Casio AQ-230A Unisex Watch Instruction Manual

Model: AQ-230A-1D

INTRODUCTION

Welcome to your new Casio AQ-230A watch. This timepiece combines classic analog aesthetics with modern digital functionality, offering versatility and precision. Its sleek design and durable construction make it suitable for various occasions.

The Casio AQ-230A features a rectangular black analog dial with a digital display at the bottom, encased in a polished stainless steel housing and paired with a matching stainless steel bracelet.

INITIAL SETUP

Setting the Analog Time

The analog time is set using the crown on the right side of the watch. Pull the crown out to the first click position. Rotate the crown to adjust the hour and minute hands to the desired time. Push the crown back in to set the time.

Setting the Digital Time and Date

The digital display offers various modes including time, date, stopwatch, and alarm. Use the buttons on the sides of the watch to navigate through these modes and adjust settings. Refer to the detailed operating instructions for specific button functions.

Band Adjustment

The stainless steel bracelet is adjustable. For optimal comfort, ensure the band is not too tight or too loose. Professional adjustment by a jeweler is recommended for link removal or addition.

CARE AND MAINTENANCE

Cleaning

Wipe the watch regularly with a soft, dry cloth to remove dirt and moisture. For the stainless steel band, a slightly damp cloth can be used, followed by immediate drying. Avoid harsh chemicals.

Water Resistance

The watch is water resistant. However, it is not suitable for swimming or diving. Avoid operating buttons while the watch is wet.

Battery Replacement

The watch is powered by a Lithium Metal battery. When the display dims or functions become erratic, it may be time for a battery replacement. It is recommended to have the battery replaced by a qualified watch technician to ensure water resistance is maintained.

TROUBLESHOOTING

Digital Display is Blank or Dim

Cause: Low battery.

Solution: Replace the battery.

Analog Hands Not Moving

Cause: Crown is pulled out, or battery is low.

Solution: Push the crown in completely. If still not moving, replace the battery.

Time is Inaccurate

Cause: Time not set correctly, or watch exposed to strong magnetic fields.

Solution: Reset both analog and digital times. Keep the watch away from strong magnets.
