Culligan US-EZ-1

Culligan EZ-Change Under-Sink Drinking Water System User Manual

Brand: Culligan | Model: US-EZ-1

INTRODUCTION

The Culligan EZ-Change Under-Sink Drinking Water Filtration System provides clean, fresh-tasting water directly from your dedicated faucet. This system is designed for convenience, offering effective filtration and easy maintenance to ensure your family has access to quality drinking and cooking water.

Image: The complete Culligan EZ-Change Under-Sink Drinking Water System, showcasing the filter cartridge, chrome faucet, mounting bracket, and white plastic tubing, ready for installation.

This system effectively reduces bad tastes, odors, and harmful particulates, ensuring your water is not only safe but also pleasant to drink. Its compact design allows for discreet installation under your sink.

SETUP AND INSTALLATION

The Culligan EZ-Change system is designed for straightforward installation. All necessary tubing and hardware are included in the box. The unique twist-on, twist-off mechanism simplifies the process, eliminating the need for complex tools.

What's in the Box:

- Filter head with built-in bracket
- RC-EZ-1 Level 1 replacement filter cartridge

- Mounting screws
- Supply adapter
- Lead-free faucet
- 1/4-inch plastic tubing
- Filter-change reminder sticker
- Instructions

For detailed step-by-step instructions, please refer to the included instruction manual or the official PDF user guide available online.

OPERATION

Once installed, the Culligan EZ-Change system operates by filtering water as it passes through the RC-EZ-1 cartridge before reaching your dedicated faucet. This process removes impurities, providing clean and great-tasting water on demand.

- **Chlorine Reduction:** Significantly reduces chlorine taste and odor.
- **Particulate Filtration:** Filters out Class III particulates.
- **Improved Taste:** Enhances the overall taste and smell of your drinking water.

MAINTENANCE AND FILTER REPLACEMENT

Regular maintenance, primarily filter replacement, is crucial for optimal performance. The RC-EZ-1 filter cartridge has a capacity of up to 3,000 gallons or lasts up to 12 months, depending on usage and water conditions. A filter-change reminder sticker is included to help you keep track.

Replacing the Filter:

The EZ-Change system features a convenient twist-on/twist-off mechanism for mess-free filter changes. No special tools are required. Simply twist the old cartridge off and twist the new one on.

Compatible Replacement Cartridges:

- Culligan RC-EZ-1 (Basic Filtration)
- Culligan RC-EZ-3 (Better Filtration)

- Culligan RC-EZ-4 (Best Filtration)

Note: A cartridge selection guide image was not available with a valid URL from the provided data.

TROUBLESHOOTING

If you encounter issues with your Culligan EZ-Change system, consider the following common troubleshooting steps:

- **Leaks:**
 - Ensure all connections are securely tightened, but avoid overtightening, which can damage seals.
 - Verify that the plastic tubing is cut cleanly and squarely to ensure a proper seal within quick-connect fittings.
 - Check the condition of any existing gaskets or hoses connected to the system; worn components may need replacement.
- **Reduced Flow:**
 - A significant reduction in water flow often indicates a clogged filter cartridge. Replace the filter if it has reached its capacity or if flow is noticeably diminished.
 - Ensure the water supply valve to the filter system is fully open.
- **Unpleasant Taste/Odor:**
 - If water quality degrades, it's likely time to replace the filter cartridge.
 - Ensure the correct filter type is installed for your specific water concerns.

For persistent issues, refer to the comprehensive user manual or contact Culligan customer support.

SPECIFICATIONS

Brand	Culligan
Model Name	EZ-Change
Item Model Number	US-EZ-1
Product Dimensions	13"L x 9"W x 4"H
Item Weight	2.2 Pounds
Installation Type	Under Sink
Special Feature	Chlorine Reduction, NSF certified
Filter Life	Up to 12 months or 3,000 Gallons
Maximum Flow Rate	0.5 Gallons Per Minute
Lower Temperature Rating	40 Degrees Fahrenheit

Upper Temperature Rating	100 Degrees Fahrenheit
NSF/ANSI Standard	42 (Aesthetic Reduction of Chlorine Taste and Odor, Nominal Particulate Class III)
