Laurey 98101 Perfect Mount Precision Alignment Template User Manual

For Accurate Drawer Hardware Installation

INTRODUCTION

The Laurey 98101 Perfect Mount Precision Alignment Template is an essential tool designed to simplify the installation of drawer hardware. This template eliminates guesswork, ensuring accurate and consistent placement of pulls and knobs on cabinet drawers and doors. Its innovative design allows for precise marking, making your hardware installation process efficient and professional.

This manual provides detailed instructions for the proper use, maintenance, and care of your Laurey 98101 template.

SETUP

Before beginning any installation, ensure your work surface is clean and well-lit. Gather all necessary tools, including the Laurey 98101 template, a pencil or marker, a drill with appropriate bits, and your drawer hardware (knobs or pulls).

Image: The Laurey 98101 Perfect Mount Precision Alignment Template, a clear blue plastic tool with various hole patterns for different hardware sizes.

Inspect the template for any damage or warping before use. A flat, undamaged template is crucial for accurate measurements. Familiarize yourself with the various markings and hole patterns on the template, which accommodate different center-to-center measurements for pulls and single-hole placements for knobs.

OPERATING INSTRUCTIONS

Follow these steps for precise hardware installation using your Laurey 98101 template:

1. **Determine Hardware Type:** Identify whether you are installing a single-hole knob or a two-hole pull.
2. **Select Hole Pattern:** Locate the corresponding hole pattern on the template for your hardware. For pulls, match the center-to-center measurement (e.g., 3 inches, 96mm, 128mm). For knobs, use any single hole.
3. **Position the Template:** Place the template on the drawer front or cabinet door where you intend to install the hardware. The template features edges that can be aligned with the top, bottom, or side edges of your drawer/door for consistent placement. Use the etched lines and measurements on the template to achieve your desired offset from the edges.

4. **Mark Drill Points:** Once the template is perfectly aligned and held firmly in place, use a pencil or fine-tip marker to mark through the selected holes onto the drawer or door surface. Ensure the marks are clear and precise.
5. **Drill Pilot Holes:** Carefully remove the template. Using a drill with a bit size appropriate for your hardware screws, drill pilot holes at the marked points. Start with a smaller pilot hole to prevent wood splitting, especially in hardwoods.
6. **Install Hardware:** Attach your drawer pulls or knobs using the provided screws, aligning them with the newly drilled holes. Tighten securely but avoid over-tightening, which can damage the hardware or the cabinet material.
7. **Verify Alignment:** After installation, step back and verify the alignment of your hardware. The Laurey 98101 template is designed to ensure professional and consistent results across multiple drawers and doors.

MAINTENANCE

The Laurey 98101 template requires minimal maintenance to ensure its longevity and accuracy.

- **Cleaning:** After each use, wipe the template with a soft, damp cloth to remove any pencil marks, dust, or debris. Avoid abrasive cleaners or solvents, which can damage the plastic or erase the markings.
- **Storage:** Store the template flat in a dry, cool place, away from direct sunlight or extreme temperatures. This prevents warping and ensures the template remains accurate for future projects.
- **Inspection:** Periodically inspect the template for any signs of damage, such as cracks or warping. A damaged template may lead to inaccurate measurements and should be replaced.

TROUBLESHOOTING

Here are solutions to common issues you might encounter:

- **Inaccurate Marks:** Ensure the template is held firmly against the surface and does not shift while marking. Use a sharp pencil or fine-tip marker for clear, precise marks.
- **Template Warping:** If the template appears warped, it may have been stored improperly or exposed to high temperatures. Store it flat in a cool, dry place. If warping persists and affects accuracy, consider replacing the template.
- **Difficulty Drilling:** Ensure you are using the correct drill bit size for your hardware screws. Always drill pilot holes to prevent splitting and make drilling easier. If drilling into very hard wood, use a high-quality, sharp drill bit.
- **Hardware Not Aligning:** Double-check that you selected the correct hole pattern on the template for your hardware's center-to-center measurement. Verify that the template was aligned correctly with the drawer/door edges before marking.

SPECIFICATIONS

Feature	Detail
Model Number	98101

Feature	Detail
Brand	Laurey
Material	Durable Plastic (Note: While some specifications list "Metal", the template itself is typically made from durable plastic for visibility and flexibility.)
Item Weight	0.01 Pounds
Product Dimensions	11.5 X 6.0 X 10.0" (Approximate packaging dimensions)
Manufacturer	Laurey
Included Components	Safe accessories (Refers to the template as an accessory for safe installation)
Manufacturing Origin	United States
UPC	735090131869, 074994459489, 722233981016, 732454572870, 712714161976

WARRANTY INFORMATION

The Laurey 98101 Perfect Mount Precision Alignment Template comes with a warranty. As per the manufacturer's statement, warranty claims are valid with proof of purchase.

For specific details regarding the warranty period, coverage, and claim procedures, please refer to the documentation included with your purchase or contact Laurey customer support directly. Keep your purchase receipt or invoice as proof of purchase.

CUSTOMER SUPPORT

Should you have any questions, require assistance with your Laurey 98101 template, or need to inquire about warranty services, please contact Laurey customer support.

Visit the official Laurey website for contact information, FAQs, and additional product resources. You can often find support details on the product packaging or through the retailer where the item was purchased.
