## Conair 80014N

# Conair Professional 6 1/2" Diamond-Sharpended Barber Shears Instruction Manual

Model: 80014N

## INTRODUCTION

The Conair Professional 6 1/2" Diamond-Sharpended Barber Shears are designed for precise hair cutting, trimming, and shaping. Crafted from stainless steel, these shears offer exceptional quality and lasting sharpness for various hair lengths and textures. This manual provides essential information for the proper use and care of your shears.

Image: Conair Professional 6 1/2" Diamond-Sharpener Barber Shears. The shears feature black handles with blue accents and sharp stainless steel blades.

## SETUP

---

No assembly is required for the Conair Professional Barber Shears. Upon receiving, inspect the shears for any visible damage. Ensure the blades open and close smoothly. It is recommended to clean the blades before first use.

## OPERATING INSTRUCTIONS

---

These shears are designed for cutting, trimming, and shaping hair. For optimal results, ensure hair is clean and free of tangles before cutting.

- **Hair Cutting:** Use the sharp blades to make clean, precise cuts. Hold the hair firmly between your fingers and cut below your fingers.
- **Trimming:** For minor adjustments or to remove split ends, hold small sections of hair and carefully snip the desired amount.
- **Shaping:** The fine tips allow for detailed work, such as shaping around the ears or neckline.
- **Eyebrow Trimming:** For unruly eyebrows, comb the eyebrow hairs upwards with a spoolie brush. Carefully trim any hairs that extend beyond the natural brow line using the shears.

**Caution:** The blades are diamond-sharpened and extremely sharp. Handle with care to prevent injury. Keep out of reach of children.

## MAINTENANCE

---

Proper maintenance ensures the longevity and performance of your shears.

- **Cleaning:** After each use, wipe the blades with a soft, dry cloth to remove any hair clippings or residue. This helps maintain sharpness and prevents rust.
- **Storage:** Store the shears in a dry place, preferably in a protective case, to prevent damage to the blades and accidental injury.
- **Oiling:** Periodically apply a small drop of scissor oil to the pivot screw to ensure smooth operation.
- **Sharpening:** While diamond-sharpened for lasting sharpness, professional sharpening may be required over time with extensive use.

## TROUBLESHOOTING

---

If you experience issues with your shears, consider the following:

- **Blades feel dull:** Ensure blades are clean. If dullness persists, professional sharpening may be needed.
- **Blades stick or are stiff:** Apply scissor oil to the pivot point and open/close the shears several times to distribute the oil.
- **Hair snagging:** This often indicates dull blades or improper cutting technique. Ensure blades are sharp and make clean, decisive cuts.

## SPECIFICATIONS

---

<b>Brand:</b>	Conair
<b>Model Number:</b>	80014N
<b>Blade Material:</b>	Stainless Steel
<b>Handle Material:</b>	Stainless Steel
<b>Blade Length:</b>	6 1/2 inches (approximately)
<b>Product Dimensions:</b>	6.73"L x 2.98"W
<b>Item Weight:</b>	1.3 ounces
<b>Hand Orientation:</b>	Ambidextrous
<b>UPC:</b>	074108800145

## WARRANTY AND SUPPORT

---

For warranty information or product support, please refer to the packaging or contact Conair customer service directly. Keep your purchase receipt for warranty claims.
