Armitron 75/2447BLK

Armitron Women's 75/2447 Diamond-Accented Leather Strap Watch User Manual

Model: 75/2447BLK

INTRODUCTION

Thank you for choosing the Armitron Women's 75/2447 Diamond-Accented Leather Strap Watch. This timepiece combines classic elegance with reliable Japanese quartz movement, featuring a scratch-resistant mineral crystal lens and a genuine leather band. This manual provides essential information for setting up, operating, maintaining, and troubleshooting your watch to ensure long-lasting performance and enjoyment.

Figure 1: Front view of the Armitron Women's 75/2447 Diamond-Accented Leather Strap Watch with black leather strap and gold-tone accents.

SETUP

Setting the Time

1. Locate the crown (the small knob on the side of the watch case).
2. Gently pull the crown outwards to the time-setting position. You may feel a slight click.
3. Turn the crown clockwise or counter-clockwise to adjust the hour and minute hands to the correct time.
4. Once the time is set, push the crown back into its original position against the watch case. This will start the watch movement.

Battery Information

Your Armitron watch comes with a pre-installed product-specific battery. The Japanese quartz movement ensures

accurate timekeeping. The typical lifespan of the battery is approximately 1.5 to 2 years under continuous operation.

OPERATING INSTRUCTIONS

Wearing Your Watch

The watch features a smooth leather band with a traditional buckle closure. Adjust the strap to a comfortable fit on your wrist, ensuring it is not too tight or too loose. The watch is designed for daily wear and complements various styles.

MAINTENANCE

Cleaning Your Watch

- **Watch Case and Crystal:** Wipe the watch case and mineral crystal lens with a soft, dry, lint-free cloth. For stubborn smudges, slightly dampen the cloth with water and wipe gently, then dry immediately.

- **Leather Strap:** Leather straps can be cleaned with a slightly damp cloth. Avoid excessive moisture, harsh chemicals, or abrasive cleaners, as these can damage the leather. Allow the strap to air dry completely before wearing.
- Avoid submerging the watch in water or exposing it to steam, as it is not specified as water-resistant.

Battery Replacement

When the watch stops running or begins to lose time consistently, it is likely that the battery needs replacement. It is recommended to have the battery replaced by a qualified watch technician to ensure proper sealing and function of the watch.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch is not running.	Battery depleted or crown is pulled out.	Push the crown fully in. If it still doesn't run, the battery may need replacement.
Time is inaccurate.	Low battery or internal movement issue.	Replace the battery. If the problem persists, contact customer support.
Strap feels uncomfortable.	Strap is too tight or too loose.	Adjust the buckle to a different hole for a more comfortable fit. Leather straps may soften with wear.
