

## Logitech X-530

# Logitech X-530 5.1 Speaker System User Manual

Model: X-530 (P/N: 970114-0403)

## 1. INTRODUCTION

The Logitech X-530 5.1 Speaker System is designed to deliver immersive, consistent surround sound for your games, movies, and music. Featuring a powerful subwoofer for distortion-free bass and five satellite speakers utilizing Logitech's patented FDD2 technology, this system ensures a clear, uniform sound field without the 'hot spots' often found in conventional dual-driver designs. Enjoy dynamic audio with dedicated controls for master volume and subwoofer level.

## 2. PACKAGE CONTENTS

Before you begin, please ensure all components are present in your package:

- One Subwoofer
- Five Satellite Speakers (four for front/rear, one for center channel)
- Audio Cables (color-coded for easy connection)
- Power Cable

This image displays the complete Logitech X-530 5.1 Speaker System, featuring a central subwoofer unit, four tall satellite speakers, and one horizontal center channel speaker. All components are black with silver speaker cones, designed for a comprehensive surround sound experience.

## 3. SETUP

### 3.1 Speaker Placement

Optimal speaker placement is crucial for the best 5.1 surround sound experience:

- 1. Front Left and Right Satellites:** Place these speakers equidistant from your listening position, on either side of your monitor or TV.
- 2. Center Channel Satellite:** Position this speaker directly in front of you, typically above or below your monitor/TV, ensuring dialogue is clear and intelligible.
- 3. Rear Left and Right Satellites:** Place these speakers behind your listening position, ideally at ear level, to create an enveloping surround sound field. Satellite speaker stands rotate for easy wall mounting.
- 4. Subwoofer:** The subwoofer can be placed on the floor, preferably in a corner or near a wall, to enhance bass response. Experiment with placement to find the best sound for your room.

### 3.2 Connections

Follow these steps to connect your speaker system:

- 1. Connect Satellite Speakers to Subwoofer:** Plug the color-coded cables from each satellite speaker into the corresponding jacks on the back of the subwoofer. Ensure the front, rear, and center speakers are connected to their correct ports.

2. **Connect Subwoofer to Audio Source:** Use the provided audio cables to connect the subwoofer to your PC, music player, DVD player, or game console. The system supports 5.1 channel input for true surround sound. Ensure your audio source (e.g., sound card) is configured for 5.1 output.
3. **Connect Power:** Plug the power cable into the subwoofer and then into a standard electrical outlet.

## 4. OPERATING INSTRUCTIONS

### 4.1 Power On/Off

The power switch is conveniently located on the right front satellite speaker. Press it to turn the system on or off.

### 4.2 Volume Control

- **Master Volume:** Adjust the overall system volume using the large knob on the right front satellite speaker.
- **Subwoofer Level:** Control the bass intensity using the dedicated subwoofer level knob, also located on the right front satellite speaker.

### 4.3 Headphone Jack

For private listening, plug your headphones into the headphone jack located on the right front satellite speaker. This will automatically mute the speakers.

## 5. MAINTENANCE

To ensure the longevity and optimal performance of your Logitech X-530 speaker system, follow these simple maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe down the speaker surfaces. Avoid using abrasive cleaners or solvents, as they may damage the finish.
- **Ventilation:** Ensure the subwoofer and satellite speakers have adequate ventilation. Do not block any vents or place the speakers in enclosed spaces that could lead to overheating.
- **Cable Management:** Keep cables tidy and untangled to prevent damage and ensure a clean setup. Avoid placing heavy objects on cables.
- **Environment:** Keep the speakers away from excessive moisture, direct sunlight, and extreme temperatures.

## 6. TROUBLESHOOTING

If you encounter issues with your speaker system, refer to the following common problems and solutions:

- **No Sound:**

- Ensure the power cable is securely plugged into both the subwoofer and a working electrical outlet.
- Verify the system is powered on (power indicator light should be on).
- Check that all audio cables are correctly connected from the subwoofer to your audio source and from the satellites to the subwoofer.
- Increase the master volume on the speaker system and on your audio source (PC, DVD player, etc.).
- If using headphones, unplug them from the headphone jack.

- **Distorted or Unclear Sound:**

- Reduce the master volume or the volume on your audio source.
- Check for loose cable connections.
- Ensure the audio source is not sending an overdriven signal.

