Hailo 3642131

Hailo 3642131 Waste Collector TR Swing 40.3/35 Instruction Manual

Model: 3642131

Introduction

This manual provides comprehensive instructions for the installation, operation, and maintenance of your Hailo 3642131 Waste Collector TR Swing 40.3/35. Please read these instructions carefully before installation and use to ensure proper function and longevity of the product. Keep this manual for future reference.

Safety Information

Always observe the following safety guidelines:

- Ensure all components are securely fastened during installation to prevent injury or damage.
- Do not overload the waste bins beyond their stated capacity.
- Keep small children away from the unit during installation and ensure they do not play with the moving parts.
- Use appropriate tools for installation as specified in the instructions.

Package Contents

Verify that all parts are present before beginning installation:

- 1 x Waste collector frame with telescopic rails
- 1 x 18-liter inner bin
- 2 x 8.5-liter inner bins
- 1 x Container lid (light grey)
- Mounting hardware (screws)

Setup and Installation

The Hailo TR Swing 40.3/35 is designed for easy floor mounting in base cabinets with a minimum width of 40 cm and a hinged door. Follow these steps for proper installation:

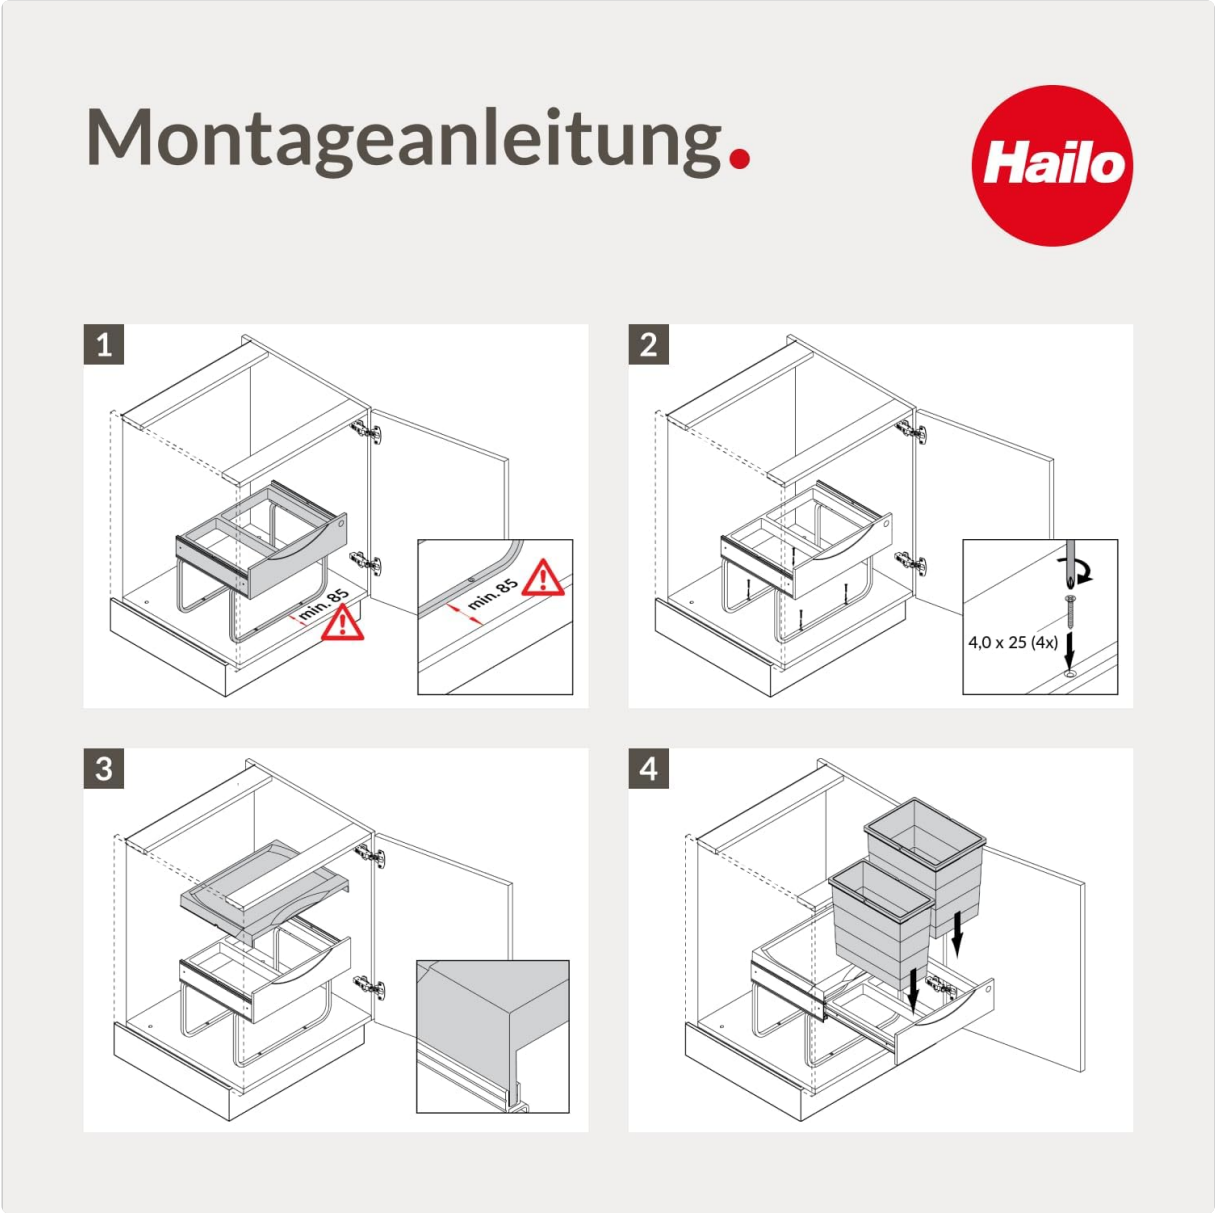

Figure 1: Overview of the installation steps for the Hailo Waste Collector.

1. **Step 1: Check Cabinet Dimensions and Clearance**
   Before positioning the unit, ensure your cabinet meets the minimum width requirement of 40 cm. Verify that there is sufficient clearance (minimum 95 mm) on both sides for the pull-out mechanism to operate smoothly. Refer to the dimension diagram for precise measurements.

Figure 2: Detailed dimensions for cabinet integration. The unit measures 346 mm (W) x 475 mm (D) x 336 mm (H).

2. **Step 2: Position and Secure the Frame**
   Place the waste collector frame on the cabinet floor. Align it correctly within the cabinet, ensuring it is centered and has the necessary side clearance. Use the provided screws (4.0 x 25 mm, 4 pieces) to securely fasten the frame to the cabinet floor. Use a screwdriver for this step.

3. **Step 3: Install the System Lid**
   Once the frame is secured, place the light grey container lid onto the designated area of the frame. This lid provides a stable surface and helps contain odors.

4. **Step 4: Insert the Inner Bins**
   Insert the 18-liter inner bin and the two 8.5-liter inner bins into their respective compartments within the frame. Ensure they sit firmly in place. The bins are designed for easy removal and cleaning.

Figure 3: The Hailo Waste Collector fully installed and ready for use, demonstrating its pull-out functionality.

Operating Instructions

Using your Hailo Waste Collector is straightforward:

