Maintenance and Cleaning

Regular cleaning will extend the life of your brush and maintain its performance.

1. **Remove Hair:** After each use, or as needed, use your fingers or a comb to gently remove any trapped hair from the bristles.
2. **Clean Bristles:** For a deeper clean, use a mild soap solution and a soft cloth or old toothbrush to gently scrub the bristles. Avoid harsh chemicals.
3. **Rinse (Carefully):** If rinsing, hold the brush with the bristles facing downwards under running water to prevent water from entering the handle or barrel. Do not immerse the entire brush.
4. **Dry:** Shake off excess water and allow the brush to air dry completely with the bristles facing downwards to prevent water accumulation.
5. **Storage:** Store the brush in a clean, dry place away from direct sunlight or extreme temperatures.

Troubleshooting

If you encounter issues with your Vidal Sassoon VS7963 brush, refer to the following common solutions:

Problem	Possible Cause	Solution
Hair snagging or pulling	Excessive hair buildup in bristles; hair is too tangled before brushing.	Regularly remove hair from the brush. Detangle hair gently with fingers or a wide-tooth comb before using the brush.
Brush feels less effective	Bristles are dirty or damaged.	Clean the bristles thoroughly as per the Maintenance section. Inspect for bent or missing bristles; if significantly damaged, consider replacement.
Static electricity in hair	Dry hair or environment; product not fully utilizing ionic properties.	Ensure hair is adequately moisturized. Use a leave-in conditioner or anti-static spray. The ionic technology works best on slightly damp hair or during blow-drying.