- **Uneven Sound or Missing Channels:**

- Confirm that your audio source is configured for 5.1 surround sound output.
- Verify that each satellite speaker is connected to its correct, color-coded port on the subwoofer.
- Test each channel individually if your sound card software allows.

- **Weak or No Bass:**

- Increase the subwoofer level using its dedicated control knob.
- Ensure the subwoofer is properly connected.
- Adjust the subwoofer's placement in the room; sometimes moving it closer to a wall or corner can enhance bass.

## 7. SPECIFICATIONS

<b>Brand</b>	Logitech
<b>Model Name</b>	X-530
<b>Speaker Type</b>	Satellite, Subwoofer
<b>Special Feature</b>	Subwoofer
<b>Recommended Uses For Product</b>	Volume

Get the most from your games and movies with the advanced-pumping surround sound of the Logitech X-530. Its subwoofer and satellites use dual-axis technological advances to ensure consistent audio at any volume.

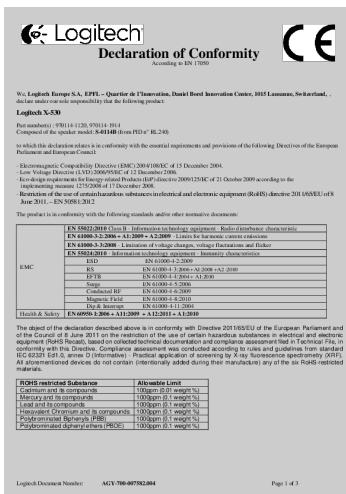

Play big games on your PC, movie theater-quality DVD player, or even your PlayStation®3. Surround game sound, immerse yourself in crystal clear, consistent sound from your games, movies, and more. The high-fidelity, membrane-free bass drivers in the Logitech X-530's four satellite speakers use Logitech's patented FDD™ technology to eliminate the movement of the diaphragm, resulting in a more powerful bass sound in a clear, uniform sound field without the "hot spot" and inconsistency of other dual-axis speakers.

- Frequency Diverted Dual Driver (FDD™) satellite technology produces a uniform sound field for full-rich sound
- Multiple speakers for a more consistent surround sound
- Dedicated center channel makes dialogue clear and intelligible
- Dynamic bass management equalization measures bass response while minimizing distortion
- The Logitech X-530 design dispenses more air for deeper bass
- Headphone jack enables private listening
- Master volume and subwoofer level controls placed for quick, convenient access
- Satellite speaker stands rotate for easy wall mounting

## Logitech X-530 Surround Sound Speaker System - Product Overview

Experience immersive surround sound with the Logitech X-530 2.1 speaker system. Featuring FDD2™ technology for uniform audio, this system delivers powerful bass and clear dialogue for an enhanced gaming and movie experience. Compatible with PC, Mac, and game consoles.

**Volume control for the 2.11 speaker doesn't work in low battery mode see related**

When you have headphones connected to your 2.11 speaker's control port, you'll need to use the source device (smartphone, tablet, computer, etc.) to control the volume.

**Windows 8 and Windows 10 support for Logitech speakers**

Updated: 08/24/2015 09:29 PM

If you are using a Logitech speaker and you purchased it before Windows 8 release, you can check the list below to see if it's been identified to work with Windows 8 or Windows 10.

NOTE: To check support for other Logitech products, see answer 32423.

**What if my product isn't listed?**

If your product isn't listed and you purchased it:

- **BEFORE** the Windows 8 release - The product isn't supported on Windows 8 or Windows 10.
- **AFTER** the Windows 8 release - Check the product's Support page > Downloads > Downloads for Windows 8 or Windows 10. For newer product support, check the product packaging and web pages.

**Speakers that work with Windows 8 and Windows 10**

NOTES:

- Audio USB products use drivers that are native to modern Windows operating systems, enabling basic functionality without any third-party software.
- The following Logitech speakers are either not supported or do not support 3.5 mm stereo connectors, Analog RCA, and 6-channel direct inputs. For these devices, Windows 8/Windows 10 DS support depends on proper sound card functionality.
- Bluetooth connection requires a Bluetooth controller on the host device.

**Logitech Speaker Support for Windows 8 and Windows 10**

This document provides information on Logitech speaker compatibility with Windows 8 and Windows 10, including a list of supported models and troubleshooting tips.
