Armitron 75-2475

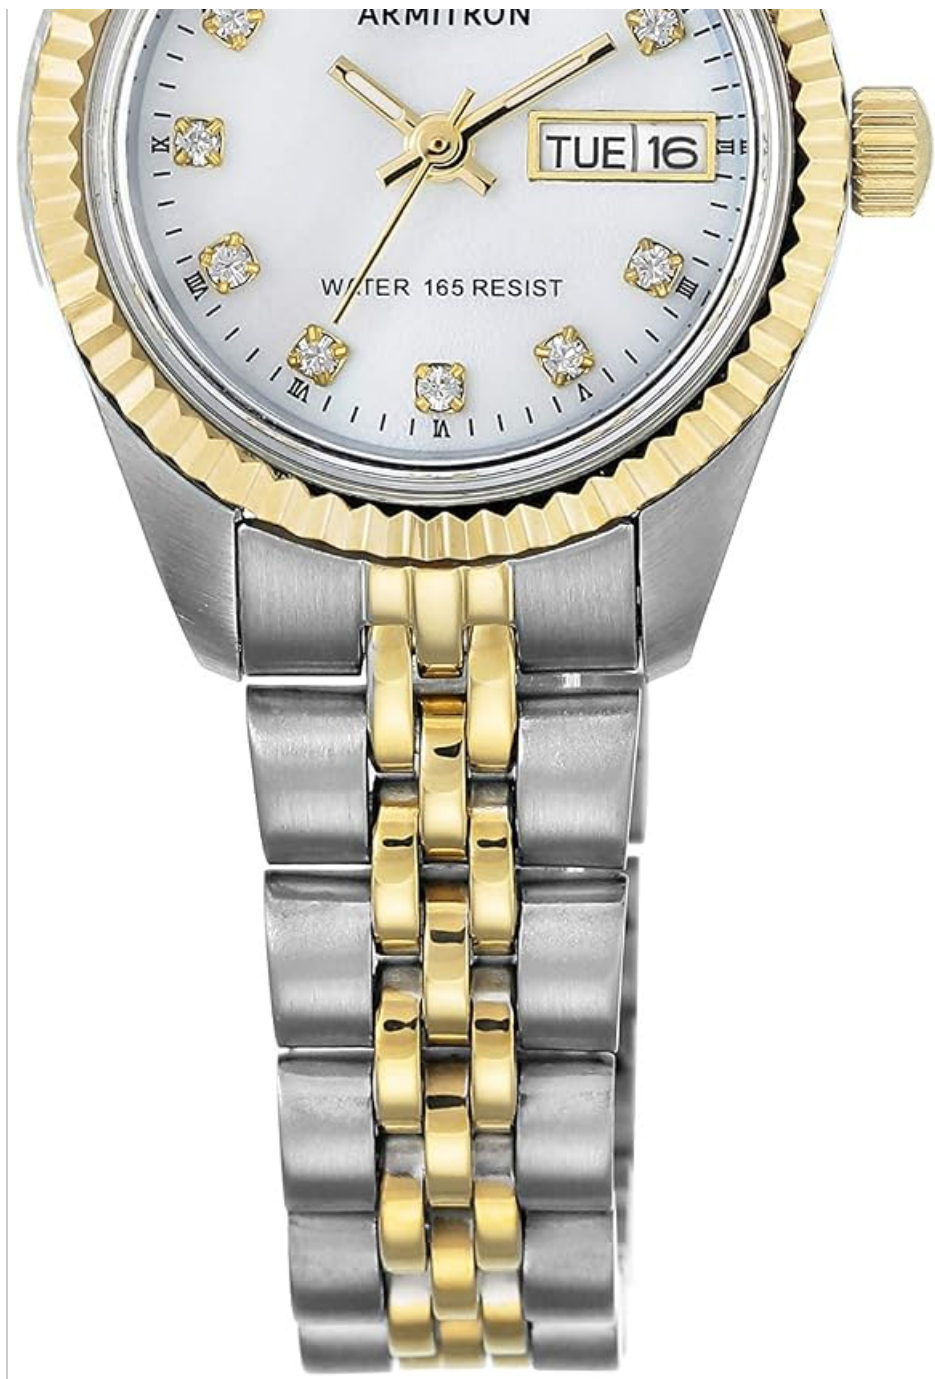

Armitron Women's 75-2475 Crystal Accented Bracelet Watch Instruction Manual

Model: 75-2475

INTRODUCTION

This manual provides detailed instructions for the setup, operation, and maintenance of your Armitron Women's 75-2475 Crystal Accented Bracelet Watch. Your watch features a scratch-resistant mineral crystal lens and reliable Japanese quartz movement, designed for accurate timekeeping and durability.

INITIAL SETUP

Setting Time and Date

1. **Time Adjustment:** Gently pull the crown (the small knob on the side of the watch) outwards to the furthest position. Rotate the crown to set the hour and minute hands to the correct time. Push the crown back in to secure the time setting.
2. **Date Adjustment:** Pull the crown outwards to the first position. Rotate the crown to adjust the day and date. Note that the day and date may be displayed in English and another language. Push the crown back in to secure the date setting.

Bracelet Resizing

The watch bracelet is designed for an inner circumference range of 6.6 to 7.25 inches. For minor adjustments, the bracelet can be resized. This typically involves adjusting the clasp or removing links.

- **Clasp Adjustment:** Some clasps allow for fine-tuning by moving the spring bar to different holes within the clasp itself. Use a thin metal object, such as a thumb tack or paper clip, to depress the spring bar and reposition it.

- **Link Removal:** For significant size reduction, links may need to be removed. This process often requires specialized tools and is best performed by a professional jeweler to prevent damage to the bracelet.

For detailed sizing inquiries or assistance, please contact customer support at (866) 631-0342 or email servicedept@egluck.com.

OPERATING YOUR WATCH

Timekeeping

Your Armitron watch utilizes a precise Japanese quartz movement for accurate timekeeping. Once the time and date are set, the watch will operate continuously until the battery requires replacement.

Water Resistance

This watch is water resistant to 165 feet (50 meters). This rating means the watch is suitable for short periods of recreational swimming, but not for diving or snorkeling. Avoid operating the crown while the watch is wet to prevent water intrusion.

CARE AND MAINTENANCE

Cleaning Your Watch

To maintain the appearance of your watch, regularly wipe the case and bracelet with a soft, dry cloth. For more thorough cleaning, a slightly damp cloth can be used, followed by immediate drying. Avoid using harsh chemicals or abrasive materials, which can damage the finish or crystal.

Battery Replacement

Your watch is powered by one product-specific battery (included). When the watch stops or the second hand begins to skip, it indicates that the battery needs replacement. It is recommended to have battery replacement performed by a qualified watch technician to ensure proper sealing and maintain water resistance.

Storage

When not wearing your watch, store it in a cool, dry place away from direct sunlight and extreme temperatures. This helps preserve the watch's components and finish.

TROUBLESHOOTING

- **Watch Not Running:** Ensure the crown is fully pushed in. If the watch still does not run, the battery may need replacement.
- **Incorrect Time/Date:** Refer to the "Setting Time and Date" section under Initial Setup to correctly adjust.
- **Condensation Under Crystal:** If condensation appears under the crystal, it may indicate a breach in the water resistance. Have the watch inspected by a professional immediately to prevent further damage.

For issues not covered here, please contact Armitron customer support.

SPECIFICATIONS

Model Number	75-2475
Movement	Japanese Quartz
Case Diameter	24.5 mm
Band Width	12 mm
Water Resistance	165 feet (50 meters)
Crystal Material	Mineral Crystal
