

RUBI TX-1020 MAX

Rubi Tools TX-1020 MAX Professional Tile Cutter

Instruction Manual

1. INTRODUCTION

This manual provides comprehensive instructions for the safe and effective use, assembly, operation, and maintenance of your Rubi Tools TX-1020 MAX Professional Tile Cutter. Designed for intensive cutting of all types of ceramic and porcelain tiles, this tool offers precision and power for professional applications. Please read this manual thoroughly before operating the tile cutter to ensure optimal performance and user safety.

Key Features:

- 1200kg (2645 lbs) of breaking power for demanding materials.
- Ergonomic handle with soft grip for enhanced comfort and control.
- Equipped with two supplementary arms for stable support of large format tiles.
- Galvanized steel floating tables to increase stability during cutting.
- Breaker's lock and unlocking system via trigger for efficient operation on various material thicknesses.
- Includes 8mm and 22mm EXTREME scoring wheels for versatile cutting.

2. SAFETY INSTRUCTIONS

Always adhere to the following safety guidelines to prevent injury and ensure proper operation of the tile cutter.

- **Read the Manual:** Familiarize yourself with all instructions and warnings before use.
- **Wear Personal Protective Equipment (PPE):** Always wear safety glasses to protect against flying debris. Gloves are recommended for handling tiles and the cutter.
- **Stable Work Surface:** Ensure the tile cutter is placed on a flat, stable, and level surface to prevent tipping or movement during operation.
- **Keep Work Area Clear:** Remove any obstructions, tools, or debris from the work area.
- **Proper Lighting:** Operate the tool in a well-lit area.
- **Inspect the Tool:** Before each use, check the tile cutter for any damaged or loose parts. Do not

operate if any components are compromised.

- **Secure the Tile:** Always ensure the tile is properly positioned and stable before scoring and breaking.
- **Handle with Care:** The scoring wheel is sharp. Avoid direct contact with the scoring wheel.
- **Children and Bystanders:** Keep children and bystanders at a safe distance from the work area.
- **Storage:** Store the tile cutter in a dry, secure place, out of reach of children.

3. PRODUCT COMPONENTS

Understand the various parts of your Rubi Tools TX-1020 MAX tile cutter for correct assembly and operation.

Figure 1: Overall view of the Rubi Tools TX-1020 MAX Professional Tile Cutter, showcasing its robust red base, silver cutting bed, and chrome guide bars.

- **Base:** The main red frame providing stability and support.
- **Cutting Bed (Floating Tables):** Galvanized steel surfaces where the tile rests, designed to provide stability and absorb impact during breaking.
- **Guide Bars:** Chrome-plated steel bars that guide the scoring carriage.
- **Scoring Carriage:** The assembly that holds the scoring wheel and moves along the guide bars.
- **Scoring Wheel:** The cutting tool that scores the tile surface. The TX-1020 MAX includes 8mm and 22mm EXTREME scoring wheels.
- **Breaker Mechanism:** Integrated system for applying pressure to break the scored tile. Features a lock and unlock trigger.
- **Handle:** Ergonomic handle with soft grip for controlling the scoring carriage and breaker.
- **Lateral Stop / Measuring Bar:** An adjustable guide for precise and repetitive cuts.
- **Supplementary Arms:** Two extendable arms to support larger tiles, ensuring stability during cutting.

Figure 2: View of the tile cutter from an angle, highlighting the adjustable lateral stop and one of the supplementary arms extended for supporting larger tiles.

Figure 3: Detailed view of the scoring carriage and breaker mechanism, showing the red lever and the scoring wheel holder.

4. ASSEMBLY AND SETUP

The Rubi Tools TX-1020 MAX is largely pre-assembled. Follow these steps for initial setup:

1. **Unpacking:** Carefully remove the tile cutter and all accessories from its hard-shell case.
2. **Placement:** Place the tile cutter on a sturdy, level, and clean work surface.
3. **Install Lateral Stop:** Attach the lateral stop (measuring bar) to the designated slot on the front of the

cutter. Secure it using the provided knob.

4. **Extend Supplementary Arms:** For larger tiles, pull out the two supplementary arms located on the sides of the base to provide additional support.
5. **Scoring Wheel Selection:** Ensure the correct scoring wheel (8mm or 22mm EXTREME) is installed in the scoring carriage, suitable for the tile material and thickness you intend to cut. Refer to the scoring wheel replacement section if you need to change it.

