

WENKO 19208100

WENKO Telescopic Shower Rod - Instruction Manual

Model: 19208100

1. INTRODUCTION

This manual provides instructions for the proper installation, operation, and maintenance of your WENKO Telescopic Shower Rod. Please read these instructions carefully before use and retain them for future reference. The WENKO telescopic shower rod offers a flexible solution for hanging shower curtains without the need for drilling, suitable for various bathroom setups.

2. SAFETY INFORMATION

- Ensure the rod is securely installed between two stable walls before hanging a shower curtain.
- Do not hang heavy objects on the shower rod. It is designed for shower curtains only.
- Avoid applying excessive force or hanging from the rod, as this may cause it to dislodge and result in injury or damage.
- Keep out of reach of children.

3. PACKAGE CONTENTS

Verify that all components are present:

- 1 x WENKO Telescopic Shower Rod (Chrome, 110-185 cm)

4. SETUP AND INSTALLATION

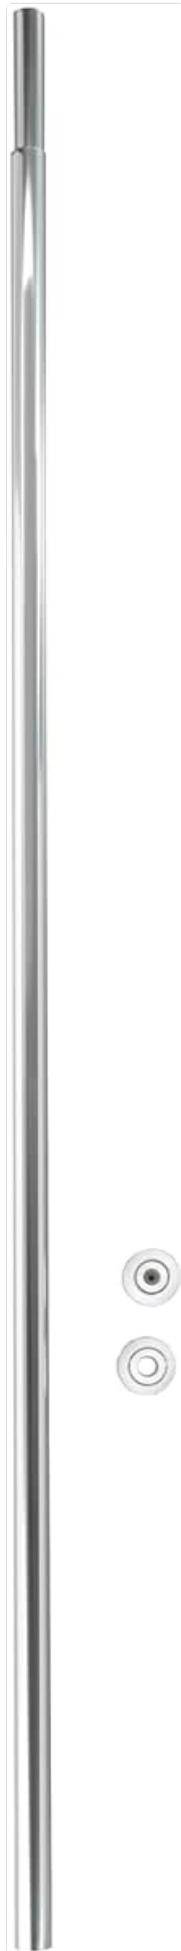

The WENKO Telescopic Shower Rod is designed for quick and easy installation without drilling. It uses a tension mechanism to secure itself between two walls.

1. **Measure the distance:** Determine the desired width between the two walls where the shower rod will be installed. The rod is adjustable from 110 cm to 185 cm.

2. **Adjust the length:** Twist the rod to extend it to a length slightly longer (approximately 2-3 cm) than the measured distance between the walls.
3. **Compress and insert:** Compress the rod slightly and position it between the two walls. Release the compression to allow the rod to expand and create tension against the walls, securing it in place. Ensure it is level and firmly seated.
4. **Test stability:** Gently pull down on the rod to ensure it is stable and will not slip. Adjust if necessary.

Installation steps: Adjust length, twist to secure, then compress and insert between walls. No drilling required.

The shower rod installs without the need for drilling.

5. OPERATING INSTRUCTIONS

Once installed, the WENKO Telescopic Shower Rod is ready for use. Simply hang your shower curtain using appropriate shower curtain rings or hooks. The rod's 2 cm diameter is compatible with most standard shower curtain accessories.

MONTAGE OHNE WERKZEUG ASSEMBLY WITHOUT TOOLS

1. Gewünschte Länge einstellen

2. Festdrehen

3. Zusammenschieben und einsetzen

1. Set the desired length

2. Seize

3. Push together and insert

The shower rod in use, demonstrating its adjustable length and strong hold.

6. MAINTENANCE

To ensure the longevity and appearance of your WENKO Telescopic Shower Rod, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the rod regularly with a soft, damp cloth and a mild cleaning agent. Avoid abrasive cleaners or scouring pads, as these can damage the chrome finish.
- **Drying:** After cleaning, dry the rod thoroughly to prevent water spots and maintain its shine.
- **Rust Prevention:** The rod is made of aluminum with a chrome finish, designed to be rust-resistant. However, regular cleaning helps prevent mineral buildup that could affect its appearance.

The shower rod is made from rust-free material for durability.

