Laurey 98201 Perfect Mount Precision Alignment Template User Manual

Brand: Laurey | Model: 98201

INTRODUCTION

The Laurey 98201 Perfect Mount Precision Alignment Template is designed to simplify the process of installing cabinet hardware, including knobs and pull handles. This tool eliminates the need for complex measurements and guesswork, ensuring accurate and consistent placement of hardware on cabinet doors and drawers. Its intuitive design allows users to quickly mark and mount hardware with precision.

SETUP AND PREPARATION

Before beginning installation, ensure your work area is clean and well-lit. Gather all necessary tools, including the Laurey 98201 template, a pencil or marking tool, and the cabinet hardware (knobs or pulls) you intend to install. No assembly is required for the template itself.

- Inspect the template for any damage or debris that might affect its accuracy.
- Familiarize yourself with the various measurement markings on the template, which include standard and metric options (e.g., 3" low, 3" high, 3 1/2", 4", 96mm).
- Ensure the cabinet surface where hardware will be installed is clean and free of dust or grease.

OPERATING INSTRUCTIONS

The Laurey Perfect Mount template utilizes a simple "Mark and Mount" process for precise hardware installation. The template is designed to work on both sides of a cabinet door or drawer for consistent alignment.

Step-by-Step Guide:

1. **Position the Template:** Place the template on the cabinet door or drawer front where you intend to install the hardware. The L-shaped design allows it to sit flush against the edges, ensuring a square and accurate starting point.
2. **Select Measurement:** Identify the desired measurement marking on the template that corresponds to the center-to-center distance of your pull handle or the desired position for your knob. The template offers multiple options,

including 3" low, 3" high, 3 1/2", 4", and 96mm.

3. **Mark the Holes:** Using a pencil or fine-tipped marker, carefully mark through the appropriate holes on the template onto the cabinet surface. For pull handles, mark both required holes. For knobs, mark the single central hole. The template is designed to work on both sides, allowing for easy marking regardless of the cabinet's orientation.
4. **Drill Pilot Holes:** Remove the template. Using a drill with an appropriately sized drill bit (typically slightly smaller than your hardware screws), carefully drill pilot holes at the marked locations. Ensure you drill straight to avoid damaging the cabinet.
5. **Mount Hardware:** Align your cabinet knob or pull handle with the drilled pilot holes and secure it using the provided screws. Tighten until snug, but avoid over-tightening to prevent damage to the cabinet or hardware.
6. **Horizontal Placement:** For hardware requiring horizontal placement, the template can also be rotated and positioned to assist with accurate marking for such installations.

Image Description: This image displays the Laurey Perfect Mount Precision Alignment Template in its retail packaging. The blue template features various measurement markings for different hardware sizes, including 3" low, 3" high, 3 1/2", 4", and 96mm. Illustrations on the packaging demonstrate the "You Mark It!" and "You Mount It!" steps, showing how to use the template to mark hole locations with a pencil and then install cabinet knobs and pull handles. It also highlights that the template "Works On Both Sides" and "Also Does Horizontal Placement." The packaging states "Made In The USA."

CARE AND MAINTENANCE

The Laurey 98201 template is designed for durability. To ensure its longevity and continued accuracy:

- After each use, wipe the template with a soft, damp cloth to remove any pencil marks, dust, or debris. Avoid abrasive cleaners.
- Store the template in a clean, dry place, away from direct sunlight or extreme temperatures, to prevent warping or damage.
- Do not bend or apply excessive force to the template, as this could compromise its precision.

TROUBLESHOOTING

While the Laurey Perfect Mount template is straightforward to use, here are some common issues and their solutions:

- **Inaccurate Markings:**
 - Ensure the template is held firmly against the cabinet edges and does not shift during marking.
 - Use a sharp pencil or fine-tipped marker for precise marks.
 - Double-check that you are using the correct measurement holes for your hardware.
- **Difficulty Drilling:**
 - Ensure your drill bit is sharp and appropriate for the cabinet material.
 - Apply steady, even pressure when drilling.
 - Always drill pilot holes before installing screws.

PRODUCT SPECIFICATIONS

Feature	Detail
Brand	Laurey
Model Number	98201
Material	Solid
Style	Custom
Product Dimensions	11.5"L x 6"W
Item Weight	1.28 ounces
Manufacturer	Laurey
UPC	795871489800, 722233982013, 732454475423, 735090022020
Country of Origin	China (as per feature bullets)
Included Components	Safe accessories (template only)
