Cuisinart ICE-45RFB

Cuisinart ICE-45RFB 1-1/2-Quart Ice Cream Maker Freezer Bowl

Instruction Manual

Introduction

This manual provides essential information for the proper use and care of your Cuisinart ICE-45RFB 1-1/2-Quart Ice Cream Maker Freezer Bowl. This freezer bowl is designed as a replacement or additional component for the Cuisinart ICE-45 Mix It In Soft Serve Ice Cream Maker. Please read all instructions before first use to ensure optimal performance and longevity of your product.

Figure 1: The Cuisinart ICE-45RFB 1-1/2-Quart Ice Cream Maker Freezer Bowl. This white, cylindrical bowl is a key component for making frozen desserts.

Important Safeguards

- Always handle the frozen bowl with care to avoid dropping it, which could cause damage.
- Do not place the freezer bowl in a dishwasher. Hand wash only.
- Avoid using abrasive cleaners or scouring pads, as these can scratch the surface of the bowl.
- Ensure the bowl is completely dry before placing it in the freezer to prevent ice buildup on the exterior.
- Do not expose the bowl to direct heat sources, such as stovetops or ovens.

Setup

1. Initial Cleaning

Before first use, wash the freezer bowl by hand with warm, soapy water. Rinse thoroughly and dry completely with a soft

cloth. Ensure no water remains inside the double-insulated walls.

2. Freezing the Bowl

For optimal results, the freezer bowl must be completely frozen. Place the empty freezer bowl in the coldest part of your freezer for at least **16 to 24 hours**. The bowl contains a special cooling liquid sealed within its double-insulated walls that needs to be fully frozen to properly churn and freeze your dessert mixture. A properly frozen bowl will not slosh when shaken.

Figure 2: The double-insulated design of the freezer bowl ensures maximum chilling performance. Prepare ahead by freezing the bowl for 16-24 hours.

Operating Instructions

This freezer bowl is designed for use with the Cuisinart ICE-45 Mix It In Soft Serve Ice Cream Maker. Refer to your ICE-45 machine's instruction manual for specific assembly and operation details.

1. **Prepare Your Mixture:** Prepare your desired ice cream, frozen yogurt, sorbet, or gelato mixture according to your recipe. Ensure the mixture is chilled before adding it to the machine.
2. **Assemble the Machine:** Once the freezer bowl is thoroughly frozen, remove it from the freezer. Place it into the base of your Cuisinart ICE-45 machine.
3. **Attach Paddle and Lid:** Insert the mixing paddle into the freezer bowl and secure the lid onto the machine base.
4. **Start Churning:** Turn on the Cuisinart ICE-45 machine. Once the paddle begins to rotate, slowly pour your chilled mixture through the opening in the lid.
5. **Process Time:** Allow the machine to churn for approximately 20-25 minutes, or until the mixture reaches your desired consistency. The double-insulated walls and quick-freezing liquid maintain a low temperature for even freezing.
6. **Serve or Store:** Once complete, turn off the machine. Serve immediately for a soft-serve consistency, or transfer to an airtight container and place in the freezer for a firmer texture.

Maintenance and Cleaning

Cleaning the Freezer Bowl

- After each use, allow the freezer bowl to reach room temperature before cleaning. This prevents damage from extreme temperature changes.
- Wash the bowl by hand with warm, soapy water.
- Rinse thoroughly with clean water.
- Dry the bowl completely with a soft cloth before storing or placing it back in the freezer.
- **Do not wash in a dishwasher.** The extreme heat of a dishwasher can damage the bowl and its internal cooling liquid.

Storage

Store the clean, dry freezer bowl in a cabinet or in the freezer, ready for its next use. Storing it in the freezer ensures it's always ready for spontaneous dessert making.

Troubleshooting

Problem	Possible Cause	Solution
Mixture does not freeze or remains too soft.	Freezer bowl was not sufficiently frozen.	Ensure the freezer bowl is frozen for a minimum of 16-24 hours. The bowl should not slosh when shaken.
Mixture was too warm when added.	Chill your mixture thoroughly in the refrigerator for at least 2 hours before churning.	
Ice cream has ice crystals.	Mixture was not churned long enough or contains too much water.	Ensure proper churning time. Adjust recipe to reduce water content if necessary.

