Model: 708

INTRODUCTION

The Revlon Magnifeye 10x Tweezing Mirror is designed to provide powerful 10x magnification for precise grooming. It helps in identifying even the tiniest, finest hairs for flawless results. This mirror features suction cups for convenient hands-free use on smooth surfaces.

Revlon Beauty Tools are crafted with precision and inspected to ensure exceptional performance and quality.

KEY FEATURES

- **10x Magnification:** Provides a highly magnified view for detailed grooming.
- **Suction Cups:** Allows for hands-free attachment to any smooth, clean surface.
- **Compact Design:** Portable and easy to handle.
- **Durable Construction:** Precision crafted for long-lasting use.

SETUP AND INSTALLATION

To set up your Revlon Magnifeye 10x Tweezing Mirror:

1. Identify a smooth, clean surface such as a vanity mirror, bathroom mirror, or tiled wall.
2. For enhanced holding power, slightly moisten the suction cups on the back of the mirror.
3. Firmly press the tweezing mirror onto the chosen smooth surface, ensuring the suction cups adhere securely.

To remove the mirror, gently lift up the edge of each suction cup and pull the mirror away from the surface.

MAINTENANCE AND CARE

To ensure the clearest and most precise reflection, keep your Revlon Magnifeye 10x Tweezing Mirror clean. Wipe the mirror surface with a soft, lint-free cloth. For stubborn smudges, a small amount of glass cleaner can be applied to the cloth (not directly to the mirror) and then wiped clean. Avoid abrasive cleaners or materials that could scratch the mirror surface.

TROUBLESHOOTING

- **Mirror not sticking to surface:**

Ensure the surface is clean, dry, and smooth. Dust, dirt, or textured surfaces can prevent proper suction. Slightly moistening the suction cups before pressing them firmly onto the surface can improve adhesion.

- **Image appears distorted or blurry:**

This is a 10x magnification mirror, which means it has a very short focal distance. Move closer to the mirror until

the image becomes clear. The optimal viewing distance is typically a few inches from the mirror surface. Ensure the mirror surface is clean and free of smudges.
