Intex 66967E

Intex Prestige Downy Airbed Kit Instruction Manual

MODEL: 66967E

Product Overview

The Intex Prestige Downy Airbed Kit provides a comfortable and portable sleeping solution, ideal for both rugged outdoor adventures and as an extra bed for guests at home. Featuring a durable construction and a soft flocked sleeping surface, this airbed is designed for ease of use and long-lasting comfort.

The Intex Prestige Downy Airbed, fully inflated and ready for use.

Package Contents

Please ensure all items listed below are included in your package:

- Intex Prestige Downy Airbed (Twin Size)
- Hand-Held Battery Pump
- Carry Bag (integrated with shelf box)

Setup Instructions

1. **Prepare the Area:** Choose a flat, clear area free of sharp objects.
2. **Unfold the Airbed:** Carefully remove the airbed from its carry bag and unfold it completely.
3. **Insert Batteries into Pump:** The hand-held battery pump requires 6 'C' size batteries (not included). Open the battery compartment and insert the batteries according to the polarity indicators.
4. **Attach Pump to Valve:** Locate the 3-in-1 valve on the airbed. Open the cap. Attach the appropriate nozzle from the battery pump to the valve opening, ensuring a snug fit.
5. **Inflate the Airbed:** Turn on the battery pump. Allow the airbed to inflate until it reaches your desired firmness. Do not overinflate.
6. **Seal the Valve:** Once inflated, quickly remove the pump and securely close the valve cap to prevent air leakage.

The airbed features a 3-in-1 valve for quick inflation and deflation.

Operation

The Intex Prestige Downy Airbed is designed for comfortable sleeping. It has a maximum weight capacity of 300 pounds.

Deflation:

1. Open the 3-in-1 valve cap.
2. Allow air to escape naturally. For faster deflation, attach the pump to the 'deflate' port (if available on your pump model) and turn it on.
3. Once deflated, fold the airbed compactly for storage.

The soft flocked top provides a comfortable sleeping surface.

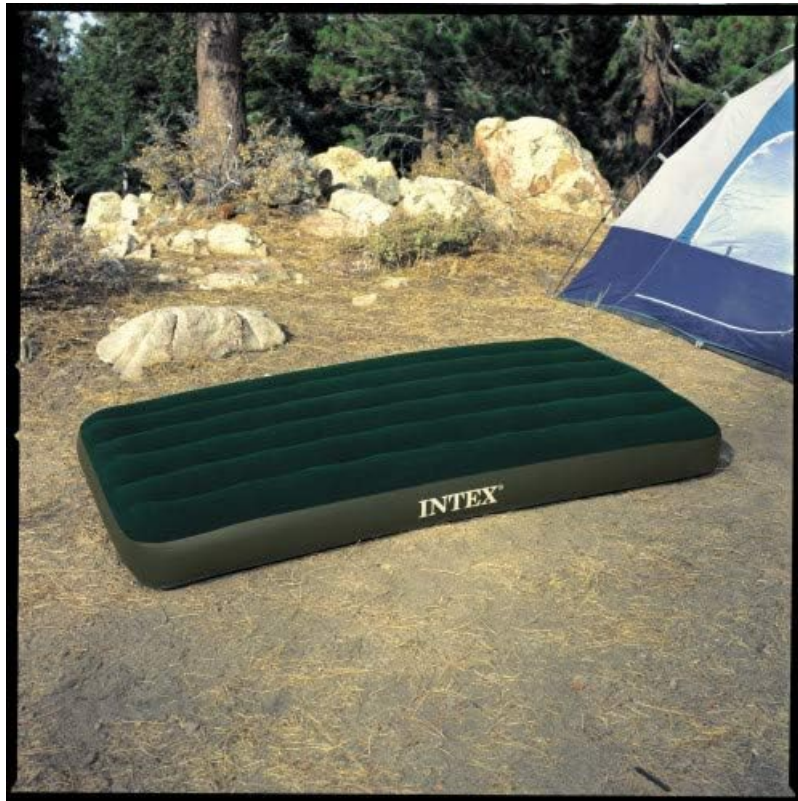

Maintenance

Cleaning:

Spot clean the airbed with mild soap and water. Do not use harsh chemicals or abrasive cleaners, as this may damage the flocked surface or vinyl material. Ensure the airbed is completely dry before storing.

Storage:

After deflating and cleaning, fold the airbed compactly. Store it in its original carry bag in a cool, dry place, away from direct sunlight and extreme temperatures. Avoid placing heavy objects on top of the folded airbed.

The airbed can be compactly folded for easy storage and transport.

Troubleshooting

- **Airbed Losing Air:**
 - Ensure the 3-in-1 valve cap is securely closed.
 - Check for punctures or small holes. A patch kit (not included) can be used for minor repairs.
 - Verify that the pump nozzle was properly sealed during inflation.
- **Pump Not Working:**
 - Check if the batteries are inserted correctly and are not depleted. Replace batteries if necessary.
 - Ensure the pump's power switch is in the 'ON' position.

Specifications