Specifications

- **Model:** ICE-45RFB
- **Capacity:** 1.5 Quarts
- **Dimensions (L x W x H):** 7.12" x 7.12" x 6.25"
- **Weight:** 4.4 pounds
- **Compatibility:** Cuisinart ICE-45, ICE-45P1 Mix It In Soft Serve Ice Cream Maker
- **Care:** Hand Wash Only

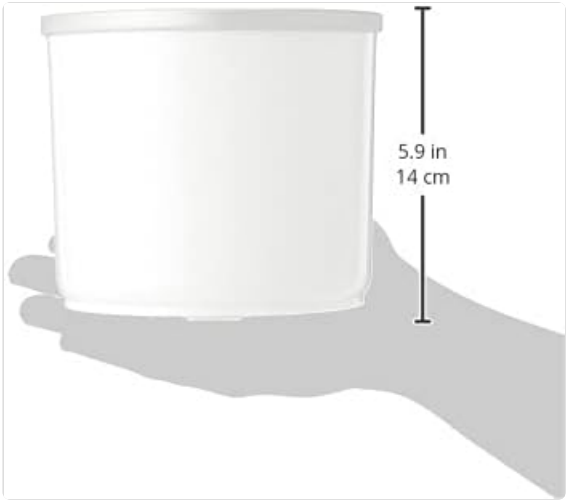

Figure 3: The Cuisinart ICE-45RFB freezer bowl measures approximately 5.9 inches (14 cm) in height.

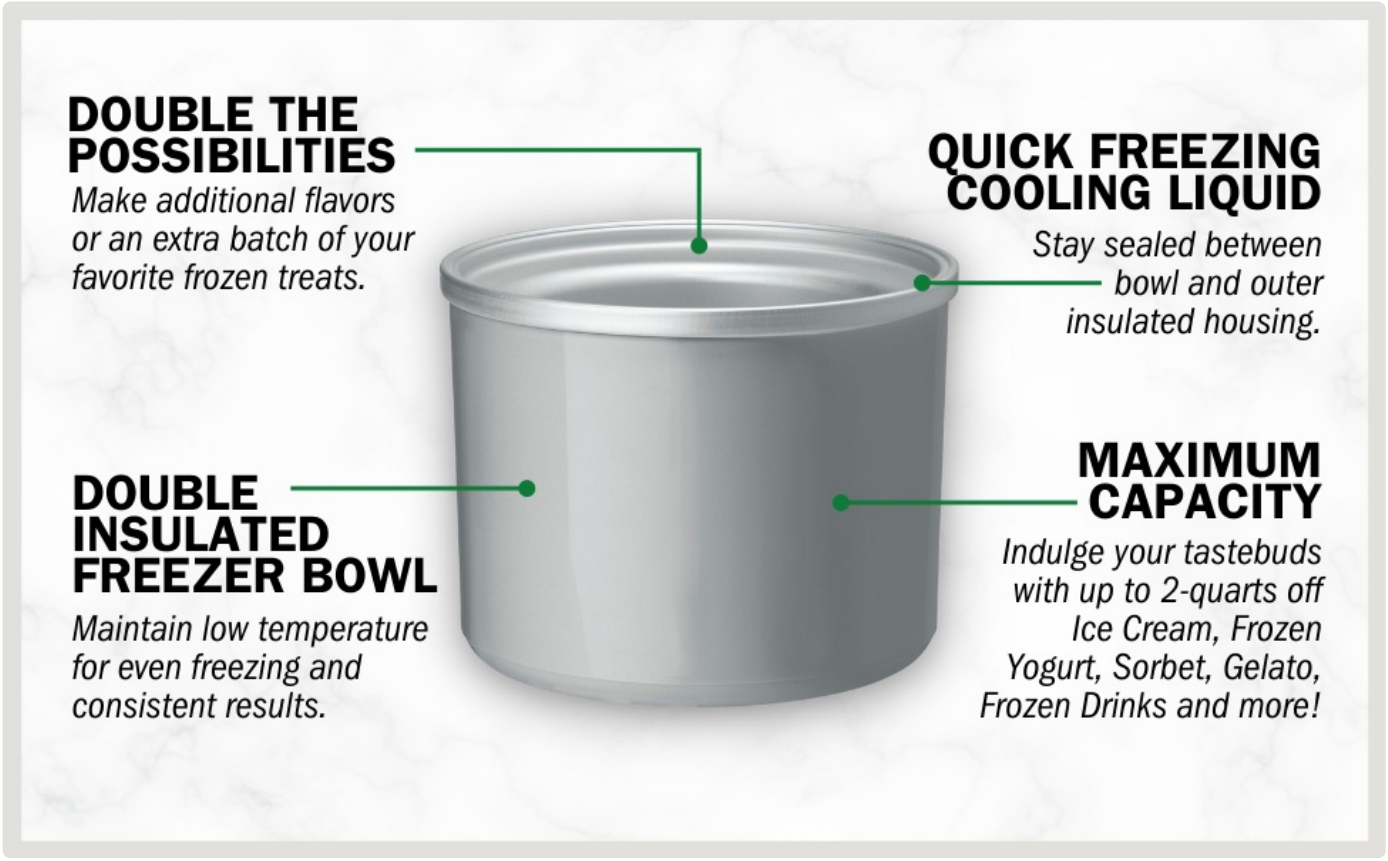

Figure 4: Key features include double-insulated walls for consistent results, quick-freezing cooling liquid, and a maximum capacity of 1.5 quarts.
