TROUBLESHOOTING

If you encounter issues with your toaster oven, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Oven does not turn on.	Not plugged in; power outage; faulty outlet.	Ensure the power cord is securely plugged into a working electrical outlet. Check your circuit breaker.
Food not cooking evenly.	Incorrect rack position; overcrowding; uneven food placement.	Adjust rack position for optimal heat distribution. Avoid overcrowding the oven. Arrange food in a single layer for best results. Consider using the convection bake function.
Smoke or odor during operation.	Food spills; residue from manufacturing (first use); excessive grease.	For first use, this is normal (see Setup). For subsequent uses, clean the interior and crumb tray thoroughly. Reduce grease on food items.
Controls not responding.	Temporary electronic glitch.	Unplug the oven from the outlet for a few minutes, then plug it back in to reset the controls.
