechargeable electrolyte

Discharge protection with automatic recharging

Advanced battery voltage

Optional automatic recharging for high capacity and self-healing

High capacity battery

- ✓ 2 years warranty
- 24 months, warranty period of the usual 12 months

Fast delivery

✓ Inward and fast shipping with UPS/EMS

Easy disposal

✓ Pick-up and recycling of old batteries possible

Technical support

Service technicians are available to consult any time

Safety

Transport

Li-ion battery boxes have to be shipped according to the current regulations

Product End-of-Life Instructions

Product Range: Replacement Battery Cartridges (RBCs)

Marketing ModelName: (List of multiple models if applicable)

[illegible]

Purpose:
The product family must be disposed according to the legislation of the country. This document is intended to be used by end-of-life recyclers or treatment facilities. It provides the basic information to assure an appropriate end-of-life treatment for the components and materials of the product.

Note :
This product range is in the scope of EU directive 2006/66/EC of 26 September 2006 (Battery Directive). This product is not in the scope of EU directive 2002/96/EC, Waste Electrical and Electronic Equipment (WEEE). However, this product range may be subject to the WEEE directive if the product is contained within another product, such as an electronic device, power supply, etc. that is subject to the WEEE directive.

REACH Project
Dear Customer,

Schneider Electric SE and its affiliates (Schneider Electric) has undertaken since 2008 to comply with the Reach Regulation N° 1907/2006 on the restriction of Substances of Very High Concern (hereafter referred to as SVHC), authorization (Annex XIV) and restriction of Substances of Very High Concern (Annex XVII) of the REACH regulation, by first identifying the presence of our knowledge and in the case of publication of information regarding the presence of SVHC in Schneider Electric products.

This information will allow you to make a decision on the proposed knowledge resulting from both additional information provided by our suppliers and our own investigations.

Moreover, Schneider Electric has taken into account the judgement of the EU Court of Justice of 10 September 2017 in [Case C-380/14](#) and is currently investigating what needs to be done to implement the judgement as soon as possible.

In accordance with its environmental strategy, Schneider Electric and its affiliates have decided to apply REACH Regulation on a worldwide basis.

In accordance with the Environment policy of our Company, we continuously work towards products and services which reduce the environmental impact of our business both internally and for our external partners and we continue to add to the documentation provided by Schneider Electric. With this objective, Schneider Electric is pleased to be included as soon as possible as responsible of confidentially specific focus on our REACH/Annex XIV requirement before the formal date.

At the end, we wish to give appropriate notice and specifying products, in case of problem to make the legal aspect of REACH, please note that this document is not a legal declaration. To access to the CE declaration, please refer to the [Customer Guide](#).

Best Regards,

Yves FINKHOFF
VP Environment

Andreas

REACH Project
Dear Customer,

Schneider Electric SE and its affiliates (Schneider Electric) undertake herein to comply with the Reach regulation in the form of Substances of Very High Concern (hereafter referred to as SVHC), authorization (SVHC IV) and restriction (SVHC II).

As of January 25th of the reach regulation, you will find attached herewith information, to the best of our knowledge and of the date of publication of this information, regarding the presence of SVHC in Schneider Electric Products.

This information will evolve over time in function of the improved knowledge resulting from both additional information provided by our suppliers and our own investigations.

Moreover, Schneider Electric has taken into account the judgment of the EU Court of Justice of 10 September 2015 in [Case C-383/14](#) and is currently investigating what needs to be done to implement this decision as soon as possible.

In accordance with its environmental statement, Schneider Electric and its affiliates will develop and apply REACH regulation on a worldwide basis.

In accordance with the Endorsed policy of your company, we continuously work towards products and services which reduce the environmental impact of our products and services for their intended purposes and in compliance with the documentation provided by Schneider Electric. With this objective, Schneider Electric wishes to acknowledge an action as soon as possible regardless of concern with a specific focus on the REACH Annex 17 requirement before their normal date.

At the end, we wish to give appropriate advice and recycling programs. In case of problem is made the legal aspect of PFRT, please note that this document is not the CE declaration. To access to the CE declaration, please refer to the [Customer Guide](#).
