SAFETY INFORMATION

DANGER! PELIGRO!

Highly flammable liquid and vapor. Causes skin irritation. Causes serious eye irritation. Suspected of causing cancer. Causes damage to organs.

Prevention: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Keep away from heat, hot surfaces, sparks, open flames, and other ignition sources. No smoking. Keep container tightly closed. Ground/bond container and receiving equipment. Use explosion-proof electrical, ventilating, lighting, motorized equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Do not breathe dust, fume, gas, mist, vapors, spray. Wash skin thoroughly after handling. Do not eat, drink or smoke when using this product. Wear protective gloves, protective clothing, eye protection, face protection and respiratory protection. Use personal protective equipment as required.

Response: IF ON SKIN (or hair): Immediately take off all contaminated clothing. Wash skin with soap and water. IF INHALED: Remove person to fresh air and keep comfortable for breathing. IF IN EYES: Rinse cautiously with water for

several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor. IF exposed or concerned: Get medical attention. In case of fire: Use dry chemical, CO₂, foam or water fog to extinguish.

Storage: Store locked up. Store in a well-ventilated place. Keep container tightly closed. Keep cool.

Disposal: Dispose of contents and container in accordance with local, regional, national and international regulations. In case of fire: Use dry chemical, CO₂, foam or water fog to extinguish.

WARNING: This product contains a chemical known to the State of California to cause cancer and birth defects or other reproductive harm.

Euro Kwik Clearcoat is an acrylic urethane clearcoat for basecoat/clearcoat systems that can be used with all solvent and waterborne basecoats. It is suitable for all automotive refinishing as well as trucks and equipment. Euro Kwik Finish Clearcoat can be buffed in 2 hours at 75°F (24°C). Its fast dry time enables customers to cycle more cars through their shops. With Euro Kwik Clearcoat a shop can clearcoat, buff/polish and deliver the vehicle in the same day! The reduced bake time requirements enable over twice as many vehicles to be processed through the paint booths. These advantages translate into less energy usage, and more profit per job.

Instructions: Refer to technical data sheet for application information.

For industrial use only by professional, trained personnel. Not for sale to, or use by, the general public. Refer to product data sheet for complete application instructions.

WARNING: This product contains a chemical(s) known to the State of California to cause cancer and birth defects or other reproductive harm. Contains photochemically reactive solvent.

La Capa Transparente Euro Kwik

es una capa transparente de uretano acrílico para sistemas de capa base/capa transparente y puede utilizarse con todos los disolventes y capas base de agua. Es apropiado para todos los acabados de automóviles, así como para camiones y equipo. Euro Kwik Finish Clearcoat se puede pulir después de 2 horas a 75°F (24°C). Su rápido tiempo de secado hace posible que los clientes hagan pasar más automóviles por sus talleres. ¡Con Euro Kwik Clearcoat los talleres pueden aplicar la capa transparente, pulir y entregar el vehículo el mismo día! Los menores requisitos de tiempo de horneado hacen posible que se procesen más del doble de vehículos por las estaciones de pintado. Estas ventajas suponen menos uso de electricidad y más ganancias por cada encargo de trabajo.

Instrucciones: Consulte la hoja de datos técnicos de información de la aplicación.

Sólo para uso industrial y por personal profesional capacitado. Este producto no es para uso ni debe ser revendido al público en general. Refiera a la hoja de datos del producto para las instrucciones completas del uso. **ADVERTENCIA:** Este producto contiene un agente químico reconocido en el Estado de California como causante de cáncer, defectos de nacimiento u otros defectos de reproducción. Este producto contiene un solvente que reacciona fotoquímicamente.

SETUP AND PREPARATION

Proper preparation is crucial for optimal results. This product is an acrylic urethane clearcoat for basecoat/clearcoat systems and is designed for use with all solvent and waterborne basecoats. It is suitable for professional automotive refinishing.

Surface Recommendation:

- Wood
- Metal
- Concrete
- Plastic

For detailed application instructions and specific surface preparation guidelines, refer to the official technical data sheet provided by TRANSTAR. This manual provides general information; specific application details are found in the technical data sheet.

OPERATING AND APPLICATION

The TRANSTAR 7211 Euro Kwik Clear Coat is designed for efficient application and quick drying times.

- **Buffing Time:** Can be buffed in 2 hours or less at 75°F (24°C).
- **Full Cure Time:** Approximately 2 hours.
- **Coverage:** This product offers a coverage of approximately 700 square feet per liter.
- **Usage:** Suitable for both interior and exterior applications.

Always ensure proper ventilation during application and adhere to all safety guidelines mentioned in the Safety Information section.

MAINTENANCE AND STORAGE

To ensure the longevity of the product and its effectiveness, proper storage is essential.

- Store the product in a well-ventilated area.
- Keep the container tightly closed when not in use.
- Store in a cool place, away from direct sunlight, heat, sparks, and open flames.
- Ensure the storage area is locked and secured, away from unauthorized access.

Once applied and cured, the clear coat provides a durable, rust-resistant finish that requires standard care for painted surfaces. Avoid abrasive cleaners or harsh chemicals that could damage the clear coat.

TROUBLESHOOTING

This section addresses common issues that may arise during the use of TRANSTAR 7211 Euro Kwik Clear Coat. For complex issues or problems not listed here, please contact TRANSTAR technical support.

- **Poor Adhesion or Finish Quality:** Ensure the surface was properly cleaned, prepared, and free of contaminants. Verify that the product was mixed and applied according to the technical data sheet. Environmental conditions (temperature, humidity) can also affect results.
- **Slow Drying/Curing:** Check ambient temperature and humidity. Lower temperatures or high humidity can significantly extend drying and cure times. Ensure adequate ventilation.
- **Bubbles or Pinholes:** This can be caused by improper application technique, too much air pressure, or applying too thick a coat. Ensure proper spray gun settings and technique.

Always consult the technical data sheet for specific application parameters and troubleshooting tips related to product performance.