7. TROUBLESHOOTING

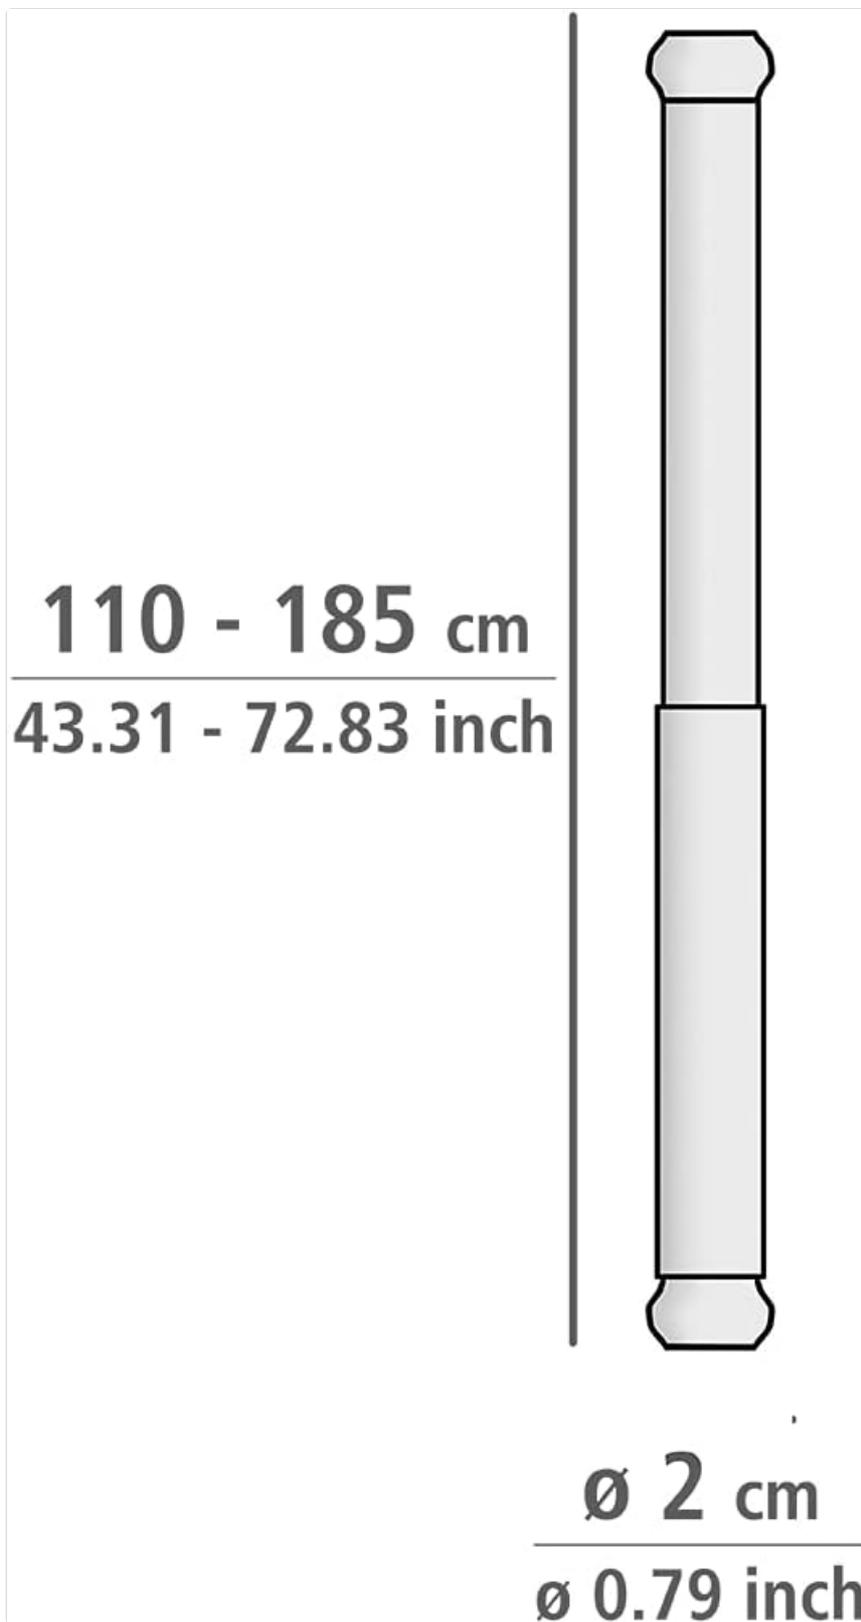

If you encounter issues with your shower rod, refer to the following common problems and solutions:

- **Rod slips or falls:**
 - Ensure the rod is extended sufficiently to create firm tension against the walls.
 - Check that the end caps are clean and free of soap residue or moisture, which can reduce friction.
 - Verify that the walls are clean, dry, and structurally sound.
- **Difficulty adjusting length:**
 - Ensure the locking mechanism is disengaged (untwisted) before attempting to extend or retract the rod.
 - Clean any debris or buildup that might be obstructing the telescopic movement.

8. SPECIFICATIONS

Feature	Detail
Brand	WENKO
Model Number	19208100
Material	Aluminum, Chrome finish
Color	Chrome
Adjustable Length	110 - 185 cm (43.31 - 72.83 inches)

Feature	Detail
Diameter	2 cm (0.79 inches)
Weight	269 Grams
Installation Type	Tension (Wall Mount, No Drilling)
