

Behringer MX882

Behringer Ultralink Pro MX882 Ultra-Flexible 8-Channel Splitter/Mixer Instruction Manual

Model: MX882

1. INTRODUCTION

The Behringer Ultralink Pro MX882 is an ultra-flexible 8-channel splitter/mixer designed for professional audio applications. This versatile device offers multiple operational modes to suit various studio and live sound requirements.

Key functionalities include:

- **8-Input/2-Output Line Mixer:** Combine up to eight audio signals into two main outputs.
- **2-Input/8-Output Line Splitter:** Distribute two input signals to up to eight separate outputs.
- **6-Input/6-Output Level Matching Amplifier:** Convert levels between -10 dBV and +4 dBu, or function as a direct inject box.
- Each channel can operate independently in either mixer or splitter mode, providing exceptional flexibility.
- Features an extremely wide bandwidth from 5 Hz to 200 kHz for high audio fidelity.

2. SAFETY INSTRUCTIONS

Please read and follow all safety instructions before operating the Behringer Ultralink Pro MX882. Retain this manual for future reference.

- **Power Source:** Connect the unit only to the specified power supply voltage. Ensure the power cord is undamaged.
- **Moisture:** Do not expose the unit to rain or moisture. Avoid placing liquid-filled objects on the unit.
- **Ventilation:** Ensure adequate ventilation. Do not block ventilation openings.
- **Heat:** Do not place near heat sources such as radiators, heat registers, stoves, or other apparatus that produce heat.
- **Servicing:** Do not attempt to service this unit yourself. Refer all servicing to qualified service personnel.
- **Cleaning:** Clean only with a dry cloth.

3. PACKAGE CONTENTS

Verify that your package contains the following items:

- Behringer Ultralink Pro MX882 Ultra-Flexible 8-Channel Splitter/Mixer Unit
- Power Cable

- Instruction Manual (this document)

If any items are missing or damaged, please contact your dealer immediately.

4. PRODUCT OVERVIEW

The Behringer Ultralink Pro MX882 features a robust 1U rack-mountable chassis with clearly labeled controls and connections for intuitive operation.

4.1. Front Panel

The front panel provides access to all primary controls and indicators for each channel, as well as the main input/output sections.

Figure 4.1: Front view of the Behringer Ultralink Pro MX882. This image displays the full front panel with all controls and LED indicators.

Figure 4.2: Detailed view of the front panel controls for the Behringer Ultralink Pro MX882. This close-up shows the MAIN INPUT LEVEL, MAIN LINK, MAIN OUTPUT LEVEL, SPLIT/MIX switch, LEVEL, and LEFT/RIGHT BALANCE/PAN controls, along with their respective LED meters.

- **MAIN INPUT LEVEL (dB):** Controls the input level for the main stereo input.
- **MAIN LINK:** Button to link channels for stereo operation.
- **MAIN OUTPUT LEVEL (dB):** Controls the output level for the main stereo output.
- **SPLIT/MIX Switch:** Determines whether the individual channel operates in splitter or mixer mode.
- **LEVEL:** Adjusts the input/output level for individual channels.
- **LEFT/RIGHT BALANCE/PAN:** Controls the balance (in splitter mode) or pan (in mixer mode) for individual channels.
- **LED Meters:** Provide visual indication of input and output signal levels.
- **POWER Switch:** Turns the unit on or off.

4.2. Rear Panel

The rear panel houses all audio input and output connections, as well as the power inlet.

Figure 4.3: Combined front and rear view of the Behringer Ultralink Pro MX882. This image provides an overview of both the control surface and the connection panel.

Figure 4.4: Detailed view of the rear panel connections for the Behringer Ultralink Pro MX882. This close-up shows the AC power inlet, XLR inputs and outputs, and 1/4-inch TRS inputs and outputs.

- **AC Power Inlet:** For connecting the included power cable.
- **XLR Inputs/Outputs:** Balanced connections for professional audio equipment.
- **1/4-inch TRS Inputs/Outputs:** Balanced/unbalanced connections for various audio devices.

5. SETUP

Follow these steps to set up your Ultralink Pro MX882:

1. **Rack Mounting:** If desired, mount the MX882 into a standard 19-inch equipment rack using appropriate rack screws. Ensure sufficient space for ventilation.
2. **Power Connection:** Connect the supplied AC power cable to the power inlet on the rear panel and then to a suitable power outlet. Do not power on the unit yet.
3. **Audio Connections:** Connect your audio sources (e.g., mixers, instruments, playback devices) to the desired input channels on the rear panel using XLR or 1/4-inch TRS cables. Connect your audio destinations (e.g., amplifiers, recording interfaces, other mixers) to the corresponding output channels.
4. **Initial Settings:** Ensure all LEVEL controls on the front panel are set to their minimum position.
5. **Power On:** Turn on the MX882 using the POWER switch on the front panel.
6. **System Power Up:** Power on your connected audio equipment, typically starting with sources and

ending with amplifiers/monitors.

