ASSEMBLY INSTRUCTIONS

Follow these steps carefully for successful assembly. Refer to the included diagrammatic instructions for detailed part identification and placement.

1. **Preparation:** Carefully remove all plastic parts from the sprues using a hobby knife or nippers. Smooth any rough edges with a small file or sandpaper.
2. **Painting (Optional, but Recommended):** Before assembly, paint individual parts according to your desired color scheme. Allow paint to dry completely.
3. **Chassis Assembly:** Begin by assembling the chassis components. Ensure parts fit snugly before applying adhesive.
4. **Body Assembly:** Attach the main body panels. Pay attention to alignment to avoid gaps.
5. **Interior Details:** Assemble and paint interior components such as seats, dashboard, and steering wheel before installing them into the body.
6. **Wheel and Tire Installation:** Attach the wheels and tires to the axles.
7. **Exterior Details:** Add smaller exterior parts like headlights, taillights, mirrors, and chrome trim.
8. **Decal Application:** Once all paint is dry and parts are assembled, apply the decals according to the provided guide. Use decal setting solution for best results.
9. **Final Touches:** Apply a clear coat if desired to protect the paint and decals.

DISPLAY AND CARE

Once assembled, your model is ready for display. To ensure its longevity and appearance:

- Display the model in a cool, dry place away from direct sunlight to prevent fading and warping.
- Avoid extreme temperature fluctuations.
- Handle the model carefully to prevent accidental damage to delicate parts.

MAINTENANCE

Regular light cleaning will keep your model looking its best.

- Use a soft brush or a can of compressed air to gently remove dust.
- For stubborn dirt, lightly dampen a soft cloth with water (no harsh chemicals) and gently wipe the surface.
- Do not submerge the model in water or use abrasive cleaners.

TROUBLESHOOTING

Most issues encountered during model building relate to assembly technique or material handling. Here are some common points:

- **Parts not fitting:** Ensure you are using the correct parts as per the diagram. Sometimes, minor trimming or sanding of connection points is required for a perfect fit.
- **Paint issues:** Ensure surfaces are clean and dry before painting. Apply thin, even coats to avoid brush marks or thick layers. Allow adequate drying time between coats.
- **Decal silvering:** This occurs when air is trapped under the decal. Apply a gloss clear coat before

decals, use decal setting solution, and ensure the surface is smooth.