5. OPERATING INSTRUCTIONS

Follow these steps for precise and effective tile cutting:

1. **Prepare the Tile:** Clean the tile surface. Mark the desired cut line clearly on the tile.
2. **Position the Tile:** Place the tile on the cutting bed, aligning the marked cut line with the scoring line on the cutter. Use the lateral stop to ensure accurate and repeatable cuts. For large tiles, ensure the supplementary arms are extended for full support.

Figure 4: A user carefully positioning a large format tile on the cutter, aligning the cut line with the scoring guide.

3. **Engage Scoring Wheel:** Lower the handle so the scoring wheel makes contact with the tile surface. Ensure the breaker mechanism is in the 'unlocked' position (usually by releasing the trigger).
4. **Score the Tile:** Apply firm, consistent pressure on the handle and push the scoring carriage along the guide bars in a single, continuous motion from the edge of the tile closest to you, away from your body, to the opposite edge. A clear, audible scoring sound indicates proper contact. Avoid multiple passes, as this can lead to uneven breaks.

Figure 5: Close-up of a user's hand on the ergonomic handle, demonstrating the scoring motion with the wheel engaged on the tile surface.

5. **Position for Breaking:** Once the score line is complete, retract the scoring carriage to a position where the breaker mechanism is directly over the edge of the tile closest to you, or slightly past the center of the tile, depending on the tile size and material.
6. **Break the Tile:** Engage the breaker mechanism by pressing the trigger or lever (if applicable) to lock it into breaking position. Apply downward pressure on the handle. The 2645 lbs of breaking power will cleanly snap the tile along the scored line.

Figure 6: A user applying downward pressure on the handle to activate the breaker mechanism, cleanly separating the tile along the scored line.

7. **Remove Cut Pieces:** Carefully remove the two pieces of the cut tile.

6. MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your tile cutter.

- **Cleaning:** After each use, clean the guide bars, cutting bed, and scoring carriage to remove tile dust and debris. A dry cloth is usually sufficient. For stubborn residue, a damp cloth followed by drying is recommended.
- **Lubrication:** Periodically apply a light machine oil to the guide bars to ensure smooth movement of the scoring carriage.
- **Scoring Wheel Inspection:** Regularly inspect the scoring wheel for wear or damage. A dull or chipped wheel will result in poor cuts and increased effort.
- **Scoring Wheel Replacement:** To replace the scoring wheel, consult the specific instructions for your scoring carriage model. Generally, this involves loosening a screw or lever, removing the old wheel, and inserting a new one, ensuring it is securely fastened.
- **Storage:** Store the tile cutter in its hard-shell case in a dry, dust-free environment to protect it from damage and corrosion.

7. TROUBLESHOOTING

Refer to this section for solutions to common issues encountered during operation.

Problem	Possible Cause	Solution
Uneven or jagged cuts	Dull or damaged scoring wheel; inconsistent scoring pressure; multiple scoring passes; tile not stable.	Replace scoring wheel; apply consistent, firm pressure in a single pass; ensure tile is firmly supported.
Difficulty breaking tile	Insufficient scoring depth; incorrect scoring wheel for tile type; breaker not positioned correctly; insufficient breaking force.	Ensure a clear score line; use appropriate scoring wheel (e.g., 22mm for textured/harder tiles); reposition breaker over the score line; apply more downward pressure.
Scoring carriage sticks or moves roughly	Guide bars are dirty or dry; debris on guide bars.	Clean and lubricate guide bars.
Tile slides during scoring	Tile not properly secured; cutting bed is dirty.	Ensure tile is firmly against the lateral stop and supported; clean the cutting bed.

8. TECHNICAL SPECIFICATIONS

Detailed specifications for the Rubi Tools TX-1020 MAX Professional Tile Cutter.

Feature	Specification
---------	---------------

Feature	Specification
Model Number	TX-1020 MAX
Part Number	17976
Cutting Length	40 inches (102 cm)
Breaking Power	1200 kg (2645 lbs)
Item Weight	52 pounds (23.6 kg)
Package Dimensions	54 x 18 x 8 inches (137 x 46 x 20 cm)
Material	Aluminum (Base), Galvanized Steel (Tables)
Power Source	Manual
Included Components	40" Manual Push Tile Cutter, 8mm and 22mm EXTREME Scoring Wheels, Hardshell Case, Lateral Stop, Measuring Bar

9. WARRANTY AND CUSTOMER SUPPORT

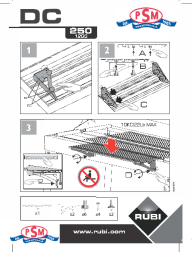

For information regarding product warranty, service, or technical support, please contact Rubi Tools customer service directly or refer to the warranty documentation included with your purchase. Keep your proof of purchase for any warranty claims.

Manufacturer: Rubi Tools
