Kingston Brass KB498

Kingston Brass KB498 Magellan Bar Faucet User Manual

Model: KB498 | Brand: Kingston Brass

PRODUCT OVERVIEW

The Kingston Brass KB498 Magellan Bar Faucet is a transitional style fixture designed for kitchen bar or prep sinks. It features a high-arc J-spout and two lever handles, offering both aesthetic appeal and functional control. Constructed from durable brass with a brushed nickel finish, this faucet is built for reliable performance and resistance to corrosion.

Figure 1: Kingston Brass KB498 Magellan Bar Faucet in Brushed Nickel finish. This image displays the Kingston Brass KB498 Magellan Bar Faucet in a brushed nickel finish, featuring a high-arc J-spout and two lever handles. The faucet is designed for a centerset installation.

SETUP AND INSTALLATION

This faucet is designed for a two-hole, 4-inch centerset deck-mount installation. It includes all necessary mounting hardware for a straightforward setup. For detailed instructions, please refer to the official Installation Manual.

Before You Begin:

- Ensure you have all components as listed in the packaging.
- Turn off the main water supply to the installation area.

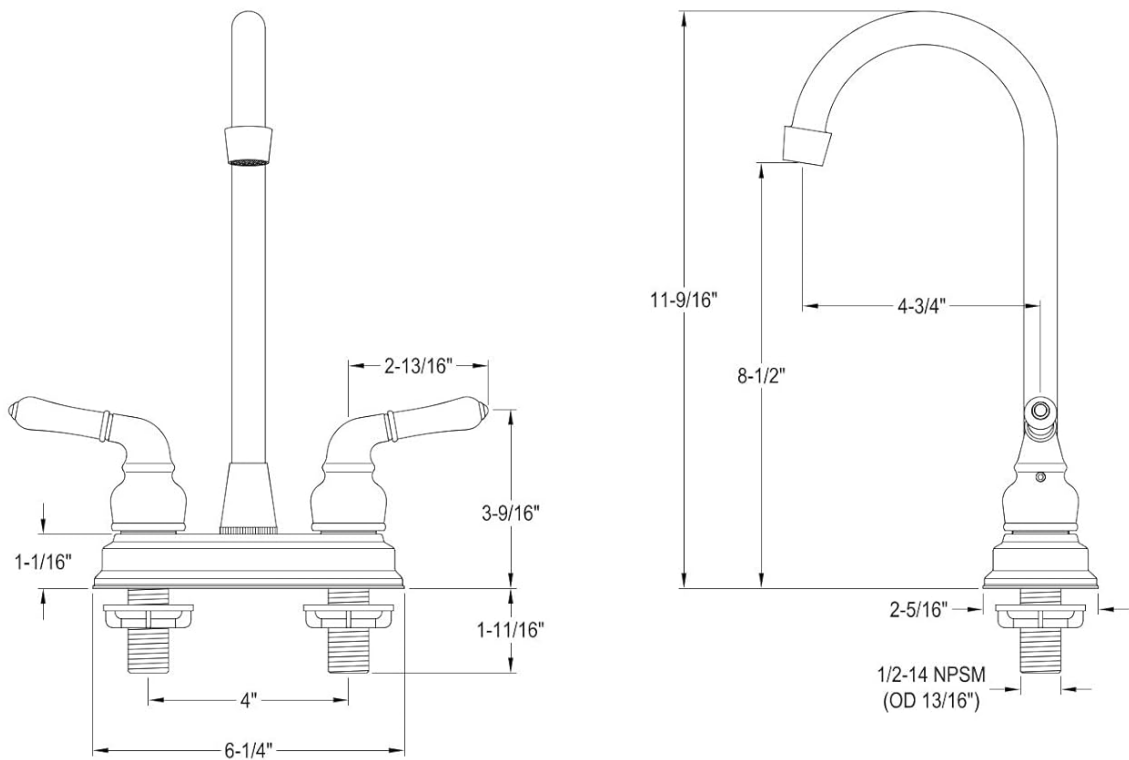

- Clear the area under the sink for easy access.

Installation Steps (Summary):

1. Prepare the sink holes for the faucet body and handles.
2. Secure the faucet body and handles to the sink deck using the provided mounting hardware.
3. Connect the hot and cold water supply lines to the faucet inlets.
4. Ensure all connections are tight to prevent leaks.
5. Test the faucet for proper operation and check for any leaks.

Figure 3: Diagram illustrating features and installation details of Kingston Brass Bar Faucet. This diagram highlights key features of the Kingston Brass Bar Faucet, such as solid brass construction, corrosion and rust-resistant finish, 1/4 turn lever handles, 2-hole installation, 1.8 GPM flow rate, and a rotating swivel spout.

OPERATING INSTRUCTIONS

The Kingston Brass KB498 Magellan Bar Faucet features a dual-handle design for precise control over water temperature and flow.

Water Control:

- **Hot Water:** Turn the left lever handle 1/4-turn counter-clockwise to open the hot water supply.
- **Cold Water:** Turn the right lever handle 1/4-turn clockwise to open the cold water supply.
- **Temperature Adjustment:** Mix hot and cold water by adjusting both handles simultaneously.
- **Flow Control:** The faucet provides a maximum flow rate of 1.8 Gallons Per Minute (GPM) at 60 PSI.

Spout Functionality:

- The high-arc spout can rotate 180 degrees, providing enhanced usability and flexibility, especially for double-basin

sinks.

MAINTENANCE

Proper maintenance will ensure the longevity and appearance of your Kingston Brass KB498 Magellan Bar Faucet. The faucet is constructed from durable brass and features a corrosion and rust-resistant brushed nickel finish.

Cleaning the Faucet:

- Use a soft, damp cloth and mild soap to clean the faucet surface.
- Avoid abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the finish.
- Rinse thoroughly with clean water and dry with a soft cloth to prevent water spots.

General Care:

- Regularly check for any signs of leaks around the base or connections.
- If water flow decreases, check the aerator for mineral buildup and clean as necessary.

TROUBLESHOOTING

This section addresses common issues you might encounter with your faucet. For more complex problems, please refer to the full installation manual or contact customer support.

Problem	Possible Cause	Solution
Low Water Flow	Clogged aerator; partially closed shut-off valve; low water pressure in home.	Remove and clean aerator; ensure shut-off valves are fully open; consult a plumber if home water pressure is consistently low.
Leaking from Spout	Worn washerless cartridge.	Contact customer support for replacement cartridge and installation guidance.
Leaking from Base	Loose connections; improper sealing during installation.	Check and tighten all connections under the sink; ensure proper use of plumber's putty or silicone sealant during installation.
Spout Wiggles/Loose	Mounting nut under the sink is loose.	Access the underside of the sink and carefully tighten the mounting nut that secures the spout. Avoid over-tightening.
