Carrera 71590 Electronic Lap Counter User Manual

For use with GO 1/43 and Evolution 1/32 Slot Car Race Tracks

1. INTRODUCTION

This manual provides comprehensive instructions for the setup, operation, and maintenance of your Carrera 71590 Electronic Lap Counter. Designed for use with Carrera GO 1/43 and Evolution 1/32 slot car race tracks, this device enhances your racing experience by accurately tracking laps and race times for two lanes.

2. SAFETY INFORMATION

- Keep the device away from water and excessive moisture.
- Do not attempt to disassemble or modify the unit. This may void the warranty and cause damage.
- Use only the specified battery type (4 AA batteries). Ensure correct polarity when inserting batteries.
- This product is recommended for ages 8 years and up. Adult supervision is advised for younger users.
- Dispose of batteries responsibly according to local regulations.

3. PACKAGE CONTENTS

Verify that all components are present in the package:

- 1 x Carrera 71590 Electronic Lap Counter Unit
- Instruction Manual (this document)

Note: Slot cars and track sections are sold separately and are not included with this lap counter.

4. SETUP

4.1 Battery Installation

The Carrera 71590 Electronic Lap Counter requires 4 AA batteries (not included).

1. Locate the battery compartment on the underside of the lap counter unit.

2. Open the battery compartment cover.
3. Insert 4 AA batteries, ensuring correct polarity (+/-) as indicated inside the compartment.
4. Close the battery compartment cover securely.

4.2 Track Integration

The lap counter is designed to integrate seamlessly into your Carrera slot car track system.

1. Identify a straight section of your track where the lap counter can be placed.
2. Carefully connect the lap counter unit into the track, ensuring the electrical contacts align properly. The unit acts as a track section.
3. Ensure the unit is stable and cars can pass underneath without obstruction.

Figure 4.2.1: The Carrera 71590 Electronic Lap Counter positioned over a two-lane slot car track. The display shows lap counts and times for two racers.

Figure 4.2.2: Rear view of the lap counter, highlighting the battery compartment and the power switch. The red buttons are visible on the top surface.

5. OPERATING INSTRUCTIONS

5.1 Powering On/Off

Locate the ON/OFF switch on the rear of the unit. Slide the switch to 'ON' to power on the lap counter. Slide to 'OFF' to power down.

5.2 Display Overview

The digital display shows information for two lanes (Winner and 2nd Place). It typically displays lap counts and lap times.

5.3 Setting Race Parameters

The lap counter allows setting race parameters such as the number of laps (from 1 to 999 laps) or a timed race. Refer to the specific buttons on the unit for navigation and selection.

- **Lap Count Mode:** Set the desired number of laps for the race. The counter will stop when the first car completes

the set number of laps.

- **Timed Race Mode:** Set a specific duration for the race. The counter will track laps within that time frame.

5.4 Starting a Race

Once parameters are set, the unit will typically initiate a countdown (e.g., 4 seconds) before the race officially begins. A "false start" will be indicated if a car passes the sensor before the countdown is complete.

5.5 Lap Counting

As each slot car passes under the sensor arch, the corresponding lane's lap count will increment, and lap times will be recorded. The unit provides distinct beeps for lap completion and for setting a new fastest lap within the current race.

5.6 Race End and Results

At the end of a race (either by lap count or time), the display will show the winner and second-place finisher, along with their respective lap counts and total times. The unit records the fastest lap time for the current race, but not an all-time fastest lap.

6. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the unit. Do not use abrasive cleaners or solvents.
- **Battery Replacement:** Replace batteries when the display becomes dim or the unit malfunctions. Always replace all 4 AA batteries at the same time.
- **Storage:** When not in use for extended periods, remove the batteries to prevent leakage and store the unit in a dry, cool place away from direct sunlight.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Unit does not power on.	Batteries are dead or incorrectly inserted.	Check battery polarity. Replace all 4 AA batteries.
Lap count is inaccurate or not registering.	Car not passing directly under sensor. Track connection issues. Unit not stable.	Ensure cars pass centrally under the arch. Verify secure connection to track. Ensure the unit is placed on a flat, stable surface. For HO scale tracks, consider elevating the track slightly (approx. 3/8 inch) to ensure sensor activation.
Display is dim or unreadable.	Low battery power.	Replace all 4 AA batteries.
"False Start" message appears frequently.	Cars are starting before the countdown finishes.	Ensure cars remain stationary until the "GO" signal.

8. SPECIFICATIONS

- **Model:** Carrera 71590
- **Item Model Number:** 20071590
- **Compatibility:** Carrera GO 1/43 and Evolution 1/32 Slot Car Race Tracks

- **Lane Support:** 2 Lanes
- **Lap Range:** 1 to 999 laps
- **Power Source:** 4 x AA Batteries (not included)
- **Product Dimensions:** Approximately 4.33 x 8.27 x 9.84 inches (11 x 21 x 25 cm)
- **Item Weight:** Approximately 1 pound (0.45 kg)
- **Recommended Age:** 8 years and up

Figure 8.1: The lap counter held by a person, illustrating its compact size and dimensions (7.5 inches / 19 cm height indicated).

9. WARRANTY AND SUPPORT

For warranty information and technical support, please refer to the official Carrera website or contact their customer service department. Keep your proof of purchase for warranty claims.
