LASCO 08-2387 Three Function Massage Shower Head Instruction Manual

INTRODUCTION

This manual provides comprehensive instructions for the installation, operation, and maintenance of your LASCO 08-2387 Three Function Massage Shower Head. Please read all instructions carefully before beginning installation or use to ensure proper function and longevity of the product.

SAFETY INFORMATION

- Always turn off the main water supply before attempting any plumbing installation or repair.
- Wear appropriate safety gear, such as safety glasses, during installation.
- Do not overtighten connections, as this can damage the product or existing plumbing.
- If you are unsure about any step, consult a qualified plumber.

PACKAGE CONTENTS

Verify that all components are present before beginning installation:

- 1 x LASCO 08-2387 Three Function Massage Shower Head (Chrome Plated)

SETUP AND INSTALLATION

Tools Required: Adjustable wrench, thread sealant (Teflon tape).

1. **Turn off Water Supply:** Locate and turn off the main water supply to your shower.
2. **Remove Old Shower Head:** Unscrew the existing shower head from the shower arm. You may need an adjustable wrench for this step. Turn counter-clockwise.
3. **Clean Shower Arm Threads:** Clean any old thread sealant or debris from the shower arm threads.
4. **Apply Thread Sealant:** Wrap the threads of the shower arm with thread sealant (Teflon tape) 3-4 times in a clockwise direction. This helps prevent leaks.
5. **Install New Shower Head:** Screw the LASCO 08-2387 shower head onto the shower arm by hand, turning clockwise until snug.
6. **Tighten:** Use an adjustable wrench to gently tighten the shower head an additional quarter to half turn. Do not overtighten.
7. **Restore Water Supply:** Turn the main water supply back on and check for leaks. If leaks occur, tighten slightly more or reapply thread sealant.

OPERATING INSTRUCTIONS

The LASCO 08-2387 Shower Head features three distinct spray functions:

- **Function 1: Full Spray** - Provides a wide, consistent water flow for general showering.
- **Function 2: Massage Spray** - Delivers a pulsating, invigorating stream.
- **Function 3: Combination Spray** - Blends the full spray and massage functions for a unique experience.

To switch between functions, simply rotate the outer ring or face of the shower head in either direction until the

desired spray pattern is achieved.

MAINTENANCE

Regular cleaning will help maintain the performance and appearance of your shower head.

- **Cleaning:** Clean the shower head regularly with a soft cloth and mild soap. Avoid abrasive cleaners, scouring pads, or harsh chemicals, as these can damage the chrome finish.
- **Mineral Deposit Removal:** If mineral deposits (limescale) accumulate on the nozzles, they can be gently scrubbed with a soft brush or soaked in a solution of equal parts white vinegar and water. For stubborn deposits, you may need to remove the shower head and soak it completely in the vinegar solution for several hours before rinsing thoroughly.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Low Water Pressure	Mineral buildup in nozzles; partially closed water valve; low household water pressure.	Clean nozzles as described in Maintenance section; ensure shower valve is fully open; consult a plumber if household pressure is consistently low.
Leaking at Connection Point	Insufficient thread sealant; loose connection.	Turn off water, remove shower head, reapply thread sealant, and re-tighten connection.
Difficulty Changing Spray Settings	Mineral buildup preventing rotation.	Clean the shower head, focusing on the rotating mechanism, using a vinegar solution if necessary.

SPECIFICATIONS

- **Model Number:** 08-2387
- **Brand:** LASCO
- **Material:** Metal
- **Finish:** Chrome Plated (Polished)
- **Number of Functions:** 3 (Full Spray, Massage Spray, Combination Spray)
- **Installation Type:** Fixed Showerhead
- **GTIN/UPC:** 052151091857
