

## 3M 2110NA

# 3M Transparent Weather Sealing Tape

Model: 2110NA | Brand: 3M

## 1. PRODUCT OVERVIEW

---

The 3M Transparent Weather Sealing Tape is designed to provide a practical and effective solution for sealing interior windows and doors. This crystal-clear tape helps prevent drafts and moisture, contributing to improved energy efficiency in your home. It measures 1.5 inches wide by 30 feet long, offering sufficient material for various sealing applications.

The tape features a specially formulated adhesive that ensures strong adhesion while allowing for clean removal without leaving residue or damaging surfaces. Its transparent nature maintains natural light and visibility, making it suitable for seasonal use or in rental properties.

## 2. SAFETY INFORMATION

---

Please read and understand all instructions before using this product. Keep out of reach of children. This product is intended for indoor use only. Do not apply to surfaces that are wet, dirty, or have loose paint/finishes, as this may affect adhesion or cause damage upon removal. If irritation occurs, discontinue use and consult a medical professional.

## 3. PACKAGE CONTENTS

---

- One (1) roll of 3M Transparent Weather Sealing Tape (1.5 inches x 30 feet)

## 4. SETUP AND INSTALLATION

---

Follow these steps for optimal application and performance:

1. **Surface Preparation:** Ensure the application surface (window frame, door edge, etc.) is clean, dry, and free of dust, dirt, grease, or loose paint. For best results, clean the surface with rubbing alcohol

and allow it to dry completely.

2. **Measure and Cut:** Unroll a section of tape and measure the length required for the area you intend to seal. Cut the tape to the appropriate length using scissors or a utility knife.
3. **Apply Tape:** Carefully peel back a small portion of the tape's liner to expose the adhesive. Align the tape along the seam or gap you wish to seal. Press the tape firmly onto the surface, working slowly to avoid air bubbles. Continue peeling the liner and pressing the tape until the entire length is applied. The tape is flexible and conforms to angles and curves.
4. **Secure the Seal:** Once applied, press along the entire length of the tape with your fingers or a smooth tool to ensure a strong, uniform bond.

## 5. OPERATING INSTRUCTIONS

---

Once applied, the 3M Transparent Weather Sealing Tape creates an invisible barrier that helps maintain indoor temperatures by blocking drafts and preventing air leakage. No further operation is required after proper installation. The tape is designed to remain effective through indoor humidity and temperature changes.

## 6. MAINTENANCE

---

The tape is designed for durability and resistance to yellowing, cracking, or degradation over time under normal indoor conditions. No specific maintenance is required during its use.

### Removal

When it's time to remove the tape, lift a tape edge and slowly pull the tape back on itself. The specially formulated adhesive allows for clean removal without residue. If any adhesive residue remains, use rubbing alcohol to gently wipe it away from the surface.

#### Note for seasonal use:

- Tape may lift off cracked or peeling coatings when removed. Test in an inconspicuous area first.

## 7. TROUBLESHOOTING

---

- **Tape not sticking:** Ensure the surface is clean, dry, and free of debris. Re-clean the surface with rubbing alcohol and reapply.

- **Air bubbles under tape:** When applying, press firmly and smoothly from one end to the other to minimize air bubbles. If bubbles occur, gently lift the tape and reapply, or use a smooth tool to push the air out towards the edges.
- **Residue after removal:** Use rubbing alcohol to clean any remaining adhesive residue.

## 8. SPECIFICATIONS

---

<b>Brand</b>	3M
<b>Model Number</b>	2110NA
<b>Color</b>	Transparent
<b>Material</b>	Plastic
<b>Dimensions</b>	1.5 inches (width) x 30 feet (length)
<b>Recommended Use</b>	Indoor
<b>Water Resistance Level</b>	Water Resistant
<b>Item Weight</b>	2.39 ounces
