MAINTENANCE

To ensure the longevity and pristine condition of your Masterpiece figure, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to gently wipe away dust. For stubborn marks, a slightly damp cloth with mild soap can be used, followed by immediate drying. Avoid harsh chemicals or abrasive materials.
- **Storage:** Store the figure away from direct sunlight, extreme temperatures, and high humidity to prevent discoloration or material degradation.
- **Handling:** Always handle the figure by its main body parts. Avoid putting excessive stress on small joints or thin plastic components.

TROUBLESHOOTING

This section addresses common issues you might encounter with your figure.

Loose Joints:

Over time, some joints may become loose. For minor looseness, a small amount of clear nail polish or

specialized joint-tightening fluid can be applied to the joint, allowed to dry, and then tested. Apply sparingly.

Stiff Joints:

If a joint is too stiff, gently warm the area with a hairdryer on a low setting for a few seconds to soften the plastic, then carefully attempt to move the joint. Do not overheat.

Transformation Difficulties:

If you encounter difficulty during transformation, re-examine the previous steps. Often, a small panel or tab needs to be aligned correctly before the next step can proceed. Do not force parts.
