

Oxford OF100

Oxford Premium Rear Paddock Stand Instruction Manual

Model: OF100

PRODUCT OVERVIEW

The Oxford Premium Rear Paddock Stand is designed to provide stable and secure lifting for the rear wheel of your motorcycle, facilitating maintenance, cleaning, and storage. It features an ultra-strong frame, double wheels for smooth operation, and heavy-duty steel clamps for rigidity.

SAFETY INFORMATION

Always prioritize safety when using the paddock stand. Read all instructions carefully before use. Ensure the motorcycle is stable and on a flat, level surface. Never work under a motorcycle supported only by a paddock stand without additional safety measures. Always use appropriate personal protective equipment.

- Ensure the stand is correctly assembled and all fasteners are tightened.
- Verify the stand is compatible with your motorcycle's swingarm bobbins or lifting points.
- Always have a second person assist when lifting the motorcycle for the first few times.
- Do not exceed the weight capacity of the stand.
- Keep hands and feet clear of moving parts during operation.

PACKAGE CONTENTS

The Oxford Premium Rear Paddock Stand package includes:

- 1 x Oxford Premium Rear Paddock Stand frame
- 2 x Double wheels (pre-installed or requiring attachment)
- 2 x Heavy-duty steel clamps (swingarm cups or bobbins, depending on model)
- 1 x Lever handle

- 2 x Clean Grips (for handlebar protection)

SETUP AND ASSEMBLY

The Oxford Premium Rear Paddock Stand is designed for straightforward assembly. Most components are pre-assembled. Follow these steps to prepare your stand for use:

1. **Unpack Components:** Carefully remove all parts from the packaging.
2. **Inspect for Damage:** Check all components for any signs of damage during transit. Do not use if damaged.
3. **Attach Wheels (if not pre-installed):** Securely attach the double wheels to the stand's base using the provided hardware. Ensure they rotate freely.
4. **Install Lifting Clamps/Bobbins:** Attach the heavy-duty steel clamps (or bobbins, if your model uses them) to the stand's lifting arms. Ensure they are oriented correctly to engage with your motorcycle's swingarm or bobbins. Tighten all bolts securely.
5. **Attach Lever Handle:** Insert the lever handle into its designated slot on the stand.
6. **Prepare Clean Grips:** The included Clean Grips can be attached to the stand's lifting points for comfortable handling or placed on your motorcycle's handlebar grips to protect them during maintenance.

OPERATING INSTRUCTIONS

Follow these steps to safely lift and lower your motorcycle using the Oxford Premium Rear Paddock Stand:

1. **Position Motorcycle:** Place your motorcycle on a firm, level surface. Ensure the front wheel is

straight and the handlebars are locked or secured.

2. **Engage Front Brake (Optional but Recommended):** If possible, engage the front brake with a strap or bungee cord to prevent the motorcycle from rolling forward.
3. **Position Stand:** With the motorcycle on its side stand, position the paddock stand behind the rear wheel. Align the lifting clamps/bobbins with the motorcycle's swingarm or bobbins.
4. **Initial Contact:** Gently push the stand forward until both lifting points make firm contact with the motorcycle's swingarm or bobbins. Ensure the stand is centered and stable.
5. **Lift Motorcycle:** While holding the motorcycle upright with one hand (or with assistance), firmly and smoothly push down on the stand's lever handle. The motorcycle's rear wheel will lift off the ground.
6. **Verify Stability:** Once lifted, gently rock the motorcycle to ensure it is stable on the stand.
7. **Lower Motorcycle:** To lower, firmly hold the motorcycle upright. Gently and slowly lift the stand's lever handle, allowing the motorcycle to descend onto its side stand. Once the side stand is engaged, remove the paddock stand.

MAINTENANCE

Regular maintenance will ensure the longevity and safe operation of your Oxford Premium Rear Paddock Stand:

- **Cleaning:** Wipe down the stand with a damp cloth after each use to remove dirt, grease, and grime.
- **Lubrication:** Periodically apply a light lubricant to the wheel axles and pivot points to ensure smooth operation.
- **Inspection:** Regularly inspect the frame for any signs of bending, cracks, or damage. Check all bolts and fasteners for tightness and re-tighten if necessary.
- **Wheel Condition:** Examine the wheels for wear or damage. Replace if they show signs of cracking or excessive wear.
- **Storage:** Store the stand in a dry, clean environment away from extreme temperatures and corrosive materials.

TROUBLESHOOTING

If you encounter issues with your paddock stand, refer to the following common problems and solutions:

- **Stand is difficult to lift:**
 - Ensure the motorcycle is on a level surface.
 - Verify the lifting clamps/bobbins are correctly positioned and making full contact.
 - Check for any obstructions.
 - Ensure the stand's pivot points are lubricated.
- **Motorcycle feels unstable on the stand:**
 - Re-check that the stand is centered and the lifting points are fully engaged.
 - Ensure all bolts and fasteners are securely tightened.
 - Confirm the stand is on a firm, level, non-slip surface.
 - Consider using additional tie-down straps for extra security, especially for extended storage or heavy maintenance.
- **Wheels do not roll smoothly:**
 - Inspect wheels for debris or damage. Clean or replace if necessary.
 - Apply lubricant to the wheel axles.

SPECIFICATIONS

Model:	OF100 (Oxford Premium Rear Paddock Stand)
Brand:	Oxford
Material:	Alloy Steel (Frame), Stainless Steel (Fasteners)
Color:	Black/Red
Item Weight:	2.55 pounds
Product Dimensions:	20 x 30 x 20 inches
