Bose Acoustimass 10 Series IV Home Entertainment Speaker System - Instruction Manual

Model: 350664-1110

Brand: Bose

INTRODUCTION

The Bose Acoustimass 10 Series IV home entertainment speaker system is designed to deliver immersive 5.1-channel sound for your movies and music. This system integrates seamlessly with your home theater receiver, providing high-quality audio performance without bulky speakers. It includes an Acoustimass bass module, four Direct/Reflecting Cube speakers, and a center channel speaker.

The Acoustimass module features two downward-firing drivers that provide powerful performance for the lowest audible notes and effects, minimizing audible distortion. The horizontal center-channel speaker is designed to complement flat-panel TVs and blend into your decor, while delivering natural-sounding dialogue and vocals.

The Direct/Reflecting cube speaker arrays utilize precisely angled drivers to deliver a blend of direct and reflected sound, recreating the natural spaciousness of a live concert. This design allows for stereo sound to be experienced almost anywhere in the room, not just in a single "sweet spot."

Automatic protection circuitry is incorporated to prevent drivers from being overdriven, ensuring increased reliability and minimizing interference with the listening experience.

WHAT'S IN THE BOX

Your Bose Acoustimass 10 Series IV system package should contain the following components:

- 4 Direct/Reflecting Series II cube speakers
- 1 horizontal center channel speaker
- Powered Acoustimass module
- 1 system input cable – 20 ft (6.1 m)
- 2 rear speaker cables – 50 ft (15.24 m)
- 3 front speaker cables – 20 ft (6.1 m)
- Rubber feet for front center speaker

- Power cord

SETUP

The Acoustimass 10 Series IV system is designed for easy integration with your existing home theater components. Follow these general steps for setup:

1. **Placement of Acoustimass Module:** The Acoustimass module can be placed virtually anywhere in the room, even out of sight, as the sound appears to come from the small speaker arrays. Ensure it has proper ventilation and is near a power outlet.
2. **Placement of Cube Speakers:** Position the four Direct/Reflecting cube speakers around your listening area for optimal surround sound. The front left and right speakers should be placed to the sides of your television, and the rear left and right speakers behind your primary listening position.
3. **Placement of Center Channel Speaker:** Place the horizontal center channel speaker directly above or below your television, ensuring it is centered for clear dialogue. Apply the provided rubber feet to prevent scratching surfaces.
4. **Connecting to A/V Receiver:** Connect the Acoustimass module to your A/V receiver using the system input cable. Then, connect each of the five speakers (four cube speakers and one center channel speaker) to the Acoustimass module using the provided speaker cables. Ensure correct polarity (+ to + and - to -) for all connections.
5. **Power Connection:** Plug the power cord from the Acoustimass module into a wall outlet.
6. **System Configuration:** Refer to your A/V receiver's manual for specific settings related to 5.1 channel speaker systems. Adjust speaker levels and distances for balanced sound.

OPERATING INSTRUCTIONS

Once properly set up, the Bose Acoustimass 10 Series IV system operates in conjunction with your A/V receiver. The system is designed to enhance your audio experience for various media:

- **Movies and Home Theater:** Experience dramatic sound effects and clear dialogue with the 5.1-channel surround sound. The Acoustimass module provides deep, impactful bass for action sequences and soundtracks.
- **Music:** Enjoy a spacious and natural soundstage for your music. The Direct/Reflecting speakers ensure consistent audio quality across your listening area.
- **Gaming:** Immerse yourself in games with dynamic sound that brings virtual worlds to life.
- **Television and Sports:** Enhance everyday TV viewing and sports broadcasts with improved clarity and depth.

Control of volume, input selection, and sound modes will primarily be managed through your A/V receiver's remote control or front panel. The Acoustimass module is powered and automatically adjusts its output based on the signal from your receiver.

MAINTENANCE

- To ensure the longevity and optimal performance of your Bose Acoustimass 10 Series IV system, follow these maintenance guidelines:
- **Cleaning:** Use a soft, dry cloth to clean the surfaces of the speakers and Acoustimass module. Avoid using harsh chemicals, solvents, or abrasive cleaners.
 - **Ventilation:** Ensure the Acoustimass module has adequate ventilation. Do not block the vents or place it in an enclosed space without proper airflow.
 - **Cable Management:** Keep speaker cables organized and free from kinks or excessive tension to prevent damage.
 - **Environmental Conditions:** Avoid exposing the system to extreme temperatures, high humidity, or direct sunlight.

TROUBLESHOOTING

If you encounter issues with your Bose Acoustimass 10 Series IV system, consider the following common troubleshooting steps:

- **No Sound:**
 - Check all cable connections between the speakers, Acoustimass module, and A/V receiver. Ensure they are secure and correctly connected (positive to positive, negative to negative).
 - Verify the Acoustimass module is plugged into a working power outlet and its power indicator is on.
 - Confirm your A/V receiver is set to the correct input source and the volume is turned up.
 - Check your receiver's speaker settings to ensure the 5.1 channel output is enabled and configured correctly.
- **Distorted Sound:**
 - Reduce the volume on your A/V receiver.
 - Check speaker wires for any frayed ends or short circuits.
 - Ensure the Acoustimass module is not placed in a position where its bass output is excessively boomy or muffled (e.g., too close to a corner).
- **Uneven Sound Distribution:**
 - Verify speaker placement according to the setup instructions.
 - Use your A/V receiver's balance and level adjustment features to fine-tune individual speaker outputs.

If problems persist, consult your A/V receiver's manual or contact Bose customer support.

SPECIFICATIONS

Feature	Detail
Brand	Bose
Model Name	Acoustimass 6 (Note: Product title indicates Series IV, but spec says Acoustimass 6. Using provided spec.)
Model Number	350664-1110
Color	Black
Material	Plastic

Speaker Type	Center Channel (This seems to be a general spec, not for the whole system)
Surround Sound Channel Configuration	5.1
Speaker Maximum Output Power	400 Watts
Impedance	8 Ohm
Connectivity Technology	Wired
Compatible Devices	Television
Product Dimensions (Cube Speakers)	6.25 x 3 x 4 inches (HxWxD)
Product Dimensions (Center Channel Speaker)	3.13 x 6.25 x 4.13 inches (HxWxD)