- **Pull-Out Function:** To access the bins, simply pull the unit out by hand. The ball-bush guided telescopic rails ensure a smooth, full extension.
- **Waste Separation:** Utilize the three inner bins for efficient waste separation. The larger 18-liter bin is suitable for general waste, while the two 8.5-liter bins can be used for recycling or organic waste.
- **Lid Usage:** The integrated system lid covers the bins when the unit is closed, helping to contain odors and providing an additional storage surface within the cabinet.
- **Bin Removal:** The inner bins are designed to be easily lifted out for emptying and cleaning.

Maintenance and Cleaning

Regular cleaning and maintenance will ensure the longevity and hygienic operation of your waste collector:

- **Inner Bins:** Empty the bins regularly. Clean them with warm soapy water and a soft cloth. Rinse thoroughly and allow them to dry completely before returning them to the unit.

- **Frame and Rails:** Wipe down the metal frame and plastic components with a damp cloth. For stubborn dirt, use a mild household cleaner. Avoid abrasive cleaners or harsh chemicals, as these can damage the surfaces.
- **Telescopic Rails:** Periodically check the telescopic rails for any debris. If the movement becomes stiff, clean the rails and apply a small amount of silicone spray lubricant (avoid oil-based lubricants).
- **Lid:** Clean the system lid with a damp cloth and mild detergent.

Troubleshooting

If you encounter any issues with your Hailo Waste Collector, refer to the following common problems and solutions:

- **Unit does not slide smoothly:**
  - Check the telescopic rails for obstructions or dirt. Clean the rails as described in the Maintenance section.
  - Ensure the unit is not overloaded, which can hinder smooth operation.
  - Verify that the mounting screws are tight and the frame is level.
- **Bins do not fit correctly:**
  - Ensure you are using the correct bins for each compartment (18L and 8.5L).
  - Check for any debris or waste preventing the bins from seating properly.
- **Unpleasant odors:**
  - Empty and thoroughly clean the bins and the system lid.
  - Ensure the lid is properly closed when the unit is retracted.
  - Consider using bin liners and odor absorbers if necessary.

If problems persist, please contact Hailo customer support.

Specifications

Feature	Detail
Model Number	3642131
Brand	Hailo
Capacity	Total 34 Liters (1 x 18L, 2 x 8.5L)
Color	Grey
Opening Mechanism	Pull-Out (full extension with ball-bush guided telescopic rails)
Material	Alloy Steel, Metal, Plastic
Product Dimensions (W x D x H)	346 mm x 475 mm x 336 mm (13.62"W x 18.7"D x 13.23"H)
Minimum Cabinet Width	400 mm (for hinged door cabinets)
Item Weight	12.79 Pounds
Special Feature	Open Top (with removable lid)
