3. OPERATING THE HUB

The Targus PAUH216U hub is designed for simple operation:

- **Connecting Devices:** Insert the USB connector of your peripheral device (e.g., mouse, keyboard, flash drive, printer) into any of the four available USB ports on the hub.
- **Simultaneous Use:** All four ports can be used simultaneously to connect and operate multiple devices.
- **Power:** The hub is bus-powered, meaning it draws power directly from your computer's USB port. No external power adapter is typically required for standard USB devices.
- **Disconnection:** To safely remove a device, follow your operating system's guidelines for 'Safely Remove Hardware' if applicable, then simply unplug the device from the hub.

4. MAINTENANCE AND CARE

To ensure the longevity and optimal performance of your Targus USB Hub, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the hub. Avoid using liquid cleaners or abrasive materials, as they may damage the surface.
- **Storage:** When not in use, store the hub in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Avoid dropping the hub or subjecting it to strong impacts. Do not attempt to disassemble the device.
- **Cable Care:** Do not bend or crimp the integrated USB cable excessively. This can damage the internal wiring.

5. TROUBLESHOOTING

If you encounter issues with your Targus USB Hub, try the following troubleshooting steps:

- **Device Not Recognized:**
 - Ensure the hub's USB cable is securely connected to your computer's USB port.
 - Try connecting the hub to a different USB port on your computer.
 - Ensure the device you are connecting to the hub is functioning correctly by plugging it directly into your

computer's USB port.

- Restart your computer.

- **Insufficient Power:** Some high-power consumption devices (e.g., external hard drives) may require more power than a bus-powered hub can provide. If a device is not functioning, try connecting it directly to your computer's USB port or consider a powered USB hub if you frequently use such devices.
- **Slow Data Transfer:** Ensure both the hub and your connected devices are USB 2.0 compatible for optimal speeds. If using a USB 1.1 port on your computer, speeds will be limited to USB 1.1.