6. OPERATING MODES

The MX882 offers flexible operation as either a mixer or a splitter, with each channel configurable independently.

6.1. Mixer Mode (8 In / 2 Out)

In mixer mode, the MX882 combines up to eight mono input signals into a stereo output. This is ideal for sub-mixing multiple sources before sending them to a main mixer or recording device.

- Set the **SPLIT/MIX** switch for each desired channel to the 'MIXER' position.
- Connect your mono audio sources to the individual channel inputs (CH 1 IN to CH 8 IN) on the rear panel.
- Adjust the **LEVEL** control for each channel to achieve the desired input gain.
- Use the **LEFT/RIGHT BALANCE/PAN** control to position each channel within the stereo field.
- The combined stereo signal will be available at the MAIN OUT L and MAIN OUT R connections. Adjust the **MAIN OUTPUT LEVEL** as needed.

6.2. Splitter Mode (2 In / 8 Out)

In splitter mode, the MX882 takes a stereo input signal and distributes it to up to eight individual mono outputs. This is useful for sending a main mix to multiple amplifiers, recording devices, or monitor systems.

- Set the **SPLIT/MIX** switch for each desired channel to the 'SPLITTER' position.
- Connect your stereo audio source to the MAIN IN L and MAIN IN R connections on the rear panel.
- Adjust the **MAIN INPUT LEVEL** to set the overall input gain.
- Each channel's output (CH 1 OUT to CH 8 OUT) will receive a mono sum of the main stereo input.
- Use the **LEVEL** control for each channel to adjust its individual output level.
- The **LEFT/RIGHT BALANCE/PAN** control in splitter mode allows you to select whether the channel receives the left, right, or a sum of both main inputs.

6.3. Level Matching Amplifier / DI Box (6 In / 6 Out)

The MX882 can also function as a level matching amplifier or a direct inject (DI) box, converting signal levels between -10 dBV (consumer level) and +4 dBu (professional level).

- This functionality is inherent in the design, allowing you to connect devices with different nominal operating levels without signal degradation.
- By using individual channels, you can convert unbalanced signals to balanced, or vice-versa, and adjust levels precisely.

7. MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your MX882.

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the unit. Avoid abrasive cleaners or solvents.
- **Ventilation:** Ensure that the ventilation openings are free from dust and debris.
- **Connections:** Periodically check all cable connections for secure fit and signs of wear.
- **Storage:** If storing the unit for an extended period, disconnect it from power and store in a dry, dust-free environment.

8. TROUBLESHOOTING

If you encounter issues with your MX882, refer to the following common troubleshooting steps:

- **No Power:**
 - Check if the power cable is securely connected to both the unit and the power outlet.
 - Ensure the power outlet is functional.
 - Verify the POWER switch on the front panel is in the 'ON' position.
- **No Sound Output:**
 - Check all audio cable connections.
 - Ensure the **LEVEL** controls for the relevant channels and main outputs are not set to minimum.
 - Verify the **SPLIT/MIX** switches are set correctly for your desired operation (mixer or splitter).
 - Check the input and output levels of connected external equipment.
 - Observe the LED meters for signal presence.
- **Distorted Sound:**
 - Reduce the **LEVEL** controls on the MX882 and/or the output levels of your source equipment to prevent clipping (indicated by red LEDs).
 - Ensure all cables are in good condition and correctly connected.
- **Hum or Noise:**
 - Ensure all connections are balanced where possible (using XLR or TRS cables).
 - Check for ground loops. Try connecting all audio equipment to the same power strip.
 - Keep audio cables away from power cables.

If the issue persists, contact Behringer customer support or a qualified service technician.

9. SPECIFICATIONS

Technical specifications for the Behringer Ultralink Pro MX882:

Feature	Specification
Item Model Number	MX882
Item Weight	5.25 pounds
Product Dimensions	19.02 x 1.75 x 8.54 inches
Voltage	230 Volts (AC)
Wattage	35 watts
Number of Channels	8
Connectivity Technology	Standard Analog Audio Connectivity
Frequency Response	5 Hz to 200 kHz

10. WARRANTY AND SUPPORT

For detailed warranty information and technical support, please refer to the official Behringer website or contact your local Behringer distributor. Keep your purchase receipt as proof of purchase for any warranty claims.

Online Resources: For additional information, FAQs, and software/firmware updates, visit the official Behringer website: www.behringer.com
