# Instruction Manual

The Club 2100 Truck/SUV Club Steering Wheel Lock

Model: 2100 | Brand: Winner International

## 1. INTRODUCTION

---

The Club 2100 Truck/SUV Club Steering Wheel Lock is a robust anti-theft device designed to provide a strong visual and physical deterrent against vehicle theft. Manufactured by Winner International, this device is engineered for enhanced security in larger vehicles such as trucks and SUVs.

Key features include:

- Patented self-locking mechanism for quick application.
- Extended shaft length for secure fit on large truck and SUV steering wheels.
- High-security lock with laser-encrypted keys, preventing unauthorized duplication.
- Designed to resist common theft methods such as sawing, prying, hammering, and freon attacks.
- Quad-style key for enhanced protection against lock picking.

Figure 1: The Club 2100 Truck/SUV Club Steering Wheel Lock. This image displays the red-colored steering wheel lock, featuring its two hooks, the central locking mechanism, and the extended shaft with a black grip at the end.

## 2. SETUP AND INSTALLATION

---

To install The Club 2100 Steering Wheel Lock:

1. Ensure your vehicle's steering wheel is in a straight-ahead position and the engine is off.
2. Extend The Club by pulling the two ends apart.
3. Place one hook of The Club over the steering wheel rim.
4. Compress The Club until the second hook securely grips the opposite side of the steering wheel rim. The patented self-locking feature will engage with a single pull, securing the device without needing the key at this stage.
5. Ensure The Club is firmly attached and cannot be easily removed or rotated without unlocking. For enhanced security, position the lock mechanism facing away from the driver, towards the windshield.

The extended length of this model is specifically designed to accommodate the larger steering wheels found in trucks and SUVs, providing a snug and secure fit.

## 3. OPERATING INSTRUCTIONS

---

### 3.1. Locking The Club

Once The Club is positioned on the steering wheel as described in the Setup section, simply pull the two ends together until the self-locking mechanism clicks into place. No key is required for locking. Verify that the device is securely fastened and prevents the steering wheel from being turned.

### 3.2. Unlocking The Club

To unlock The Club:

1. Insert one of the provided laser-encrypted keys into the lock cylinder.
2. Turn the key to disengage the locking mechanism.

3. Once unlocked, The Club can be expanded and removed from the steering wheel.
4. Store The Club in a safe and convenient location within your vehicle when not in use.

**Important:** The Club 2100 comes with three unique, laser-encrypted keys. These keys cannot be duplicated. Keep your keys in a secure location and consider having a spare readily accessible.

## 4. MAINTENANCE

The Club 2100 is constructed from durable alloy steel and requires minimal maintenance to ensure its longevity and effective operation.

- **Cleaning:** Wipe the device periodically with a clean, damp cloth to remove dust and grime. Avoid using harsh chemicals or abrasive cleaners, which could damage the finish.
- **Lubrication:** If the lock mechanism or the sliding shaft becomes stiff, apply a small amount of graphite lubricant or a silicone-based spray lubricant to the keyhole and along the sliding parts. Do not use oil-based lubricants as they can attract dirt.
- **Key Care:** Handle the keys with care. Avoid bending or damaging them, as they are unique and cannot be duplicated. Store them away from extreme temperatures or corrosive substances.
- **Storage:** When not in use, store The Club in a dry place to prevent rust or corrosion, although its alloy steel construction offers significant resistance.

## 5. TROUBLESHOOTING

Problem	Possible Cause	Solution
Key does not turn in lock.	Debris in lock cylinder, worn key, or internal mechanism issue.	Try another key if available. Apply graphite lubricant to the keyhole and gently try to turn the key. If the problem persists, the lock may be damaged.
The Club is difficult to expand or compress.	Dirt or friction on the sliding shaft.	Clean the shaft and apply a silicone-based spray lubricant to the sliding surfaces.
The Club expands unexpectedly after removal.	The self-locking mechanism may have re-engaged.	This is a characteristic of the self-locking feature. Simply re-insert the key and unlock it to compress for storage. Consider using a strap or band to keep it compressed if desired for storage.
The Club does not fit securely on the steering wheel.	Incorrect positioning or not fully compressed.	Ensure both hooks are fully engaged with the steering wheel rim and the device is compressed until the self-locking mechanism clicks. This model is designed for larger truck/SUV steering wheels.

## 6. SPECIFICATIONS

Feature	Detail
Model Name	TRUCK CLUB SUV

Feature	Detail
---------	--------

<b>Model Number</b>	2100
<b>Brand</b>	Winner International
<b>Color</b>	Red

## 7. WARRANTY AND SUPPORT

---

### 7.1. Product Warranty

The Club 2100 is guaranteed for one year from the date of purchase. This guarantee covers up to \$2000 against the owner's comprehensive insurance deductible in the event of vehicle theft while The Club is properly installed. Please note that this guarantee is not valid in New York, Hawaii, Texas, or Wisconsin, where it is prohibited by insurance law. To activate the warranty, it is typically required to submit warranty paperwork within 30 days of purchase. Refer to the documentation included with your product for specific instructions on warranty registration.

### 7.2. Customer Support

For further assistance, inquiries, or to report issues, please contact Winner International customer support. Contact information can typically be found on the product packaging or the manufacturer's official website.

**Manufacturer:** Winner International

For the most current support information, please visit the official Winner International website or refer to the contact details provided with your purchase.
