Lewis N. Clark TSA23PNK

Lewis N. Clark Travel Sentry Combo Lock Instruction Manual

Model: TSA23PNK | Brand: Lewis N. Clark

INTRODUCTION

Thank you for choosing the Lewis N. Clark Travel Sentry Combo Lock. This durable and easy-to-use combination lock is designed to provide security for your luggage and personal belongings while complying with Transportation Security Administration (TSA) regulations. Its large, easy-to-read dials and robust construction ensure reliable performance for all your travel and security needs.

SETUP: SETTING YOUR PERSONAL COMBINATION

Your lock is preset to **0-0-0** from the factory. To set your own personal combination, follow these steps:

1. Ensure the lock is currently set to its opening combination (factory default is 0-0-0).
2. Open the lock by pulling the shackle upwards.
3. Rotate the shackle 90 degrees counter-clockwise from its locked position.
4. **Crucial Step:** While firmly pressing the shackle down into the lock body, set your desired 3-digit combination by rotating the dials. Make sure the numbers are aligned with the indicator line.
5. Once your new combination is set, release the shackle and rotate it back to its original locked position.
6. Scramble the dials to lock the shackle. Your new combination is now set.

To change your combination again, repeat the steps above, starting with your current combination.

TSA ACCEPTED

**ZINC ALLOY AND
STEEL CONSTRUCTION**

**3-DIAL RESETTABLE
COMBINATION**

**EASY-TO-USE
LARGE DIALS**

OPERATING THE LOCK

Opening the Lock

To open the lock, rotate the dials to your personal 3-digit combination. Once the correct combination is aligned, pull the shackle upwards to release it.

Closing and Securing the Lock

To close the lock, push the shackle down into the lock body until it clicks into place. Then, scramble the dials to a random set of numbers to secure the lock and prevent unauthorized access.

TSA Approved Functionality

This lock is Travel Sentry® Approved, indicated by the red diamond logo. This means that security personnel at airports (such as the TSA in the United States) can open your luggage for inspection without damaging the lock or your bag. They use a special master key to open and re-lock your bag,

ensuring your belongings remain secure after inspection.

MAINTENANCE

To ensure the longevity and smooth operation of your Lewis N. Clark Travel Sentry Combo Lock, consider the following maintenance tips:

- **Cleaning:** Wipe the lock periodically with a soft, dry cloth to remove dust and grime. Avoid using harsh chemicals or abrasive cleaners.
- **Lubrication:** If the dials become stiff or difficult to turn, apply a small amount of silicone-based lubricant to the moving parts. Do not use oil-based lubricants as they can attract dirt.
- **Storage:** Store the lock in a dry environment when not in use to prevent corrosion.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Lock will not open with combination.	Incorrect combination entered or dials not fully aligned.	Double-check your combination and ensure each number is precisely aligned with the indicator line. Try rotating the dials slightly past the number and then back.
Dials are stiff or hard to turn.	Accumulation of dirt or lack of lubrication.	Clean the dials with a soft cloth. Apply a small amount of silicone-based lubricant to the dial mechanism.
Forgot the combination.	Combination is lost.	Unfortunately, without the correct combination, the lock cannot be opened or reset. There is no master reset code for user-set combinations.

SPECIFICATIONS

Feature	Detail
