# Stagg CPK01 Children's Percussion Kit User Manual

Comprehensive instructions for the safe and proper use of your Stagg CPK01 Children's Percussion Kit.

## 1. PRODUCT OVERVIEW

The Stagg CPK01 Children's Percussion Kit is designed to introduce young musicians to a variety of percussive sounds. This kit includes a selection of instruments crafted from wood, plastic, and metal, suitable for beginner proficiency levels.

### Kit Components:

- One chromed triangle (4 x 0.8 inches) with beater
- One pair of 4-inch wood claves
- One 6-inch pretuned wood tambourine with 4 jingles
- One pair of wooden maracas
- One wooden tube shaker
- One plastic egg shaker
- One wooden 4-pair jingles stick
- One pair of chromed finger cymbals
- One set of wrist bells

*Image 1.2: The Stagg CPK01 Children's Percussion Kit with instruments grouped.*

## 2. SETUP

The Stagg CPK01 Children's Percussion Kit requires minimal setup. Follow these steps to prepare the instruments for use:

1. **Unpack:** Carefully remove all instruments from their packaging.
2. **Inspect:** Examine each instrument for any signs of damage or loose parts. If any instrument appears damaged, discontinue use and contact customer support.
3. **Verify Components:** Ensure all listed components from the 'Product Overview' section are present.
4. **Clean (Optional):** Before first use, you may gently wipe down wooden and plastic parts with a dry, soft cloth.

No assembly is required for any of the instruments in this kit.

## 3. OPERATING INSTRUCTIONS

Each instrument in the Stagg CPK01 kit offers a unique sound and playing method. Adult supervision is

recommended during use, especially for younger children.

## Individual Instrument Use:

- **Chromed Triangle:** Hold the triangle by the string loop. Use the metal beater to strike the side of the triangle to produce a clear, ringing sound. Experiment with striking different parts for varied tones.
- **Wood Claves:** Hold one clave loosely in the palm of one hand, allowing it to resonate. Use the other clave to strike the first one firmly to create a sharp, clicking sound.
- **Wood Tambourine:** Hold the tambourine by its frame. Shake it to make the jingles rattle, or strike the head with your hand or fingers for a drum-like sound combined with jingle effects.
- **Wooden Maracas:** Hold a maraca by its handle and shake it rhythmically to produce a soft, rustling sound.
- **Wooden Tube Shaker:** Hold the wooden tube and shake it to create a gentle, percussive rattling sound.
- **Plastic Egg Shaker:** Hold the egg shaker and shake it to produce a soft, consistent rattling sound.
- **Wooden Jingles Stick:** Hold the stick by its handle and shake it to activate the jingles, creating a bright, shimmering sound.
- **Chromed Finger Cymbals:** Hold one cymbal in each hand by the attached strap. Strike the edges of the cymbals together to produce a clear, sustained ringing sound.
- **Wrist Bells:** Secure the wrist bells comfortably around a child's wrist. Movement of the arm will cause the bells to jingle.

## 4. MAINTENANCE

Proper care and maintenance will extend the life of your percussion kit.

### Cleaning:

- **Wooden and Plastic Parts:** Wipe with a dry or slightly damp, soft cloth. Do not use harsh chemicals or abrasive cleaners. Avoid immersing wooden instruments in water.
- **Metal Parts (Triangle, Finger Cymbals, Jingles):** Polish with a soft, dry cloth. If necessary, a very mild metal polish designed for musical instruments can be used sparingly, ensuring no residue is left.
- **Tambourine Head:** If the tambourine head is made of natural skin, avoid getting it wet. Wipe gently with a dry cloth.

### Storage:

- Store all instruments in a dry place, away from direct sunlight and extreme temperatures (both hot and cold).
- Keep instruments in their original packaging or a dedicated storage container to prevent loss or damage.

## 5. TROUBLESHOOTING

This section addresses common concerns you might encounter with your percussion kit.

- **Missing Parts:** If any components are missing upon unpacking, please contact the retailer or Stagg customer support immediately.
- **Minor Damage (e.g., small crack in wood):** For minor cosmetic damage that does not affect playability or safety, the instrument may still be used. However, if an instrument is broken, has sharp edges, or poses a choking hazard, discontinue use immediately to prevent injury.

- **Dull Sound:** Ensure instruments are clean and free of debris. For wooden instruments, ensure they are not exposed to excessive moisture or dryness, which can affect resonance.

## 6. SAFETY INFORMATION

Please read and adhere to the following safety guidelines:

- **Adult Supervision:** This product is intended for children and should always be used under direct adult supervision.
- **Choking Hazard:** Some small parts, such as the triangle beater or individual jingles, may pose a choking hazard. Not suitable for children under 3 years of age without close supervision.
- **Not for Oral Use:** Instruments are not toys for chewing or putting in the mouth.
- **Inspect Regularly:** Periodically check all instruments for any signs of wear, breakage, or loose components that could create sharp edges or small parts. Discontinue use if damage occurs.
- **Proper Use:** Use instruments only as intended for musical play. Avoid throwing or striking instruments against hard surfaces other than for their intended musical purpose.

## 7. SPECIFICATIONS

Feature	Detail
Brand	Stagg
Model Number	CPK01
UPC	705235936543
Item Weight	1.98 pounds
Product Dimensions (L x W x H)	3.54 x 3.54 x 3.54 inches
Material Type	Plastic, Wood
Proficiency Level	Beginner
