Dansk 597950

Dansk Leaf Cake Server

INSTRUCTION MANUAL

Introduction

The Dansk Leaf Cake Server, model 597950, is an elegantly designed utensil crafted from durable 18-8 stainless steel. Inspired by the beauty of nature, its distinctive leaf pattern handle makes it a sophisticated addition to any dining occasion. This manual provides essential information for the proper setup, use, and maintenance of your cake server to ensure its longevity and performance.

Product Overview

Figure 1: The Dansk Leaf Cake Server, showcasing its elegant design and polished stainless steel finish.

The Dansk Leaf Cake Server is designed for serving cakes, pies, and pastries with ease and style. Its balanced weight and ergonomic handle provide a comfortable grip, while the broad blade ensures clean and effortless serving.

Setup

Your Dansk Leaf Cake Server comes ready for immediate use. No assembly is required.

1. **Unpacking:** Carefully remove the cake server from its packaging.
2. **Initial Cleaning:** Before first use, wash the cake server thoroughly with warm water and mild dish soap. Rinse completely and dry immediately with a soft cloth to prevent water spots.

Operating Instructions

Using your Dansk Leaf Cake Server is straightforward:

1. **Cutting:** If the cake is not pre-sliced, gently press the edge of the server into the cake to make a clean cut. For best results, use a separate knife to cut through tougher crusts or dense cakes before serving.
2. **Lifting:** Slide the broad blade of the server underneath the desired slice of cake. Ensure the slice is fully supported by the blade.
3. **Serving:** Carefully lift the cake slice and transfer it to a plate. The design of the server helps to keep the slice intact

during transfer.

Figure 2: Detail of the distinctive 'Leaf' pattern on the handle, a hallmark of Dansk design, enhancing grip and aesthetics.

Maintenance and Care

Proper care will preserve the beauty and functionality of your Dansk Leaf Cake Server for years to come.

- **Cleaning:** It is recommended to **hand wash** your cake server with warm water and a mild detergent immediately after use. While stainless steel is generally dishwasher safe, hand washing helps maintain the polished finish and prevents potential damage from harsh dishwasher detergents or prolonged exposure to moisture.
- **Drying:** Always dry the server thoroughly with a soft, clean cloth immediately after washing to prevent water spots and maintain its luster.
- **Storage:** Store the cake server in a dry place, ideally in a flatware drawer or a utensil holder, to prevent scratches and maintain its pristine condition.
- **Avoid:** Do not use abrasive cleaners, steel wool, or harsh scouring pads, as these can scratch the surface. Avoid

prolonged contact with acidic foods, which can cause discoloration.

Troubleshooting

Most issues with a cake server are minor and easily resolved.

- **Water Spots/Streaks:** This usually occurs if the server is air-dried or not dried immediately after washing. To resolve, re-wash and dry thoroughly with a soft, lint-free cloth.
- **Dull Finish:** Over time, the polished finish may appear dull. Regular hand washing and immediate drying will help maintain its shine. For stubborn dullness, a stainless steel polish designed for kitchenware can be used sparingly, following the product's instructions.
- **Cake Sticking:** If cake slices stick to the server, ensure the server is clean and dry. For very sticky cakes, a light spray of non-stick cooking spray on the blade (and then wiping off excess) can help, but always wash thoroughly afterwards.

Specifications

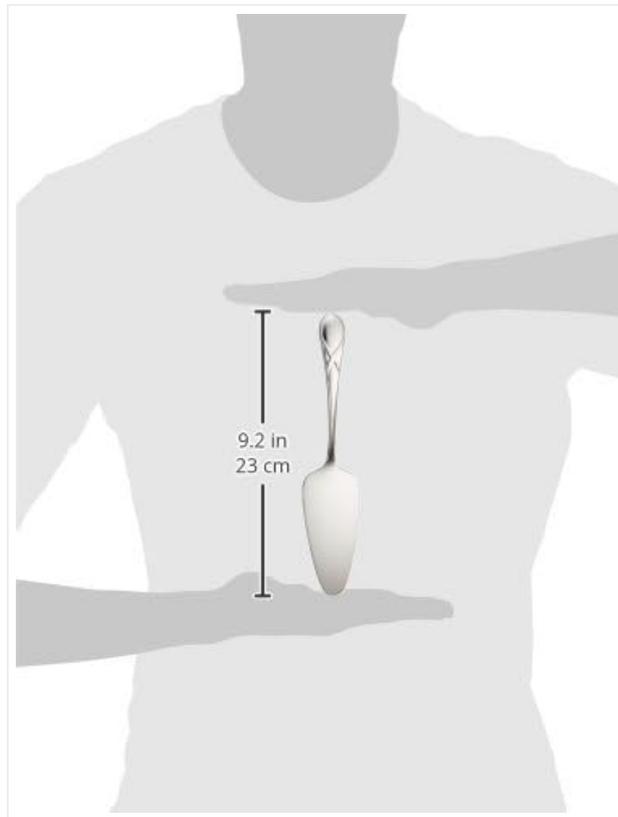

Figure 3: Visual representation of the cake server's dimensions, approximately 9.2 inches (23 cm) in total length.

Brand	Dansk
Model Number	597950
Material	18-8 Stainless Steel
Total Length	Approx. 8.9 inches (22.5 cm) / 9.2 inches (23 cm) (refer to Figure 3)
Item Weight	Approx. 2.47 ounces (70 grams)
