# 3. GAMEPLAY AND CONTROLS

---

## Basic Gameplay

Crimson Sea features fast-paced action where you control Sho, a mercenary tasked with combating alien threats. Missions involve navigating various environments, eliminating large numbers of enemies, and completing objectives. The game emphasizes quick reflexes and strategic use of weapons and powers.

## Weapon System

The game offers a detailed and customizable weapon system. You can acquire and combine three types of weapon parts: barrels, effectors, and generators. These parts influence your gun's firing mode (e.g., machine gun, bazooka, guided missiles), energy consumption, and special bonuses. Experiment with different combinations to find the most effective setup for various enemy types and situations.

## Neo-Psionic Powers

In addition to firearms, Sho can utilize powerful Neo-Psionic abilities. These powers range from super-strong attacks and wide-area damage to healing and defensive shields. Neo-Psionic powers can be acquired and upgraded, becoming more potent and energy-efficient with continued use. Strategic deployment of these powers is crucial for overcoming overwhelming odds.

## Controls

Movement is typically controlled using the left analog stick. The right analog stick or face buttons are used for camera control and aiming. Basic actions include:

- **Movement:** Walk, run, dash, and strafe to navigate environments and evade enemy attacks.
- **Ranged Attack:** Fire your equipped weapon at the nearest enemy within your line of sight.
- **Melee Attack:** Engage enemies in close quarters with a beam sword, often allowing for multi-hit combos.
- **Neo-Psionic Activation:** Use designated buttons to activate your learned Neo-Psionic abilities.
- **Jump:** Perform jumps to traverse obstacles or gain tactical positions.

Refer to the in-game control scheme for a detailed button layout and advanced maneuvers.

## Saving Progress

Game progress is saved to an Xbox Memory Unit. Ensure a Memory Unit with sufficient free blocks is inserted into your console. The game will typically prompt you to save at designated checkpoints or after completing missions.
