## Bestway 62030E

# Bestway Air Hammer Inflation Pump

Model: 62030E

Brand: Bestway

## INTRODUCTION

The Bestway Air Hammer Inflation Pump is a versatile 19-inch manual pump designed for efficient inflation and deflation of various inflatable items such as tubes, toys, and air beds. Its dual-action design allows air to be forced on both the upstroke and downstroke, significantly reducing the time required for inflation. The pump includes three different valve adaptors to ensure compatibility with a wide range of inflatable valves.

## WHAT'S IN THE BOX

- 1 x Bestway Air Hammer Inflation Pump
- 3 x Valve Adaptors

## SETUP

1. **Attach the Hose:** Connect the flexible hose securely to the pump's air outlet port.
2. **Select the Correct Adaptor:** Identify the appropriate valve adaptor from the three provided that matches the inflation valve of your inflatable item.
3. **Attach the Adaptor:** Firmly attach the selected adaptor to the end of the flexible hose.

# OPERATING INSTRUCTIONS

## Inflation

1. **Connect to Inflatable:** Insert the attached valve adaptor into the inflation port of your inflatable item. Ensure a snug fit to prevent air leakage.
2. **Begin Pumping:** Hold the pump's handle firmly and move it up and down in a steady, continuous motion. The dual-action design will inflate on both strokes.
3. **Monitor Inflation:** Continue pumping until the inflatable reaches the desired firmness. Avoid over-inflation, as this can damage the item.
4. **Remove Pump:** Once inflated, quickly remove the adaptor from the valve and secure the inflatable's cap (if applicable).

## Deflation

The Bestway Air Hammer Inflation Pump can also be used for deflation to quickly remove air from inflatables for storage.

1. **Switch to Deflation Mode:** The pump is designed to easily switch between inflation and deflation.

Typically, the hose connection point on the pump body will have two ports: one for inflation and one for deflation. Connect the hose to the deflation port.

2. **Connect to Inflatable:** Insert the appropriate valve adaptor into the deflation port of your inflatable item.
3. **Begin Pumping:** Operate the pump handle in the same up and down motion. The pump will now draw air out of the inflatable.
4. **Monitor Deflation:** Continue pumping until the inflatable is sufficiently deflated for packing or storage.
5. **Remove Pump:** Disconnect the adaptor from the inflatable.

## MAINTENANCE

- **Cleaning:** Wipe the pump body and hose with a damp cloth after use. Ensure all parts are dry before storage.
- **Storage:** Store the pump in a cool, dry place away from direct sunlight and extreme temperatures. Keep the hose and adaptors together to prevent loss.
- **Inspection:** Periodically check the hose and adaptors for any signs of wear, cracks, or damage. Replace if necessary to maintain optimal performance.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Pump not inflating/deflating efficiently	Incorrect adaptor size; Loose hose connection; Valve on inflatable not fully open; Obstruction in hose/adaptor.	Ensure correct adaptor is used and securely attached. Check hose connections. Verify inflatable valve is open. Inspect hose and adaptors for blockages.
Air leaking during operation	Loose connection between hose/adaptor/inflatable; Damaged hose or adaptor.	Tighten all connections. Inspect hose and adaptors for damage and replace if necessary.
Pump handle is stiff or difficult to move	Internal mechanism requires lubrication; Debris inside pump.	Apply a small amount of silicone-based lubricant to the pump shaft. If debris is suspected, consult a professional or manufacturer for guidance.

## SPECIFICATIONS

- **Brand:** Bestway
- **Model:** 62030E
- **Material:** Plastic
- **Item Weight:** 1.5 Pounds
- **Operation Mode:** Manual
- **Included Components:** 1 Pump, 3 valve adaptors
- **Color:** Black
