Nautica N22503

Nautica Men's N22503 BFC Chronograph Watch User Manual

Model: N22503

1. INTRODUCTION

Thank you for choosing the Nautica Men's N22503 BFC Chronograph Watch. This manual provides detailed instructions for the proper setup, operation, and maintenance of your timepiece. Please read this manual thoroughly to ensure optimal performance and longevity of your watch.

2. SETUP

2.1 Initial Inspection

Upon unboxing, inspect your watch for any visible damage. Ensure all protective films are removed from the crystal and case back.

2.2 Setting the Time

1. Pull the crown out to the second click position.
2. Turn the crown to set the hour and minute hands to the desired time.
3. Push the crown back into the normal position.

2.3 Setting the Date

1. Pull the crown out to the first click position.
2. Turn the crown clockwise or counter-clockwise (depending on the movement) to set the date. Avoid setting the date between 9 PM and 3 AM, as this may interfere with the automatic date change mechanism.
3. Push the crown back into the normal position.

3. OPERATING THE CHRONOGRAPH FUNCTIONS

Your Nautica N22503 watch features a chronograph function for measuring elapsed time. The chronograph is operated using the pushers located on either side of the crown.

3.1 Starting and Stopping the Chronograph

1. Press the top pusher (A) to start the chronograph. The chronograph second hand will begin to move.
2. Press the top pusher (A) again to stop the chronograph. The elapsed time will be indicated by the chronograph hands.

3.2 Resetting the Chronograph

1. After stopping the chronograph, press the bottom pusher (B) to reset all chronograph hands to their zero positions.

3.3 Water Resistance

This watch is water resistant to 660 feet (200 meters), making it suitable for recreational scuba diving. Ensure the crown is fully pushed in before any contact with water. Do not operate the crown or pushers while the watch is wet or submerged, as this can compromise the water resistance.

4. MAINTENANCE

4.1 Cleaning

To maintain the appearance of your watch, wipe the case and crystal with a soft, dry cloth regularly. For the leather strap, avoid excessive moisture and harsh chemicals.

4.2 Battery Replacement

The watch is powered by a precise Swiss-Quartz movement. When the battery needs replacement, it is

recommended to take your watch to an authorized service center or a qualified watchmaker to ensure proper sealing and water resistance integrity.

4.3 Leather Strap Care

The leather strap is susceptible to wear and tear from moisture, sweat, and direct sunlight. To prolong its life, avoid prolonged exposure to water and extreme temperatures. Clean with a damp cloth and allow to air dry.

5. TROUBLESHOOTING

5.1 Watch Not Running

- Check if the crown is fully pushed in.
- If the watch still does not run, the battery may need replacement. Refer to section 4.2.

5.2 Date Not Changing

- Ensure the time is set correctly, especially the AM/PM cycle.
- Avoid setting the date between 9 PM and 3 AM.

5.3 Chronograph Hands Not Resetting to Zero

- If the chronograph hands do not reset to their zero positions, a calibration may be required. Consult an authorized service center.

For issues not covered here, please contact customer support.

6. SPECIFICATIONS

Feature	Specification
Model Number	N22503
Movement Type	Swiss Quartz
Case Material	Stainless Steel
Case Diameter	46.1 mm
Case Thickness	13 mm
Band Material	Leather
Band Color	Red (with black strap)
