Mundial BP660

Mundial BP660 Red Dot Dressmaker Shears

INSTRUCTION MANUAL

Introduction

Thank you for choosing Mundial Red Dot Dressmaker Shears, model BP660. These 8.5-inch multi-purpose shears are crafted from high-quality stainless steel with an adjustable pivot, designed for precision cutting in various fabric and craft applications. This manual provides essential information for the proper use, care, and maintenance of your shears to ensure optimal performance and longevity.

Product Features

- **Precision Blades:** Cutlery-quality stainless steel blades ensure sharp, clean cuts for dressmaking and general crafting.
- **Adjustable Pivot Assembly:** The red dot pivot allows for tension customization, providing smooth operation and enhanced control.
- **Ergonomic Handles:** Matted black polypropylene handles are designed to prevent slippage and reduce hand fatigue during extended use.
- **Durable Construction:** Stainless steel construction resists rust and corrosion, offering reliable performance over time.
- **Multi-Purpose Design:** Ideal for a wide range of materials, including various fabrics, paper, and other craft supplies.

Setup

1. **Unpack:** Carefully remove the shears from their packaging. Retain packaging for future storage or transport if desired.
2. **Inspect:** Examine the shears for any signs of damage or manufacturing defects. Ensure the blades open and close smoothly.
3. **Initial Cleaning:** Wipe the blades with a clean, dry cloth to remove any residual manufacturing oils or dust.

Operating Instructions

These shears are designed for precise cutting of various materials. Follow these guidelines for optimal performance:

1. **Grip:** Hold the shears comfortably with your dominant hand. The larger loop is typically for your thumb, and the smaller loop for your index and middle fingers, or as preferred for comfort.
2. **Cutting Technique:** Position the material to be cut between the blades. Apply steady, even pressure as you close the blades, moving from the pivot point towards the tips for a smooth, continuous cut.
3. **Adjustable Tension:** The red pivot screw allows you to adjust the blade tension. Turn clockwise to tighten for a firmer cut, or counter-clockwise to loosen for easier movement. Adjust to your comfort and the material being cut.
4. **Material Compatibility:** While multi-purpose, these shears are optimized for fabric and similar soft materials. Avoid cutting hard materials, wire, or abrasive surfaces, as this can dull or damage the blades.

Maintenance and Care

Proper care will extend the life and performance of your Mundial shears:

- **Cleaning:** After each use, wipe the blades clean with a soft, dry cloth to remove any fabric fibers, dust, or moisture. For stubborn residue, a slightly damp cloth followed by immediate drying is recommended.
- **Lubrication:** Periodically apply a small drop of sewing machine oil or a similar light lubricant to the pivot point to maintain smooth action. Wipe off any excess oil.
- **Storage:** Store your shears in a dry place, preferably in a protective sheath or case, to prevent accidental damage to the blades and to protect against moisture. Keep them out of reach of children.
- **Sharpening:** When the blades begin to feel dull, professional sharpening is recommended to maintain the precise edge. Avoid attempting to sharpen with household tools, as this can damage the blade angle.
- **Dedicated Use:** To preserve sharpness, designate these shears for fabric cutting only. Avoid using them on paper, cardboard, or other materials that can quickly dull the blades.

Troubleshooting

- **Shears feel stiff or difficult to open/close:**
  Check the pivot screw. It may be too tight. Loosen it slightly by turning counter-clockwise. Apply a drop of lubricant to the pivot point.
- **Blades are not cutting cleanly or are snagging fabric:**
  The blades may be dull. Consider professional sharpening. Ensure you are cutting with the full length of the blade, not just the tips.
- **Rust spots appear on blades:**
  This indicates exposure to moisture. Clean immediately with a rust remover designed for stainless steel, then dry thoroughly and apply a light oil. Store in a dry environment.

Specifications

Model Number	MU-660
Blade Material	Stainless Steel
Handle Material	Polypropylene
Product Dimensions	8.5 inches (overall length)
Item Weight	3.52 ounces
Hand Orientation	Ambidextrous
Color	Black handles, Silver blades

Warranty and Support
