5. MAINTENANCE

To ensure the longevity and appearance of your LEGO set, follow these simple maintenance guidelines:

- **Cleaning:** Dust your LEGO model regularly with a soft, dry cloth or a soft-bristled brush. For deeper cleaning, wash individual bricks with mild soap and lukewarm water (not hot water). Rinse thoroughly and air dry. Do not use harsh chemicals or abrasive materials.
- **Storage:** Store the set in a cool, dry place away from direct sunlight to prevent discoloration and warping of plastic elements.
- **Handling:** Handle the assembled model with care, especially when moving it, to prevent pieces from detaching.

6. TROUBLESHOOTING

Most issues with LEGO sets are related to assembly or missing pieces. Here are some common troubleshooting tips:

- **Missing Pieces:** If you believe a piece is missing, first re-check all packaging and the building area. Sometimes small pieces can be overlooked. If a piece is genuinely missing, contact LEGO Customer Service (see Section 8).
- **Assembly Errors:** If the model does not look correct or pieces do not fit, carefully review the previous steps in the instruction manual. Disassemble and reassemble the problematic section.

- **Loose Connections:** Ensure all bricks are firmly pressed together. LEGO connections are designed to be secure.
