

PUR RF9999-6

PUR Plus Mineral Core Faucet Mount Water Filter Replacement (RF-9999) Instruction Manual

Brand: PUR | Model: RF9999-6

INTRODUCTION

This document provides comprehensive instructions for the PUR Plus Mineral Core Faucet Mount Water Filter Replacement (RF-9999). This filter is engineered to deliver cleaner, better-tasting water by effectively reducing various contaminants. It incorporates patented Mineral Core™ technology, which filters water over natural minerals to ensure a crisp, refreshing taste. The premium carbon filter is certified to reduce chlorine (taste and odor) and other contaminants, including lead.

- Reduces 70 contaminants: PUR Plus faucet mount water filters reduce lead and other contaminants that may be in your water; PUR Plus faucet filters are certified to reduce 10X more contaminants than Brita's leading pitcher filter*.
- Compatible does not mean comparable: Be cautious of off-brand filters; they are not tested or certified to filter like ours; PUR filters are the only certified option to reduce contaminants when used with a PUR water filter faucet system.
- Faucet water filter replacements: Enjoy cleaner, filtered water by replacing your PUR Plus faucet water filtration system; filters over natural minerals for great taste; fits in all PUR faucet water filtration systems.
- No. 1 Selling brand in faucet filtration**: Contaminants can enter your water system daily, so filtering your water is important; PUR has been developing superior water filtration for products like this PUR faucet mount for over 35 years.

SETUP AND INSTALLATION

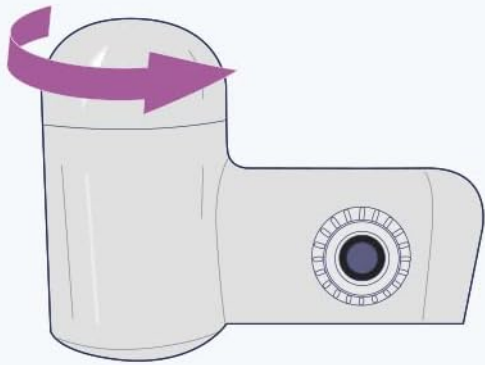

Installing your PUR Plus Faucet Mount Water Filter Replacement is a straightforward process, designed for ease of use.

1. Twist the back cover off your PUR faucet water filtration system.
2. Insert the new filter into the device.
3. Replace the back cover, ensuring it is securely fastened.

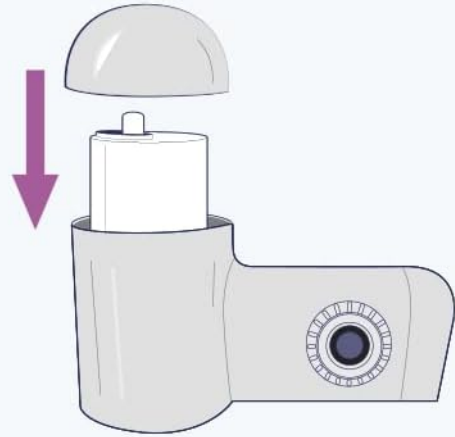

After installation, it is recommended to run hot water through the filter for approximately 10-15 minutes. This initial flush helps to prepare the filter for use by removing any air bubbles or loose carbon particles.

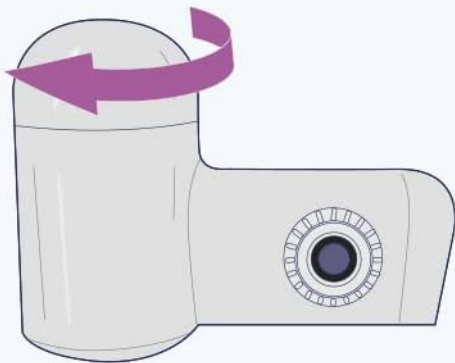

PUR Faucet Mount Water Filter installed on a kitchen faucet.

1. Twist back cover off.

2. Insert filter into the device.

3. Replace faucet system cover.

4. Replace filter every 100 gallons (3 months).

Video demonstrating the simple installation process of the PUR faucet water filter.

OPERATION

The PUR faucet mount system provides the flexibility to switch between filtered and unfiltered water, depending on your needs.

- To access filtered water, activate the filter lever on the faucet mount. A green indicator light will illuminate, confirming that the filter is active and functioning correctly.
- For unfiltered tap water, simply use the faucet without engaging the filter lever. This allows for regular tap water flow for tasks that do not require filtration.

MAINTENANCE AND FILTER REPLACEMENT

For optimal performance and continuous access to clean water, it is essential to replace your PUR Plus Faucet Mount Water Filter (RF-9999) regularly.

- Replace the filter every 3 months or after 100 gallons of use, whichever occurs first.
- The faucet mount system includes an indicator light that changes color (green to orange to red) to signal when a replacement is needed. A red light specifically indicates that it is time to change the filter.

1. Twist back cover off.

2. Insert filter into the device.

3. Replace faucet system cover.

4. Replace filter every 100 gallons (3 months).

TROUBLESHOOTING

Water Quality Issues

- If you notice white particles or a cloudy appearance in the filtered water, especially after initial installation, this is often due to air bubbles or loose carbon particles. Run water through the filter for 10-15 minutes to flush out these particles.
- If the water continues to appear cloudy or has an unusual taste after flushing, ensure the filter is correctly seated and the system is properly assembled.
- If the filter is not effectively reducing odors or improving taste, it may be expired or clogged. Replace the filter as per the maintenance schedule.

Slow Water Flow

- A significant reduction in water flow from the filtered output often indicates a clogged filter. This is a sign that the filter has absorbed many contaminants and needs to be replaced.

Leaks

- Ensure all connections are tight and O-rings are properly seated during installation. If leaks persist, check for damaged O-rings or improper filter seating.

PRODUCT SPECIFICATIONS

Specification	Detail
Material	Plastic
Product Dimensions	7.6"D x 2.8"W x 5.7"H
Item Weight	0.36 Pounds
External Testing Certification	NSF, WQA
Product Benefits	Provides cleaner, safer, refreshing mineral water with lead removal and pharmaceutical reduction, leaving behind beneficial fluoride.
Model Number	RF9999-6
UPC	723987005560 650181978737
Manufacturer Warranty Description	30 Guarantee
Unit Count	6 Count
Number of Items	6
Manufacturer Part Number	RF9999-6
Item Type Name	Replacement Filter
Manufacturer	PUR
Included Components	6 replacement filters

Compatible Water Purifier Models	PUR FM-2000B, PUR FM-2100B, PUR FM-2500V, PUR FM-2700G, PUR FM-2800N, PUR FM-3333B, PUR FM-3400B, PUR FM-3700, PUR FM-3700B, PUR FM-3800, PUR FM-3800B, PUR FM-4000B, PUR FM-4100B, PUR FM-9000B, PUR FM-9100B, PUR FM-9400B, PUR FM-9500, PUR FM-9600B, PUR Pur-0A1
