# KRUPS F088 Water Filter Instruction Manual

Model: F088 (8000003687)

[Introduction](#)   [Product Overview](#)   [Setup](#)   [Maintenance](#)   [Troubleshooting](#)   [Specifications](#)   [Warranty & Support](#)

## 1. INTRODUCTION

This manual provides instructions for the proper use and maintenance of your KRUPS F088 Water Filtration Cartridge. This filter is designed to enhance the quality of water used in compatible KRUPS espresso and fully automatic coffee machines, contributing to optimal beverage taste and extending the lifespan of your appliance.

## 2. PRODUCT OVERVIEW

The KRUPS F088 Water Filtration Cartridge is an essential component for maintaining the performance of your espresso or coffee machine. It features an anti-scale substance and active carbon, which work together to reduce various impurities in your water supply.

### 2.1 Key Benefits

- **Reduces Limescale and Mineral Deposits:** Helps prevent the buildup of scale within your machine, which can affect performance and longevity.
- **Improves Water Quality:** Active carbon reduces chlorine, impurities, lead, copper, and pesticides.
- **Preserves Essential Minerals:** While filtering harmful substances, beneficial minerals and trace elements in the water are retained.
- **Prolongs Machine Life:** By reducing scale and impurities, the filter helps protect internal components of your coffee machine.

### 2.2 Compatible Machines

This filter is designed for use with KRUPS Precise Tamp espresso machines and fully automatic machines,

including models such as:

- XP5220
- XP5240
- XP5280
- XP5620
- EA82 series
- EA9000 series

### **3. SETUP AND INSTALLATION**

Follow these steps to install the KRUPS F088 Water Filter into your compatible espresso or fully automatic coffee machine. Refer to your machine's specific instruction manual for detailed guidance on accessing the water tank and filter housing.

1. **Prepare the Filter:** Remove the new KRUPS F088 Water Filter from its packaging. It is recommended to rinse the filter under cold running water for a few seconds to remove any loose carbon particles.
2. **Access Water Tank:** Turn off and unplug your coffee machine. Carefully remove the water tank from your machine.
3. **Remove Old Filter (if applicable):** If an old filter is present, unscrew or unclip it from its housing in the water tank. Dispose of the old filter responsibly.
4. **Install New Filter:** Insert the new KRUPS F088 Water Filter into the designated filter housing within the water tank. Twist or push firmly until it is securely in place. No special tools are required for this step; hand-tightening is sufficient.
5. **Fill Water Tank:** Fill the water tank with fresh, cold water up to the maximum fill line.
6. **Reinsert Water Tank:** Place the water tank back into your coffee machine, ensuring it is properly seated.
7. **Prime the System:** Follow your coffee machine's instructions for priming the water system after a filter change. This usually involves running a few cycles of hot water without coffee to flush the system and activate the filter.

Image 3.1: The KRUPS F088 Water Filter shown in its original retail packaging. The packaging indicates it is an Aqua Filter System F088.

## 4. OPERATION

Once installed and primed, the KRUPS F088 Water Filter operates continuously to filter the water used by your coffee machine. It requires no direct user interaction during normal operation. The filter works by passing water through its active carbon and anti-scale media before it reaches the brewing system. Ensure your coffee machine's water tank always contains sufficient water for operation. The filter's effectiveness is maintained as long as water flows through it.

## 5. MAINTENANCE

Regular replacement of the water filter is crucial for optimal performance and to ensure the longevity of your coffee machine.

### 5.1 Filter Replacement Schedule

It is recommended to change the KRUPS F088 Water Filtration Cartridge at least every two months. This timeframe may vary depending on your local water hardness and frequency of machine use. Some KRUPS machines may also indicate when a filter change is due.

## 5.2 Replacement Procedure

To replace the filter, follow the same steps outlined in the "3. Setup and Installation" section, starting with removing the old filter and installing a new one.

## 6. TROUBLESHOOTING

If you experience issues related to water quality or machine performance after installing the filter, consider the following:

- **Poor Water Flow:** Ensure the filter is correctly seated and not obstructing water flow. Re-install the filter if necessary.
- **Unusual Taste/Odor:** If a new filter has an unusual taste, ensure it was rinsed thoroughly before installation and that the system was primed. Run several cycles of plain water through the machine.
- **Scale Buildup Persists:** If scale continues to build up rapidly, your water may be exceptionally hard, or the filter may need more frequent replacement. Ensure you are using a genuine KRUPS F088 filter.
- **Machine Error Messages:** If your machine displays an error related to the water system, consult your coffee machine's specific manual. Ensure the filter is compatible with your model.

For persistent issues, contact KRUPS customer support or refer to your coffee machine's comprehensive troubleshooting guide.

## 7. SPECIFICATIONS

Feature	Detail
<b>Brand</b>	KRUPS
<b>Model Number</b>	F088 (8000003687)
<b>Material</b>	Carbon
<b>Product Benefits</b>	Reduces limescale and mineral deposits, improves water quality, prolongs machine life
<b>Item Weight</b>	40 Grams (1.41 ounces)
<b>Product Dimensions</b>	4 x 1.5 x 4 inches
<b>External Testing Certification</b>	CE
<b>Recommended Replacement</b>	Every two months

## 8. WARRANTY AND SUPPORT

For information regarding the warranty of your KRUPS F088 Water Filter or for technical support, please refer to the official KRUPS website or contact KRUPS customer service directly. Keep your purchase receipt as proof of purchase.
